As important cultural icons of the early nineteenth-century United States, romantic adventurers energized the mythologies of the West and prepared the ground for the gendered and ethnic justifications of territorial conquest. In their letters home, travel accounts, fiction, poetry, artwork, and material culture, they expressed the optimisms and anxieties of their generation and refashioned the exceptionalisms that informed American manliness and nationhood

*** #1 The Sunday Times bestseller *** Publishers Weekly bestseller "This book is no joke. Get ready to not sleep tonight. Awakened does exactly what it advertises. Scary amazing fun." -- Brad Meltzer, bestselling author of The Escape Artist. "Awakened hits the high notes of Douglas Preston & Lincoln Child's Relic and Scott Snyder's The Wake [...] but its scope actually extends much further." -- Kirkus *** The star of truTV's hit show Impractical Jokers—alongside veteran sci-fi and horror writer Darren Wearmouth—delivers a chilling and wickedly fun supernatural novel in the vein of The Strain, in which a beautiful new subway line in New York City unearths an ancient dark horror that threatens the city's utter destruction and the balance of civilization itself. After years of waiting, New York's newest subway line is finally ready, an express train that connects the city with the burgeoning communities across the Hudson River. The shining jewel of this state-of-the-art line is a breathtaking visitors' pavilion beneath the river. Major dignitaries, including New York City's Mayor and the President of the United

States, are in attendance for the inaugural run, as the first train slowly pulls in. Under the station's bright ceiling lights, the shiny silver cars gleam. But as the train comes closer into view, a far different scene becomes visible. All the train's cars are empty. All the cars' interiors are drenched in blood. As chaos descends, all those in the pavilion scramble to get out. But the horror is only beginning. High levels of deadly methane fill the tunnels. The structure begins to flood. For those who don't drown, choke or spark an explosion, another terrifying danger awaits—the thing that killed all those people on the train. It's out there...and it's coming. There's something living beneath New York City, and it's not happy we've woken it up.

Authored by Ara Campbell of wildly popular Goddess Circle school and community, Dark Goddess Magick shows readers how to tap into the energy of shadow magick and the support of the dark goddesses to set boundaries and reclaim their power.

A human narrator from England is transported out of his body via unexplained means. He realizes he is able to explore space and other planets. After exploring a civilization on another planet in our galaxy at a level of development similar to our own that existed millions of years ago thousands of light years from Earth (the "Other Earth") in some detail, his mind merges with that of one of its inhabitants, and as they travel together, they are joined by still more minds or group-minds. This snowballing process is paralleled by the expansion of the book's scale, describing more and more planets in less and less detail.

Authoritative account of the fundamental social and demographic changes that have shaped the turbulent and polarised politics of the UK today.

Political Philosophy in Japan focuses on the politics of Japan's pre-eminent philosophical school - the Kyoto School - and particularly that of its founder, Nishida Kitarô (1870-1945). Existing literature on Nishida is dismissive of there being serious political content in his work, and of the political stance of the wider school. Goto-Jones contends that, far from being apolitical, Nishida's philosophy was explicitly and intentionally

Will Destroy the Galaxy for Cash is the follow up tale to Will Save the Galaxy for Food from the mind of writer Yahtzee Croshaw (Mogworld, Jam, Differently Morphous). With the age of heroic star pilots and galactic villains completely killed by quantum teleportation, the ex-star pilot currently named Dashford Pierce is struggling to find his identity in a changing universe. Then, a face from his past returns and makes him an offer he can't refuse: take part in just one small, slightly illegal, heist, and not only will he have the means to start the new life he craves, but also save his childhood hero from certain death. What could go wrong? If you need to ask--you don't know Dashford Pierce. Before long, Pierce is surrounded by peril, and forced to partner with the very same supervillains he'd spent his heroic career thwarting. But when he's confronted by the uncomfortable truth that star pilots might not have been the force for good, they had intended to be, he begins to wonder if the villains hadn't had the right idea all along...

Human beings are now evolving into a new species, popularized as the light body that starts to grow when our vibration is high enough to activate DNA that exists in our genes. The growing force increases the vibration of all objects over time. When the old body design no longer thrives in the increased vibratory field a species wide metamorphosis triggers. That is where we are today. In early 2006, Mary unexpectedly experienced a kundalini awakening after years of doing meditation. After this, she devoted three years full-time to the kundalini transformation and took daily notes. The core of Our Light Body is Mary's journal for the first year of kundalini transformation with notes, poetry, insights, visions and dreams. The book has chapters with the author's insights about the personality, the higher-self, steps of spiritual awakening, dark nights of the soul, DNA activation, kundalini, human metamorphosis and evolution.

In 1945 when the atomic bombs were dropped in WWII, our "protectors" and "watchers" in outer space saw that Earth was on a collision course with disaster. The prime directive of non-interference prevented them from taking any action, but then they came up with a brilliant plan to save Earth and assist her in her ascension. They couldn't interfere from the "outside", but maybe they could influence from the "inside". So the call went out for volunteers to come and help. "Earth is in trouble - who wants to volunteer?" The native souls living on Earth were too caught up on the wheel of karma. The only hope was to ask for pure souls to come who had never been trapped on the karmic cycle. Dolores in her hypnosis work has discovered three waves of these volunteers. Some have come direct from the "Source" and have never lived in any type of physical body before. Others have lived as space beings on other planets or other dimensions. Because all memory is erased upon entry to the Earth dimension, they do not remember their assignment. Thus these beautiful souls have a difficult time adjusting to our

"Black Age argues that age tracks the struggle between the abuses of black exclusion from western humanism, and the reclamation of non-normative black life"--

This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce. From Axial Age thinkers we inherited a sense of the world as a place not just to experience but to investigate, envision, and alter. A variety of utopian visions emerged and led to both reform and repression.

A monumental and exhilarating history of European thought, from the fall of Rome in the fifth century AD to the Scientific Revolution thirteen centuries later. The Awakening traces the recovery and refashioning of Europe's classical heritage from the ruins of the Roman Empire. The process of preservation of surviving texts, fragile at first, was strengthened under the Christian empire founded by Charlemagne in the eighth century; later, during the High Middle Ages, universities were founded and the study of philosophy was revived. Renewed interest in ancient Greek and

Roman thought provided the intellectual impetus for the Renaissance of the fifteenth and sixteenth centuries, whose ideas - aesthetic, political and scientific - were disseminated across Europe by the invention of the printing press. Equally momentous was Europe's encounter with the New World, and the resulting maritime supremacy which conferred global reach on Europe's merchants and colonists. Vivid in detail and informed by the latest scholarship, The Awakening is powered not by the fate of kings or the clash of arms but by deeper currents of thought, inquiry and discovery, which first recover and then surpass the achievements of classical antiquity, and lead the West to the threshold of the Age of Reason. Charles Freeman takes the reader on an enthralling journey, and provides us with a vital key to understanding the world we live in today.

The English novelist and philosopher Olaf Stapledon wrote intriguing histories of the future, which served as a major influence on the development of the science fiction genre. His debut novel, 'Last and First Men', covers a history of 18 successive species of humanity, while his magnum opus 'Star Maker' provides an outline history of the Universe over two billion years. His works are highly acclaimed by figures as diverse as Brian Aldiss, Jorge Luis Borges, J. B. Priestley, Bertrand Russell, Algernon Blackwood, Arnold Bennett, Virginia Woolf, C. S. Lewis and Winston Churchill. Stapledon used his novels as vehicles to present complex and thought-provoking philosophical ideas, employing themes of antiquity to fashion a myth of the future.
