A covert mission in Shanghai reunites Kusanagi with a wartime rival amid shifting loyalties. The infiltration of an anti-cyberization cult calls for Section 9 ' s most " human " members to do things the old-fashioned way. A deep dive into the mind of a criminal forces Kusanagi to question the nature of imagination – and her own identity. The stories in Global Neural Network bring a 21st-century perspective to its questions of human identity and the border between mind and machine that made *The Ghost in the Shell* one of the most revered manga of all time, and unleash top Western comics artists on eye-popping action scenes starring Kusanagi, Batou, Togusa, Aramaki, and all the members of Section 9! Original stories by: \* Alex de Campi (*Twisted Romance*) & Giannis Milonogiannis (*Prophet*) \* Brenden Fletcher (*Gotham Academy*, *Motor Crush*) & LRNZ (*Golem*) \* Genevieve Valentine (*Mechanique*, *Icon*), & Brent Schoonover (*The Astonishing Ant-Man*) \* Max Gladstone (*the Craft Sequence*) & David López (*All-New Wolverine*)

How to Draw: Manga

*The Hokusai drawing method is divided into 3 steps: drawing by geometrical shapes, using calligraphy and simplifying the line of the drawing. This book brings you the 3 techniques in separate parts to become an artist with Japanese influences. Ukiyo-e, Japanese art, uses the concepts taught by Katsushika Hokusai. Start by creating a character through geometry, continue by defining the lines of his clothes through calligraphy and then exhaust your drawing with a minimalist stroke. Discover a way to draw animals, humans or even landscapes thanks to the teachings of the Japanese artist Hokusai. "Volume 1: Learning to draw with geometric shapes Japanese drawing has been attracting attention since the great Universal Exhibition of 1867, by its simple and refined appearance. The Japanese artist Katsushika Hokusai delivers the secrets of this art so much appreciated by the Western world. This book is an explanation adapted to bring you the bases of the Hokusai method. Through the different pages of this book, discover step by step how to use geometrical shapes to realize complex or moving forms. Whether you are a tattoo artist, an artist or an amateur, each drawing will bring you enough material to create illustrations as harmonious as those made by the great names of Ukiyo-e." "Volume 2: Learning to draw through calligraphy Japanese art is inspired on the one hand by geometric shapes and on the other hand by calligraphy. The Japanese artist Hokusai enlightens us on the use of Hiragana, Katakana and Kanji to create drawings with both elegant and dynamic forms. Discover how to use the Japanese alphabet of the time to make a woman in a kimono, a landscape or even an elephant. Although the writing changes over time, the technique continues! The Hokusai style in Ukiyo-e, an ancestral Japanese art, is a real treasure as much for the one who holds his pencil as for the eyes of the one who admires it. This book is intended to familiarize you with the use of Japanese calligraphy to create new works of art, tattoos or simply to teach you how to draw. Whether you use a brush, a graphic tablet or a felt-tip pen, take advantage of the pages of this book to develop your own artistic style by following the precepts of the great Japanese master Hokusai." "Volume 3 : Learning to draw by simplifying lines The Japanese painter Hokusai reveals his secrets to become an outstanding draftsman. Known to be the master of Japanese prints, Katsushika Hokusai is one of the founders of Japanese drawing and Ukiyo-e. Learn how to draw nature, humans and animals in very few strokes! Use specific shapes from kanji (Japanese ideograms) and kana (Hiragana and Katakana) to create a castle, a pagoda or a woman in a kimono. From very few shapes, you will be able thanks to this book to draw like the greatest artists of Japanese Art."*

A beautifully illustrated history of paper currency from around the world offers a close-up look at a variety of international bills, detailing the various people, places, animals, historical events, and other subjects appearing on the currency from some eighty countries. Original.

In this beautiful and richly illustrated book, the acclaimed author of *Blue and Black* presents a fascinating and revealing history of the color green in European societies from prehistoric times to today. Examining the evolving place of green in art, clothes, literature, religion, science, and everyday life, Michel Pastoureau traces how culture has profoundly changed the perception and meaning of the color over millennia—and how we misread cultural, social, and art history when we assume that colors have always signified what they do today. Filled with entertaining and enlightening anecdotes, *Green* shows that the color has been ambivalent: a symbol of life, luck, and hope, but also disorder, greed, poison, and the devil. Chemically unstable, green pigments were long difficult to produce and even harder to fix. Not surprisingly, the color has been associated with all that is changeable and fleeting: childhood, love, and money. Only in the Romantic period did green definitively become the color of nature. Pastoureau also explains why the color was connected with the Roman emperor Nero, how it became the color of Islam, why Goethe believed it was the color of the middle class, why some nineteenth-century scholars speculated that the ancient Greeks couldn't see green, and how the color was denigrated by Kandinsky and the Bauhaus. More broadly, *Green* demonstrates that the history of the color is, to a large degree, one of dramatic reversal: long absent, ignored, or rejected, green today has become a ubiquitous and soothing presence as the symbol of environmental causes and the mission to save the planet. With its striking design and compelling text, *Green* will delight anyone who is interested in history, culture, art, fashion, or media.

*Our lives are saturated by color. We live in a world of vivid colors, and color marks our psychological and social existence. But for all color's inescapability, we don't know much about it. Now authors David Scott Kastan and Stephen Farthing offer a fresh and imaginative exploration of one of the most intriguing and least understood aspects of everyday experience. Kastan and Farthing, a scholar and a painter, respectively, investigate color from numerous perspectives: literary, historical, cultural, anthropological, philosophical, art historical, political, and scientific. In ten lively and wide-ranging chapters, each devoted to a different color, they examine the various ways colors have shaped and continue to shape our social and moral imaginations. Each individual color becomes the focal point for a consideration of one of the extraordinary ways in which color appears and matters in our lives. Beautifully produced in full color, this book is a remarkably smart, entertaining, and fascinating guide to this elusive topic.*

*What remains of the colours of our childhood? What are our memories of a blue rabbit, a red dress, a yellow bike - and were they really those colours? What colours do we associate with our student years, our first loves, our adult lives? How does colour leave its mark on memory? In an attempt to answer these and other questions, Michel Pastoureau presents us with a journal about colours that covers half a century. Drawing on personal recollections, he retraces the recent history of colours through an exploration of fashion and clothing, everyday objects and practices, emblems and flags, sport, literature, museums and art. This text - playful, poetic, nostalgic - records the life of both the author and his contemporaries. We live in a world increasingly bursting with colour, in which colour remains a focus for memory, a source of delight and, most of all, an invitation to dream.*
