Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist

The Police and Criminal Evidence Act 1984 (PACE) was an innovative and controversial attempt to regulate the investigation of crime. Two decades on, it now operates in a very different context than in the mid-1980s. Whilst legal advice has become established as a basic right of those arrested and detained by the police, the police service has become increasingly professionalised but also increasingly driven by government objectives and targets. The Crown Prosecution Service, originally established to

separate prosecution from investigation, is now becoming involved in the investigative process with the power to make charge decisions. Although the basic structure of PACE has survived, almost continual revision and amendment has resulted in a markedly different creature than that which was originally enacted. In 2007 the government embarked on a further review of PACE, promising to 're-focus the investigation and evidence gathering processes [to deliver] 21st century policing powers to meet the demands of 21st century crime'. This collection

Proactive policing, as a strategic approach used by police agencies to prevent crime, is a relatively new phenomenon in the United States. It developed from a crisis in confidence in policing that began to emerge in the 1960s because of social unrest, rising crime rates, and growing skepticism regarding the effectiveness of standard approaches to policing. In response, beginning in

**the 1980s and 1990s,
innovative police
practices and policies
that took a more

to develop. This report
uses the term "proactive
policing" to refer to all

or on investigating or

once they have occurred.**

Proactive policing is distinguished from the everyday decisions of police officers to be proactive in specific situations and instead refers to a strategic decision by police agencies to use proactive police responses in a programmatic way to reduce crime. Today, proactive policing strategies are used widely in the United States. They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread

Criminal defence at the investigative stage has attracted growing attention due to the shifting focus of the criminal process onto pre-trial stages, and the recent European regulations adopted in this area. Increasingly, justice practitioners and legislators across the EU have begun to realise that 'the trial takes place at the police station'. This book provides a comprehensive legal, empirical and contextual analysis of criminal defence at the investigative stage from a comparative perspective. It is a socio-legal study of criminal defence practice, which draws upon original empirical material from England and Wales and the Netherlands. Based on extensive interviews with lawyers, and

extended periods of observation, the book contrasts the encountered reality of criminal defence with the model role of a lawyer at the investigative stage derived from European norms. It places the practice of criminal defence within the broader context of procedural traditions, contemporary criminal justice policies and lawyers' occupational cultures.

Criminal Defence at Police Stations questions the determinative role of procedural traditions in shaping criminal defence practice at the investigative stage.

The book will be of interest for criminal law and justice practitioners, as well as for academics focusing on criminal justice, criminology, socio-legal studies, legal psychology and human rights.
