In 2 Corinthians 12:1-10, Paul claims to have been snatched into paradise but then tells how he received a thorn in the flesh. Many recent scholars contend that Paul belittles ecstatic experiences such as the ascent to paradise. This monograph places 2 Corinthians 12:1-10 in the contexts of ancient ascent traditions as well as other accounts of extraordinary religious experience in Paul's letters, and it engages premodern interpretation of the ascent. This study argues that for Paul, extraordinary experiences such as the ascent enable self-transcending love for God and neighbors."

A New Reading of the Animal Apocalypse of 1 Enoch is the most comprehensive theological commentary on this important second-century BCE Jewish apocalypse to date, laying out the purpose and methodology of this Enochic allegory and using this as the basis for a new commentary on the whole text, presented here in a fresh translation. Against other interpretations that focus on Israel and its institution, Daniel Olson argues that the promise of universal blessing in the Abrahamic covenant is presented in the Animal Apocalypse as the governing dynamic in a sacred history that begins and ends with humanity in general. The authentic Jacob/Israel will appear in the end times and be the catalyst of universal salvation. Book jacket.

Covering a wide array of sources from ancient Mesopotamia to the Dead Sea Scrolls, the present volume offers an innovative perspective on Jewish apocalyptic

time-reckoning during the Second Temple period, based on a unique calendar year of 364 days.

BACK COVER The sequel to the Jaredite's Civilization (What the Prophet Ether couldn't Tell Us) is finally out. Book III to shortly follow. Book II tells of the life and times of the Jaredites, the greatest civilization to have ever lived on Planet Earth. It details their earliest beginnings, and enumerates some of their many achievements and accomplishments. It is first mentioned within the Book of Mormon, in Ether 1:42-44. Ether was later directed by God to remove everything about them save for their earliest beginnings at the Tower of Babel, in Iraq, and a few brief tales of their spiritual trials and wars, up to their final Civil War.

Mainstream Archaeology refuses to address this civilization because it would reveal Archaeology's canards about evolution and their false narrative about the Origin of Man. The Jaredites settled and colonized South and North America, Lemuria, Antarctica, The British Isles and most of western Europe, plus the lands of China and India. For nearly 2,530-years, they maintained a world-wide civilization. My research has uncovered many details of Jaredite life and their physical characteristics that the prophet Ether was not allowed to tell us. They built all of Egypt. Their Hindu colony fought at least two internal nuclear wars. They colonized throughout our entire Solar System; most moons and all the planets have their cities, mainly covered by 7-mile high glass domes, except Jupiter and Saturn. These two planets each have possible Star War-size "moons" that could be artificial space stations. Mars used to be a moon to its now exploded primary, which is now the Asteroid Belt. Their Martian cities are so immense that New York City and Shanghai combined wouldn't be considered a nickel in a handful of change in comparison to them. Jaredite leftovers are all over Earth if one knows when to look for them. Book III details a few of their many wars, as well as their final Civil War, the first year or two which were nuclear. Through their longevity, they were able to develop their physics to the point to where they could control the weather, as well as to weaponize its component parts. And their final, long prophesied death.

Serendipitously, at around the same time as Boccaccio published his famous Decameron (1350), the Swiss-German Dominican Ulrich Bonerius published his highly popular collection of fables, The Gemstone. Both authors pursued very similar goals, instructing their audiences about vices and virtues, Boccaccio by telling entertaining, often erotic tales, Bonerius by relating didactic tales, mostly based on animals as the active characters. This book provides the first English translation of all one hundred fables authored by Bonerius. Bonerius drew mostly from the classical Aesopian tradition, and his Gemstone in turn became the crucial source for vast fable collections in the late Middle Ages, and again in the eighteenth and nineteenth centuries. In fact, the famous Grimm brothers included some of his narratives in their fairy tale collection of The Gemstone 1812. Not only was Bonerius an excellent poet, he also understood the depth of human nature exceedingly well, warning about many of people's shortcomings and failures.

The volume is a commentary on 1 Enoch chapters 91–108 that begins with the Ethiopic text tradition but also takes the Greek and Aramaic (Dead Sea Scrolls) evidence into account. This section of 1 Enoch, most of which contains material from documents composed during the 2nd century BCE, provides a window into the early stages of the reception of the earliest Enoch tradition as it was being negotiated in relation to elitist religious opponents and in relation to other Jewish traditions that were flourishing at the time.

This volume inaugurates the publication of the biblical Dead Sea Scrolls from the main collection discovered in Cave 4 at Qumran. It contains ten biblical manuscripts from Genesis to Deuteronomy and Job. Six are written in the ancient Palaeo-Hebrew script and four are in Greek. There are also five hitherto unknown compositions. The Hebrew texts antedate by a millennium what had previously been the earliest surviving biblical codices in the original language, and they document the pluriform nature of the ancient biblical textual tradition before the text became standardized. The most extensive and significant manuscript, 4QpaleoExodm, exhibits the expanded textual tradition that formed the basis for the Samaritan Pentateuch and illumines the historical and theological relationship between the Jews and the Samaritans. Fragments of an unidentified Greek text mention Moses, Pharaoh, and Egypt, suggesting some development of the Exodus theme, and further witnessing to the rich religious literature to which Rabbinic Judaism and nascent Christianity were heirs. An index of all the biblical manuscripts from Qumran Cave 4 and their distribution in other Discoveries in the Judaean Desert volumes is provided, and there are also forty pages of plates from the manuscripts.

English Psalms in the Middle Ages, 1300-1450 explores vernacular translation, adaptation, and paraphrase of the biblical psalms. Focussing on a wide and varied body of texts, it examines translations of the complete psalter as well as renditions of individual psalms and groups of psalms. Exploring who translated the psalms, and how and why they were translated, it also considers who read these texts and how and why they were read. Annie Sutherland foregrounds the centrality of the voice of David in the devotional landscape of the period, suggesting that the psalmist offered the prayerful, penitent Christian a uniquely articulate and emotive model of utterance before God. Examining the evidence of contemporary wills and testaments as well as manuscripts containing the translations, she highlights the popularity of the psalms among lay and religious readers, considering how, when, and by whom the translated psalms were used as well as thinking about who translated them and how and why they were translated. In investigating these and other areas, **English Psalms in the Middle Ages, 1300-1450** raises questions about interactions between Latinity and vernacularity in the late Middle Ages and situates the translated psalms in a literary and theoretical context.

Distinguished in the field of Enochic studies, Gabriele Boccaccini led the way in June 2005 at the Third Enoch Seminar, entirely devoted to the Book of Parables in light of Second Temple Judaism and Christian origins. The unusual and compelling collection of essays found here reflects the spirit of sharing and dialogue that has made these seminars so popular and intriguing to scholars throughout the world. This third collection of essays from these historic meetings contains the observations and contemplations of forty-four scholars, includes a helpful introduction by Boccaccini detailing the history of the movement, and ends with likely prospects for future research and an extensive bibliography compiled by associate editor Jason von Ehrenkrook for further study. Enoch and the Messiah Son of Man will be a significant contribution for the understanding and discussion of ancient Judaism.
