Most people wake up and drive to a job that they hate. Think about your five closest friends. Are they happy? Do they live their lives with purpose? Do you? We put on a fake front for what we want people to see and think about us, but the reality is most people aren't happy. We're lost. We settle. We aren't happy with where we are. You can't be happy if you don't know your purpose. It's not possible. You want more but you don't even know where to start. You know there is more out there. You see others having success and you want it, too; there is nothing wrong with that. You just need help finding your purpose so you can find the success you see all around you. You can be productive, crush your goals, pretend that all the things that you've acquired actually mean something...but at the end of the day, if you don't know your purpose, you'll always feel like there's something missing. You'll know that you're capable of more and that you're not living the life you should be. You might be fooling the world, but you're not fooling the person looking back at you in the mirror. You need to find your actual power source. Your purpose is your source of power. Once you find your purpose it'll fuel you for life. You'll do things that you never thought you were capable of. Achieving your purpose will force you to morph into a stronger version of yourself. You'll have to push through fears, insecurities, and doubts that held you back. But somehow it'll all feel possible and necessary because you're purpose-driven now...and that's the only thing you'll ever need.

"An astonishing 94.6% of businesses fail to sell, closing at an enormous cost to the owner, their family, their staff and the economy. It's a shocking realisation to many business owners that after all the courage it took to start, the creativity and care it took to build, every business faces only two possible ends: a sale or closure. So you've got to build to \$ell. Sweat, Scale, \$ell shares real business-building stories about how ordinary business owners changed their fate using the Asset of Value™ method, a practical approach to building a winning business. With Pavlo Phitidis, they Sweated to reshape their business to be relevant to a changing world; they built a solid foundation for Scale; and then they pressed hard on the accelerator to ramp up growth in preparation for \$ale to create a business any buyer would want. Phitidis draws on 25 years of direct experience in conceptualising and building businesses across four continents. He has developed and brought to market business assets in excess of US\$300 million through a combination of business start-ups, turnarounds, sales and acquisitions. Phitidis started, built and sold 12 businesses in nine years and took the lessons from the two failures, two IPOs and eight sales to build a business that builds businesses. As a co-founder of Aurik he has worked with over 1 500 established businesses across most sectors in the economy, including family businesses, partnerships and lone business owners."--Back cover.

Freedom. It's the ability to do whatever you want, whenever you want. It's the ultimate reward of selling your business. But selling a company can be confusing, and one wrong step can easily cost you dearly. The Art of Selling Your Business: Winning Strategies & Secret Hacks for Exiting on Top is the last in a trilogy of books by author John Warrillow on building value. This essential guide to monetizing a business is based on interviews the author conducted on his podcast, Built to Sell Radio, with hundreds of successfully cashed-out founders. The Art of Selling Your Business answers important questions facing any founder, including— • What's your business worth? • When's the best time to sell? • How do you create a bidding war? • How can you position your company to maximize its attractiveness? • Who will pay the most for your business? • What's the secret for punching above your weight in a negotiation to sell your company? Unearth the lucrative opportunities of the small business market. The new entrepreneurial explosion has many Fortune 500 companies pinning their hopes for prosperity on the small business sector. But most blue chip behemoths simply don't know how to reach small businesses—they don't understand this segment's diversity and how to effectively reach out to its various parts. Drilling for Gold will show the big companies just how small businesses tick. John Warrillow reveals the enormous size of the small business marketing opportunity and shows readers various ways to reach this vast, yet seemingly hidden sector. He covers how to address the small business market, managing cost control, and segmenting the customer base, along with numerous case studies.

Run your company. Don't let it run you. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.

Each year Americans start one million new businesses, nearly 80 percent of which fail within the first five years. Under such pressure to stay alive—let alone grow—it's easy for entrepreneurs to get caught up in a never-ending cycle of “sell it—do it, sell it—do it” that leaves them exhausted, frustrated, and unable to get ahead no matter how hard they try. This is the exact situation Mike Michalowicz found himself in when he was trying to grow his first company. Although it was making steady money, there was never very much left over and he was chasing customers left and right, putting in twenty-eight-hour days, eight days a week. The punishing grind never let up. His company was alive but stunted, and he was barely breathing. That's when he discovered an unlikely source of inspiration—pumpkin farmers. After reading an article about a local farmer who had dedicated his life to growing giant pumpkins, Michalowicz realized the same process could apply to growing a business. He tested the Pumpkin Plan on his own company and transformed it into a remarkable, multimillion-dollar industry leader. First he did it for himself. Then for others. And now you. So what is the Pumpkin Plan? Plant the right seeds: Don't waste time doing a bunch of different things just to please your customers. Instead, identify the thing you do better than anyone else and focus all of your attention, money, and time on figuring out how to grow your company doing it. Weed out the losers: In a pumpkin patch small, rotten pumpkins stunt the growth of the robust, healthy ones. The same is true of customers. Figure out which customers add the most value and provide the best opportunities for sustained growth. Then ditch the worst of the worst. Nurture the winners: Once you figure out who your best customers are, blow their minds with care. Discover their unfulfilled needs, innovate to make their wishes come true, and overdeliver on every single promise. Full of stories of other successful entrepreneurs, The Pumpkin Plan guides you through unconventional strategies to help you build a truly profitable blue-ribbon company that is the best in its field.

How maverick companies have passed up the growth treadmill — and focused on greatness instead. It's an axiom of business that great companies grow their revenues and profits year after year. Yet quietly, under the radar, a small number of companies have rejected the pressure of endless growth to focus on more satisfying business goals. Goals like being great at what they do, creating a great place to work, providing great customer service, making great contributions to their communities, and finding great ways to lead their lives. In *Small Giants*, veteran journalist Bo Burlingham takes us deep inside fourteen remarkable companies that have chosen to march to their own drummer. They include Anchor Brewing, the original microbrewer; CitiStorage Inc., the premier independent records-storage business; Clif Bar & Co., maker of organic energy bars and other nutrition foods; Righteous Babe Records, the record company founded by singer-songwriter Ani DiFranco; Union Square Hospitality Group, the company of restaurateur Danny Meyer; and Zingerman's Community of Businesses, including the world-famous Zingerman's Deli of Ann Arbor. Burlingham shows how the leaders of these small giants recognized the full range of choices they had about the type of company they could create. And he shows how we can all benefit by questioning the usual definitions of business success. In his new

afterward, Burlingham reflects on the similarities and learning lessons from the small giants he covers in the book.

The past decade has seen the relentless rise of cryptocurrency as an alternative form of digital currency. But what precisely is it and what potential does it have to change the world of money? In this brilliantly clear, one-stop guide WIRED Senior Editor Gian Vopicelli explains everything you need to know about cryptocurrency. He outlines its development and describes precisely how it operates. He demystifies the jargon it has spawned, from blockchain, Bitcoin and stablecoins to mining, smart contracts and forking. He looks at the political and economic ideologies that drive it. And he addresses the central question: will cryptocurrency have the transformative economic and social impact that its champions claim for it?

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research

team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

Too many entrepreneurs push off planning for the sale of their business until the last moment. But for a business to sell for what it's really worth—or even more—owners need to prepare for the sale from the very start. In Exit Rich, author and mergers and acquisitions authority Michelle Seiler Tucker joins forces with Sharon Lechter, finance expert and author of Rich Dad Poor Dad, to create a must-have guide for all business owners—whether they're gearing up to sell a business now or just getting started building out their company into something to sell for a profit in the future. Seiler Tucker's twofold approach to selling your business for maximum profit combines two of the most powerful elements of her mergers and acquisitions toolkit: the "ST GPS Exit Model" to help business owners set goals for the sale before their business hit the market, and the "6 P Method" to help them objectively evaluate their business's worth, before their potential buyers do. Combined, these tools provide invaluable insight into the process of preparing a business for sale, finding the right buyers, and staging the sale itself. Throughout the book, Sharon Lechter's wisdom peppers each chapter in the "Mentoring Corner" section, providing forward-thinking entrepreneurs with the perspective that they need to take control of their business's future and exit rich. This book is a rich resource for any business owner looking to:

- Objectively evaluate their business before a sale
- Improve their chances of finding the right buyer
- Sell their business for maximum profit

If you are thinking about starting your own consultancy; have started one and hit your first round of growing pains, or are a veteran looking at an exit, this book is for you.

According to John Warrillow, the number one mistake entrepreneurs make is to build a business that relies too heavily on them. Thus, when the time comes to sell, buyers aren't confident that the company-even if it's profitable-can stand on its own. To illustrate this, Warrillow introduces us to a fictional small business owner named Alex who is struggling to sell his advertising agency. Alex turns to Ted, an entrepreneur and old family friend, who encourages Alex to pursue three criteria to make his business sellable: * Teachable: focus on products and services that you can teach employees to deliver. * Valuable: avoid price wars by specialising in doing one thing better than anyone else. * Repeatable: generate recurring revenue by engineering products that customers have to repurchase often.

Kevin Harrington, one of the original "sharks" of the TV hit Shark Tank, and serial entrepreneur Mark Timm take you on a journey that radically redefines what it means to truly succeed--at work, at home, and in every area of life. On one of the best days of his life as an entrepreneur, Mark Timm found himself sitting in his car at the end of his driveway. In just a minute he would go into the house and greet his wife and children. But as he basked in the success he'd just had, he also had to face a surprising realization: he didn't really want to go home. Mark knew that once he stepped into the happy chaos of his family, the euphoria of the day would evaporate. His work life and his home life might as well have been two different worlds. And at that moment, he acknowledged--as he puts it--that "my businesses were getting my first and my best, while my family got my last and my least." Mentor to Millions charts Mark's journey from that pivotal moment to a whole new understanding of how work, life, and relationships can coexist and thrive together. His guide through this journey: his accomplished mentor, Kevin Harrington, one of the original "sharks" from Shark Tank, who shares amazing stories and imparts invaluable wisdom about how to win in business and in every area of life. This deeply personal, easy-to-follow book invites you to join Mark and Kevin on the journey. Every page pulls back the curtain on entrepreneurship at the highest level, revealing priceless business lessons--which lead to the biggest lesson of all: combining the best of business, family, and personal life. If you're succeeding in business, struggling, or just starting out, and want your life at home to be what you've always dreamed it can be, this is the lesson you need to learn: the most valuable business you'll ever own, work for, or be a part of isn't the business you go to every day, it's the one you go home to.

"This is not a book about charismatic visionary leaders. It is not about visionary product concepts or visionary products or visionary market insights. Nor is it about just having a corporate vision. This is a book about something far more important, enduring, and substantial. This is a book about visionary companies." So write Jim Collins and Jerry Porras in this groundbreaking book that shatters myths, provides new insights, and gives practical guidance to those who would like to build landmark companies that stand the test of time. Drawing upon a six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that have consistently distinguished out-standing companies. They also provide inspiration to all executives and entrepreneurs by destroying the false but widely accepted idea that only charismatic visionary leaders can build visionary companies. Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the twenty-first century and beyond.

Winning Strategies & Secret Hacks for Exiting on Top

In The Partnership Charter, psychologist and business mediation expert David Gage offers a comprehensive guide to the art of establishing and maintaining a business partnership.

The centerpiece of his approach is the Partnership Charter, a document that clearly outlines the goals, expectations, responsibilities, and relationships of the principals. The charter identifies potential sources of conflict and how they will be resolved, while addressing such sensitive issues as personal styles, values, money, and power. Illustrating every principle through engaging stories drawn from Gage's front-line experience consulting to business partners, as well as interviews with the founding partners of such successful businesses as Progressive Insurance Company and Manpower, Inc., The Partnership Charter dispels common myths and presents a practical framework for launching, building, and sustaining a thriving business partnership.

Start Small, Stay Small is a step-by-step guide to launching a self-funded startup. If you're a desktop, mobile or web developer, this book is your blueprint to getting your startup off the ground with no outside investment. This book intentionally avoids topics restricted to venture-backed startups such as: honing your investment pitch, securing funding, and figuring out how to use the piles of cash investors keep placing in your lap. This book assumes: * You don't have \$6M of investor funds sitting in your bank account * You're not going to relocate to the handful of startup hubs in the world * You're not going to work 70 hour weeks for low pay with the hope of someday making millions from stock options There's nothing wrong with pursuing venture funding and attempting to grow fast like Amazon, Google, Twitter, and Facebook. It just so happened that most people are not in a place to do this. Start Small, Stay Small also focuses on the single most important element of a startup that most developers avoid: marketing. There are many great resources for learning how to write code, organize source control, or connect to a database. This book does not cover the technical aspects developers already know or can learn elsewhere. It focuses on finding your idea, testing it before you build, and getting it into the hands of your customers.
