

Counterstrike (Black Fleet Trilogy, Book 3)

From Joshua Datzelle comes the follow up to the #1 Bestseller "Warship." Captain Jackson Wolfe survived the initial incursion of a vicious alien species into human space ... barely. He had assumed the juggernaut that had devastated three Terran systems was the herald for a full invasion, but for the last few years it has been eerily quiet along the Frontier. Jackson now struggles to convince the Confederate leadership the threat is still imminent and needs to be taken seriously. While powerful factions make backroom deals he is desperate to find irrefutable proof that the invaders are coming and if humanity expects to survive they must marshal their forces and make a stand before it's too late. Commander Adams and the remnants of humanity discover a second fugitive fleet, fleeing a different mortal enemy. Can the two armadas join forces, making common cause against the dreaded Cylons? And what would success mean for the quest for Earth? New York Times bestselling author and comics writer JOHN JACKSON MILLER (Star Wars, Star Trek, Halo) Joins Dynamite for a miniseries timed for Battlestar Galactica's 40th anniversary year! The Phage War had been a devastating conflict for the Terran Confederacy. Even with the destruction of their terrifying, implacable foe, humanity is still reeling. Political alliances are crumbling and their mighty fleet is in tatters. There is nothing to celebrate, even after such a complete victory. They soon learn that there are other stellar neighbors ... and they've been watching the conflict with great interest. One species comes with an offer of friendship and alliance, but humanity is weary and distrustful, their only interactions with aliens having resulted in the near-eradication of their kind. Before the ashes of war have been fully swept away Captain Celesta Wright is dispatched to the Frontier with a small taskforce to investigate a mysterious signal while the Confederacy struggles to hold itself together. A partnership with this new species could help accelerate the recovery effort, but is the offer too good to be true? Can humanity risk another fight with an advanced alien species right on the heels of the bloodiest war that had ever been waged? New Frontiers is the first book of the Expansion Wars Trilogy, an all adventure in the Black Fleet universe. Japanese Zeros appear in the skies over Hawaii and descend upon Pearl Harbor in a devastating attack that cripples the U.S. Navy fleet and airfields. One after another, the islands are conquered and occupied by the Empire of the Sun. In the hands of a merciless enemy, American soldiers in POW camps suffer cruel punishment. Many older Hawaiians of Japanese origin support the invaders - while some of their children want to fight back. But the domination of the Pacific and the submission of those who live there is merely the beginning. With the U.S. military on Hawaii completely subjugated, there is no one to stop the Japanese from using the islands' resources to launch an offensive against America's western coast...

Jason Burke was a man hiding from himself in a small cabin high in the American Rocky Mountains when his simple, quiet life was shattered one night by what he first assumed was an aviation mishap. But when he investigates the crash, what he finds will yank him out of his self-imposed exile and thrust him into a world he could have never imagined. He suddenly finds himself trapped on a damaged alien spacecraft and plunged into a universe of interstellar crime lords and government conspiracies, along the way meeting strange new friends... and enemies. As he struggles to find his way back home he is inexorably drawn deeper into a world where one misstep could mean his death. Or worse. He desperately wants to get back to Earth, but it may be the end for him. ... or is it just the beginning?

From USA Today bestselling author Joshua Datzelle..... Captain Jason Burke is a man apart, and not just because he's the only of his kind for thousands of lightyears in any direction. The changes to his body and to his genetic code have made him faster, stronger, more able to survive in his dangerous occupation ... but they've also ensured that he'll never truly fit in with others of his species. He always assumed he would live and die with his crew and never lay eyes on another human again, so he was completely unprepared for the crisis that is brought to his doorstep. The mercenary captain learns through back channel information that Earth may be in danger and, worse, that he may have been a contributing factor. He now faces the choice of ignoring the problem and allowing his own species to fight their own battles, or returning to help and risk making the situation worse. Can he just sit idly by while his species faces such a dire threat?

Book #2 in the Manticore Ascendant series, set in David Weber's Honorverse. Lieutenant Travis Long of the Royal Manticoran Navy is the sort of person who likes an orderly universe. One where people follow the rules. Unfortunately, he lives in the real universe. The good news is that Travis is one of those rare people who may like rules but has a talent for thinking outside them when everything starts coming apart. That talent has stood him/and the Star Kingdom/ain good stead in the past, and it's one reason he's now a mustang.Ö an ex-enlisted man who's been given a commission as a King's officer. The bad news is that two of the best ways of making enemies ever invented are insisting on enforcing the rules ... and thinking outside them when other people don't. Travis learned that lesson the hard way as a young volunteer in basic training, and he knows that if he could just keep his head down, turn a blind eye to violations of the rules, and avoid stepping on senior officers' toes, he'd do just fine. But the one rule Travis Long absolutely can't break is the one that says an officer in the Royal Navy does his duty, whatever the consequences. At the moment, there are powerful forces in the young Star Kingdom of Manticore's Parliament which don't think they need him. For that matter, they're pretty sure they don't need the Royal Manticoran Navy, either. After all, what does a sleepy little single-system star nation on the outer edge of the explored galaxy need with a navy? Unhappy for them, the edge of the explored galaxy can be a far more dangerous place than they think it is. The powerful, sentient machine that had once gone by Lucky has suffered a psychotic break and is now a problem that Omega Force has to deal with. Jason wants to believe that he can still save Lucky, but the longer Seven remains, the more he has to admit that it might be better for everybody if he was just eliminated before he can hurt any more innocents. The real question is can they even do it? Many have gone up against Seven already. None were able to talk about it. The Omega Force crew is in for the fight of their lives against someone who knows everything about them. Every strength. Every weakness. Can Jason take down Seven without losing anyone else?

Over the past fifteen years, the People's Liberation Army Navy's (PLAN's) missile fast-attack craft and amphibious fleets have been significantly modernized. While these two types of vessels have not increased in numbers, their capabilities have increased exponentially. This publication examines the People's Liberation Army's (PLA's) doctrine and training strategy in order to analyze present and predict future missions by these military vessels. China's deterrence posture is improved greatly by these ships and boats, which aid coastal water defense, and threaten Taiwanese attempts to gain independence. In addition, these two fleets improve China's long-range sealift capabilities, and help with the PLA's traditional, and new, nontraditional security practices. These fleets allow the PLAN to continue offshore operations, and begin "blue-water", or "far-seas" operations, helping the United States to predict the future nature of Chinese maritime missions. On the horizon loomed the mightiest ships of the Japanese navy, a massive fleet that represented the last hope of a staggering empire. In the tradition of the #1 New York Times bestseller Flags of Our Fathers, James D. Marine First Lieutenant Jacob Brown is bored. For months he's been sitting around on an alien planet, waiting for command to recall his scout team so they could rest and be re-outfitted. The team went through hell during their previous mission, losing both their commanding officer and their ship. For now, Jacob was acting CO of Scout Team Obsidian and their ship was a broken down old surplus combat shuttle they'd stolen from narco-smugglers on a planet called Niceen-3. When command finally does reach out, however, it isn't to order Obsidian home for some much needed R&R. Instead, they are being reactivated and sent out into the contested space of the recently conquered Eshquanian Empire to track down a single Terran cruiser called the Eagle's Talon. The Talon's captain has gone rogue and is operating within a fleet of ships bent on open rebellion against the quadrant's only remaining superpower. If that ship is discovered within the rebel fleet, Earth will bear the brunt of the ConFed's reprisal. Jacob's team is in a race against time to locate the missing ship and her rogue captain so that a Navy strike force can swoop in and reclaim her... or destroy her.
