GM uses the 2.2 liter modular engine in many of its automobiles such as the Sunfire, Cavalier, Alero and Grand Am. It's considered GM's first "World Engine" because the company also uses it in vehicles such as the Opel Vectra, Astra and Zafira. These are all vehicles manufactured for European Countries. Since the engine is used in so many different vehicles, common repairs like replacing the ...

How do I Replace a Thermostat 2.2L? | It Still Runs

1 to 5 are OK 6) You can power the Nest directly using the 'usb' lead power adaptor. No need for T1 & T2 to be connected if not required. If the Grey and Black wires do go all the way from the boiler to the wall thermostat directly you could use them to carry the power using T1 & T2, provided there is enough spare cable at the boiler end to reach the heatlink.

I have a Vaillant Ecotec Pro with a simple 24 hour time switch. I'd like to replace this with a modern smart thermostat. Most of the articles I've read mention a c-wire. I'm struggling to work out if this boiler has one. I've got the wiring diagram and it's not at all clear. I'm not sure how to add t from a mobile device so I will post again later if necessary.

I picked up fresh coolant and a new Thermostat for my 2004 Cavy with the 2.2 Ecotec motor. The only thing is I really don't know exactly where the Stat location is on this car? Someone told me it is located towards the bottom area of the motor on the passenger side? I see some silver metal coolant tube I think. Is the Thermostat located in that assembly there? I just don't want to start taking ...
