The newest collection of jaw-dropping feats from around the world. Ever since the first Guinness World Records was first published in 1955, people have been searching for new ways to push the boundaries of achievement. This new edition of fabulous feats includes profiles of people who set new standards for highest, fastest, largest, or oldest; natural wonders that will cause readers to gape in amazement; and mechanical marvels that make the inventions of yesteryear look like child's play.

The Guinness World Records Gamer's Edition 2019 is the global authority on all things videogames. The 12th edition of the world's best-selling videogames annual is bursting with amazing records, remarkable feats and marvellous achievements by gamers just like you, who have been inspired by the games they love to play. You'll be able to discover who the best FIFA 18 player in the world is, the size of the biggest monster in Monster Hunter: World (clue: it's really, really big), which Overwatch player has healed more players than any other and find out which eSports pro won more than \$2.4 million in 2017 alone! We'll also introduce you to some of the most amazing gamers on the planet. From Nathaniel "Nathie" de Jong, the world's most popular VR-dedicated YouTuber, to Ray "Stallion83" Cox who has the world's highest Xbox Gamerscore. And that's not forgetting Joseph Garrett, Stampy Cat himself, who holds one of Minecraft's strangest records ever - let's just say cake is involved... Stampy Cat has also provided a special guest intro that you'll only find in Gamer's Edition 2019. Talk of Stampy Cat brings us speedily to our World Builders special chapter - a well-constructed celebration of the games that let us build, including Minecraft, LEGO® Worlds, Roblox, Terraria and more. You'll have the chance to don your hard hat, too, by taking part in our Reader Challenges that could put your name in lights in next year's Gamer's Edition. So, whether you want to know what the fastest time to complete Dark Souls is (while upside down), see the planet's biggest Game & Watch or find out which nation is the best at Pokémon, you've come to the right place!

*The next frontier in technology is inside our own bodies. Synthetic biology will revolutionize how we define family, how we identify disease and treat aging, where we make our homes, and how we nourish ourselves. This fast-growing field—which uses computers to modify or rewrite genetic code—has created revolutionary, groundbreaking solutions such as the mRNA COVID vaccines, IVF, and lab-grown hamburger that tastes like the real thing. It gives us options to deal with existential threats: climate change, food insecurity, and access to fuel. But there are significant risks. Who should decide how to engineer living organisms? Whether engineered organisms should be planted, farmed, and released into the wild? Should there be limits to human enhancements? What cyber-biological risks are looming? Could a future biological war, using engineered organisms, cause a mass extinction event? Amy Webb and Andrew Hessel's riveting examination of synthetic biology and the bioeconomy provide the background for thinking through the upcoming risks and moral dilemmas posed by redesigning life, as well as the vast opportunities waiting for us on the horizon.*
