The authors of this book set out a system of safety strategies and interventions for managing patient safety on a day-to-day basis and improving safety over the long term. These strategies are applicable at all levels of the healthcare system from the frontline to the regulation and governance of the system. There have been many advances in patient safety, but we now need a new and broader vision that encompasses care throughout the patient's journey. The authors argue that we need to see safety through the patient's eyes, to consider how safety is managed in different contexts and to develop a wider strategic and practical vision in which patient safety is recast as the management of risk over time. Most safety improvement strategies aim to improve reliability and move closer toward optimal care. However, healthcare will always be under pressure and we also require ways of managing safety when conditions are difficult. We need to make more use of strategies concerned with detecting, controlling, managing and responding to risk. Strategies for managing safety in highly standardised and controlled environments are necessarily different from those in which clinicians constantly have to adapt and respond to changing circumstances. This work is supported by the Health Foundation. The Health Foundation is an independent charity committed to bringing about better health and health care for people in the UK. The charity's aim is a healthier population in the UK, supported by high quality health care that can be equitably accessed. The Foundation carries out policy analysis and makes grants to front-line teams to try ideas in practice and supports research into what works to make people's lives healthier and improve the health care system, with a particular emphasis on how to make successful change happen. A key part of the work is to make links between the knowledge of those working to deliver health and health care with research evidence and analysis. The aspiration is to create a virtuous circle, using what works on the ground to inform effective policymaking and vice versa. Good health and health care are vital for a flourishing society. Through sharing what is known, collaboration and building people's skills and knowledge, the Foundation aims to make a difference and contribute to a healthier population.

This publication explains how you can recover the cost of business or income-producing property through deductions for depreciation (for example, the special depreciation allowance and deductions under the Modified Accelerated Cost Recovery System (MACRS)). It also explains how you can elect to take a section 179 deduction, instead of depreciation deductions, for certain property and the additional rules for listed property.

Taxation is a discipline that does not receive sufficient academic attention. It is typically viewed as a subset of law, accounting, public policy, economics, or finance. In this respect, most academic efforts in the field of taxation are shadowed by a mother discipline. There is currently an unprecedented need to approach tax pedagogy in a way that is independent of another discipline. This book caters to that real and unmet need in tax pedagogy. One of the book's advantages is that it is not tied to a specific tax year and does not coddle the reader with volumes of time-sensitive information. In this book the tax year is never the focus, as the center stage is reserved for teaching the principles and skills necessary to independently find answers. The reader will learn to appreciate the complexity of the American tax system and will be endowed with the contextual understanding necessary to formulate educated opinions about how taxes work and, most importantly, why. Contrary to common belief, taxation in the United States has remained fairly stable for the last 100 years. This book uses the federal individual income tax as a vehicle to unveil the mechanics that make up the American tax system. This book is essential reading for students taking a first course in taxation, at the undergraduate or graduate level, as part of programs in accounting, law, public administration, or business at large.
