Excerpt: A Wrinkle in Time is a science fantasy novel by Madeleine L'Engle, first published in 1962. The story revolves around a young girl whose father, a government scientist, has gone missing after working on a mysterious project called a tesseract. The book won a Newbery Medal, Sequoyah Book Award, and Lewis Carroll Shelf Award, and was runner-up for the Hans Christian Andersen Award. It is the first in L'Engle's series of books about the Murry and O'Keefe families. Meg Murry's classmates and teachers see her as a troublesome student. Her family knows that she is emotionally immature but also see her as capable of great things. The family includes her pretty scientist mother; her mysteriously absent scientist father; her 10-year-old twin brothers, the athletic Sandy and Dennys; and her five year-old brother Charles Wallace Murry, a super-genius. The book begins with the line "It was a dark and stormy night," an allusion to the opening words in Edward George Bulwer-Lytton's 1830 novel Paul Clifford. During that stormy night the Murrys are visited by an eccentric old woman named Mrs. Whatsit, who has previously made the acquaintance of Charles Wallace. After drying her feet and having a snack with Charles, Meg, and their mother, Mrs. Whatsit tells an already perplexed Mrs. Murry that "there is such a thing as a tesseract," which causes her to almost faint. The next morning, Meg discovers the term refers to a...

Book Three of The Austin Family Chronicles

A FINANCIAL TIMES AND TLS BOOK OF THE YEAR An exhilarating new biography of John von Neumann: the lost genius who invented our world 'A sparkling book, with an intoxicating mix of pen-portraits and grand historical narrative. Above all it fizzes with a dizzying mix of deliciously vital ideas. . . A staggering achievement' Tim Harford The smartphones in our pockets and computers like brains. The vagaries of game theory and evolutionary biology. Self-replicating moon bases and nuclear weapons. All bear the fingerprints of one remarkable man: John von Neumann. Born in Budapest at the turn of the century, von Neumann is one of the most influential scientists to have ever lived. His colleagues believed he had the fastest brain on the planet - bar none. He was instrumental in the Manhattan Project and helped formulate the bedrock of Cold War geopolitics and modern economic theory. He created the first ever programmable digital computer. He prophesied the potential of nanotechnology and, from his deathbed, expounded on the limits of brains and computers - and how they might be overcome. Taking us on an astonishing journey, Ananyo Bhattacharya explores how a combination of genius and unique historical circumstance allowed a single man to sweep through so many different fields of science, sparking revolutions wherever he went.

Insightful and illuminating, The Man from the Future is a thrilling intellectual biography of the visionary thinker who shaped our century.

Experience this story of first love by A Wrinkle in Time author Madeleine L'Engle. This classic novel is now a major motion picture, Camilla Dickinson.

Fifteen-year-old Camilla Dickinson has led a sheltered life on the Upper East Side with her architect father and stunningly beautiful mother. But this winter the security she has always known has vanished, because her parents' marriage is coming apart - and Camilla is caught in the middle. She finds a way to escape her troubles when she meets Frank, her best friend's brother, who is someone she can really talk to about life, death, God, and her dream of becoming an astronomer. When Frank introduces her to the important people in his life, who are so different from anyone she has met before, he opens her eyes to worlds beyond her own, almost as if he were a telescope helping her to see the stars. This novel, one of the author's earliest, is the story of a girl who, with the help of her first love, leaves childhood behind and enters adulthood with a newfound sense of self and inner strength.

A quiet visit with her grandparents turns into a lesson in the fluidity of time for Polly O'Keefe when she meets several strangers from overlapping temporal planes and, with them, plays a key role in a prehistoric confrontation. Simultaneous.

Madeleine L'Engle's ground-breaking science fiction and fantasy classic, soon to be a major motion picture. It was a dark and stormy night; Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem. A Wrinkle in Time is the winner of the 1963 Newbery Medal. It is the first book in The Time Quintet, which consists of A Wrinkle in Time, A Wind in the Door, A Swiftly Tilting Planet, Many Waters, and An Acceptable Time. A Wrinkle in Time is soon to be a movie from Disney, directed by Ava DuVernay,

“An unusual and beautiful book,” the first novel by the bestselling author of A Wrinkle in Time explores the life of a young artist (Los Angeles Times). At only ten years old, Katherine Forrester has already experienced her fair share of upheaval. It has been three years since she last saw her mother, a concert pianist whose career was cut short by a terrible accident. After a brief reunion, tragedy strikes once more, forcing Katherine from the familiarity of New York City to a foreign Swiss boarding school. Far from home, she struggles with the challenges of growing up. Stifled by her daily routine and the pettiness of her classmates, Katherine’s piano lessons with a gifted young teacher provide an anchor in the storm. After graduation, she follows in her mother’s footsteps, pursuing a career as a pianist in Greenwich Village. There, she must learn to reconcile her blossoming relationship with her fiancé with the one consistent and dominant force in her life: music. Inspired by the author’s time living among artists, The Small Rain follows Katherine’s journey from a distraught girl to an exuberant and talented woman with the breadth and poignancy that defines Madeleine L’Engle’s signature style. This ebook features an illustrated biography of Madeleine L’Engle including rare images from the author’s estate.

In A Wrinkle in Time Quintet book two, Meg Murry, now in college, time travels with her twin brothers, Sandy and Dennys, to a desert oasis that is embroiled in war. Sandy and Dennys have always been the normal, run-of-the-mill ones in the extraordinary Murry family. They garden, make an occasional A in school, and play baseball. Nothing especially interesting has happened to the twins until they accidentally interrupt their father's experiment. Then the two boys are thrown across time and space. They find themselves alone in the desert, where, if they believe in unicorns, they can find unicorns, and whether they believe or not, mammoths and manticores will find them. The twins are rescued by Japheth, a man from the nearby oasis, but before he can bring them to safety, Dennys gets lost. Each boy is quickly embroiled in the conflicts of this time and place, whose populations includes winged seraphim, a few stray mythic beasts, perilous and beautiful nephilim, and small, long lived humans who consider Sandy and Dennys giants. The boys find they have more to do in the oasis than simply getting themselves home—they have to reunite an estranged father and son, but it won't be easy, especially when the son is named Noah and he's about to start building a boat in the desert. The world already knows Meg and Charles Wallace Murry, Calvin O'Keefe, and the three Mrs--Who, Whatsit, and Which--the memorable and wonderful characters who fight off a dark force and save our universe in the Newbery award-winning classic A Wrinkle in Time. But in 50 years of publication, the book has never been illustrated. Now, Hope Larson takes the classic story to a new level with her vividly imagined interpretations of tessering and favorite characters like the Happy Medium and Aunt Beast. Perfect for old fans and winning over new ones, this graphic novel adaptation is a must-read. This graphic novel is best read on a tablet device.

During the summer of 1946, twenty-year-old Elizabeth is doing what she has dreamed of since she was a little girl: working in the theatre. Elizabeth is passionate about her work and determined to learn all she can at the summer theatre company on the sea where she is an apprentice actress. She's never felt so alive. And soon she finds another passion: Kurt Canitz, the dashing young director of the company, and the first man Elizabeth's ever kissed who has really meant something to her. Then Elizabeth's perfect summer is profoundly shaken when Kurt turns out not to be the kind of man she thought he was. Moving and romantic, this coming-of-age story was written during the 1940s. As revealed in an introduction by the author's granddaughter Léna Roy, the protagonist Elizabeth is close to an autobiographical portrait of L'Engle herself as a young woman—"vibrant, vulnerable, and yearning for love and all that life has to offer."

Madeleine L'Engle's ground-breaking science fiction and fantasy classic, now a major motion picture. It was a dark and stormy night; Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem. A Wrinkle in Time is the winner of the 1963 Newbery Medal. It is the first book in The Time Quintet, which consists of A Wrinkle in Time, A Wind in the Door, A Swiftly Tilting Planet, Many Waters, and An Acceptable Time. A Wrinkle in Time is now a movie from Disney, directed by Ava DuVernay, starring Storm Reid, Oprah Winfrey, Reese Witherspoon and Mindy Kaling. This title has Common Core connections.

The first definitive biography of Richard Avedon, a monumental photographer of the twentieth century, from award-winning photography critic Philip Gefter. In his acclaimed portraits, Richard Avedon captured the iconic figures of the twentieth century in his starkly bold, intimately minimal, and forensic visual style. Concurrently, his work for Harper's Bazaar and Vogue transformed the ideals of women's fashion, femininity, and culture to become the defining look of an era. Yet despite his driving ambition to gain respect in the art world, during his lifetime he was condescendingly dismissed as a "celebrity photographer." What Becomes a Legend Most is the first definitive biography of this luminary—an intensely driven man who endured personal and professional prejudice, struggled with deep insecurities, and mounted an existential lifelong battle to be recognized as an artist. Philip Gefter builds on archival research and exclusive interviews with those closest to Avedon to chronicle his story, beginning with Avedon's coming-of-age in New York between the world wars, when cultural prejudices forced him to make decisions that shaped the course of his life. Compounding his private battles, Avedon fought to be taken seriously in a medium that itself struggled to be respected within the art world. Gefter reveals how the 1950s and 1960s informed Avedon's life and work as much as he informed the period. He counted as close friends a profoundly influential group of artists—Leonard Bernstein, Truman Capote, James Baldwin, Harold Brodkey, Renata Adler, Sidney Lumet, and Mike Nichols—who shaped the cultural life of the American twentieth century. It wasn't until Avedon's fashion work was exhibited at the Metropolitan Museum of Art in the late 1970s that he became a household name. Balancing glamour with the gravitas of an artist's genuine reach for worldly achievement—and not a little gossip—plus sixteen pages of photographs, What Becomes a Legend Most is an intimate window into Avedon's fascinating world. Dramatic, visionary, and remarkable, it pays tribute to Avedon's role in the history of photography and fashion—and his legacy as one of the most consequential artists of his time.

Meg Murry and her friends become involved with unearthly strangers and a search for Meg's father, who has disappeared while engaged in secret work for the government. The first of his peerless novels of Cold War espionage and international intrigue, Call for the Dead is also the debut of John le Carré's masterful creation George Smiley. After a routine security check by George Smiley, civil servant Samuel Fennan apparently kills himself. When Smiley finds Circus head Maston is trying to blame him for the man's death, he begins his own investigation, meeting with Fennan's widow to find out what could have led him to such desperation. But on the very day that Smiley is ordered off the enquiry he receives an urgent letter from the dead man. Do the East Germans - and their agents - know more about this man's death than the Circus previously imagined? Le Carré's first book, Call for the Dead, introduced the tenacious and retiring George Smiley in a gripping tale of espionage and deceit. If you enjoyed Call for the Dead, you might like le Carré's The Spy Who Came in from the Cold, also available in Penguin Modern Classics. In book four of the award-winning Austin Family Chronicles young adult series from Madeleine L'Engle, author of A Wrinkle in Time, Vicky Austin experiences the difficulties and joys of growing up. "This wasn't the first time that I'd come close to death, but it was the first time I'd been involved in this part of it, this strange, terrible saying goodbye to someone you've loved." These are Vicky Austin's thoughts as she stands near Commander Rodney's grave while her grandfather, who himself is dying of cancer, recites the funeral service. Watching his condition deteriorate over that long summer is almost more than she can bear. Then, in the midst of her struggle, she finds herself the center of attention for three young men. Leo, Commander Rodney's son, turns to her as an old friend seeking comfort but longing for romance. Zachary, whose attempted suicide inadvertently caused Commander Rodney's death, sees her as the one sane and normal person who can give some meaning to his life. And Adam, a serious young student working at the nearby marine-biology station, discovers Vicky, his friend's little sister, incipient telepathic powers that can help him with his experiments in dolphin communications. Vicky finds solace and brief moments of peace in her poetry, but life goes on around her, and the strain intensifies as she confronts matters of love and of death, of dependence and of responsibility, universal concerns that we all must face. The inevitable crisis comes and Vicky must rely on openness, sensitivity, and the love of others to overcome her private grief. Once again, Madeleine L'Engle has written a story that revels in the drama of vividly portrayed characters and events of the spiritual and moral dimensions of common human experiences.
