This book covers the same material and more when compared with other international business texts, yet it is priced for the student's pocketbook. A new international business text for a new and ever changing global environment. With a unique chapter covering International E-Commerce, Cullen is written in a unique way. Issues link the chapters. The logic is that to choose and implement strategies in international business, you

need to understand the global, institutional, and cultural environment. In turn, you need to align functional strategies to support the more general multinational strategies. From the student's point of view, the approach is designed to answer the questions of "why do I really need to know all of this stuff?" In recent years, privatisation has fallen out of favour in many countries because the underlying political factors have not been well understood. This book examines Malaysia's privatisation programme, focusing on how

political constraints resulted in the failure of four major privatisations: the national sewerage company (IWK), Kuala Lumpur Light Rail Transit (LRT), national airline (MAS), and national car company (Proton). It considers why developing countries such as Malaysia might want to embark on privatisation, the factors that lead to policy failure, and what is needed to make it work. It shows clearly that political motives driving privatisation often dominate purely economic considerations, and thus it is necessary to analyse privatisation within the specific country context. It argues that failure in the Malaysian case was due to political considerations that compromised institutional design and regulatory enforcement, leading to problems associated with

corruption. It concludes that privatisation does not necessarily improve incentives for efficiency or enhance the finance available for capital investment, and that successful privatisation depends on the state's institutional and political capacity to design and manage an appropriate set of subsidies. Overall, this book is a comprehensive examination of privatisation in Malaysia, providing important insights for understanding the political economy of this process in other developing countries.

It is estimated that, in the United States, around 20 percent of all Police-reported road crashes involve driver distraction as a contributing factor. This figure increases if other forms of inattention are considered. Evidence

(reviewed in this volume) suggests that the situation is similar in other countries and that driver distraction and inattention are even more dangerous as contributing factors in crashes than drug and alcohol intoxication. Having a solid evidence-base from which to develop injury countermeasures is a cornerstone of road-safety management. This book adds to the accumulating evidence-base on driver distraction and inattention. With 24 chapters by 52 authors from more than 10 countries, it provides important new perspectives on the definition and meaning of driver distraction and inattention, the mechanisms that characterize them, the measurement of their effects, strategies for mitigating their effects, and recommendations for further research. The goal of this

book is to inspire further research and countermeasure development to prevent and mitigate the potentially adverse effects of driver distraction and driver inattention, and, in doing so, to save lives.

Offering a historical analysis of management in banking from the Medici to present day, this book explores how banks can cause devastating financial crisis when they fail. Rather than

labelling management as 'good' or 'bad', the author focuses on the concept of absent management, which can occur as a result of complexity. The complexity of banking, which intensified alongside the phenomenal growth of banks in the 20th and 21st centuries, resulted in banks that are mismanaged or, at times, even unmanaged. Drawing on business school case studies including Barings and Lehman Brothers, this book showcases how absent management in banking has caused crises, depressions and recessions, and how ultimately it will continue to do so.

Celebrating a quarter century of the car that redefined

(known as Miata in North America and Eunos Roadster

in Japan), revolutionized the lightweight two-seater

roadster market. By taking the front-engine, rear-wheel-

and combining it with the modern function and reliability for which Japanese cars were justly famous, Mazda created what many consider the perfect sports car. The MX-5 became the best-selling sports car of all time, selling over a million units worldwide. Customers proved that they hadn't lost their desire for simple, lightweight two-seat convertibles; they had simply lost their desire for unreliable, archaic European anachronisms that caught on fire as part of their charm. In 2009, English automotive critic Jeremy Clarkson wrote: "The fact is that if you want a sports car, the MX-5 is perfect. Nothing on the road will give you better value. Nothing will give you so much fun. The only reason I'm giving it five stars is because I can't
