

Journal: Baby Hippos (Blue) 6x9 LINED JOURNAL Journal With Lined Pages (Diary, Notebook) (Baby Animals Lined Journal Series)

In the present monograph, we offer current insights into polymyalgia rheumatica and giant cell arthritis. Both diseases are typical for advanced age, and their incidences increase with aging. Both diseases are a center point of interest not only for rheumatologists, gerontologists, ophthalmologists or neurologists, but also for general practitioners. Early diagnosis and rapid treatment, mainly with glucocorticoids can save one of the most precious senses-vision. Damage to other organs (heart, aorta, coronary arteries, liver, lungs, kidneys), which are supplied by the arteries affected by ischemic syndrome in the setting of giant cell arthritis, has serious consequences as well. Late diagnosis of giant cell arthritis can have fatal consequences for affected patients. It is a matter of fact that the human population is aging. Therefore, more attention has to be paid not only to diagnosis, clinical course and treatment of rheumatic diseases in elderly, but also to their genetic, immunologic, endocrinologic, chronobiologic mechanisms, and state-of-the-art diagnostic modalities. I am convinced that the interdisciplinary research of the diseases will allow us to diagnose and treat the rheumatic diseases even faster and more effectively in the future.

"Our understanding of how the human brain performs mathematical calculations is far from complete. In *The Number Sense*, Stanislas Dehaene offers readers an enlightening exploration of the mathematical mind. Using research showing that human infants have a rudimentary number sense, Dehaene suggests that this sense is as basic as our perception of color, and that it is wired into the brain. But how then did we leap from this basic number ability to trigonometry, calculus, and beyond? Dehaene shows that it was the invention of symbolic systems of numerals that started us on the climb to higher mathematics. Tracing the history of numbers, we learn that in early times, people indicated numbers by pointing to part of their bodies, and how Roman numerals were replaced by modern numbers. On the way, we also discover many fascinating facts: for example, because Chinese names for numbers are short, Chinese people can remember up to nine or ten digits at a time, while English-speaking people can only remember seven. A fascinating look at the crossroads where numbers and neurons intersect, *The Number Sense* offers an intriguing tour of how the structure of the brain shapes our mathematical abilities, and how math can open up a window on the human mind"--Provided by publisher.

A hilariously informative field guide to the deadliest animals on Earth from "AnimalTok" star @mndiaye_97 Ever wondered what signs might tip you off that a moose is about to subtract you? Curious about why you should be terrified of cassowaries? Questioning whether that baby hippo is really that cute or actually a homicidal maniac in the making? Yea, so was Mamadou Ndiaye... and now he's got your answers. Discover the ultimate countdown to death by animal, according to Ndiaye's hot takes on which deadly creature presents the worst way to die. Covering everything from animals that look terrifying but could actually cuddle you, to survival tips while facing the largest to smallest of deadly species - even if that tip is just to make peace with your higher power - 100 Animals is your authoritative guide to: Spotted hyena Black rhinoceros Nile crocodile Blue ring octopus Stonefish Cone snail Fugu blowfish Slow loris Pitohui (poisonous birds) Marabou stork Anteater Electric eel Canadian geese Mute swan Assassin bug And more. A perfect gift for the animal lover in your life, this dynamic, fact-filled book is perfect for backpacks and stockings, essential reading for armchair and real-world adventurers prepping to face off with creatures that go bump, scream, honk, screech, bark or crawl in the night - or day.

With unforgettable characters and exotic wildlife, The Elephant Whisperer is an enthralling book that will appeal to animal lovers and adventurous souls everywhere. When South African conservationist Lawrence Anthony was asked to accept a herd of 'rogue' elephants on his Thula Thula game reserve in Zululand, his common sense told him to refuse. But he was the herd's last chance of survival - dangerous and unpredictable, they would be killed if Anthony wouldn't take them in. As Anthony risked his life to create a bond with the troubled elephants and persuade them to stay on his reserve, he came to realize what a special family they were, from the wise matriarch Nana, who guided the herd, to her warrior sister Frankie, always ready to see off any threat, and their children who fought so hard to survive.

Polymyalgia Rheumatica (PMR) and Giant Cell Arteritis (GCA) are linked rheumatic inflammatory illnesses that affect older people - generally, people over 50. They are chronic autoimmune conditions that cause untold misery, pain and debilitation. More acutely, undiagnosed GCA can lead to blindness, which is irreversible. In the United Kingdom each year, there are an estimated 40,000 new cases of PMR and 10,000 new cases of GCA, with a significant degree of overlap, many people having both conditions together. Many people, when they first get their diagnosis, have never heard of PMR or GCA before, and have to get used to the idea of having a chronic inflammatory illness, together with the steroid therapy that is the only standard effective treatment widely available. Several months into their diagnosis they often have many questions about why their journey through PMR and GCA isn't as smooth as they were led to expect. This book is written to give people who have Polymyalgia Rheumatica, or Giant Cell Arteritis (sometimes known as temporal arteritis), and their friends and carers, information about these illnesses, drawing on recent research. It also aims to give insights into what it is like to have these conditions, and how sufferers and those close to them can help themselves in the self-management of their condition towards recovery. It is not intended to replace information provided by your doctor or clinician. This second edition incorporates recommendations by international working groups on the diagnosis and management of PMR and GCA, and findings from research published since 2014. A full references list and index have been added. The author, Dr Kate Gilbert, PhD, is a semi-retired lecturer in management development, now concentrating on writing and voluntary work. She has spent several years, as a PMR survivor, studying these conditions and working as a volunteer with the PMR and GCA charity, PMRGCAuk. A former Chair of Trustees, she helps to edit the charity's website www.pmr-gcauk.com and its regular newsletter. She has also served as a patient representative on a number of working groups, including the ACR/EULAR group to develop international

recommendations for PMR, and has recently contributed a chapter on patient education to a medical textbook on PMR and GCA published by Oxford University Press.

Oh, baby! Leslie Patricelli's one-haired wonder returns to share the love. The amazing, true story of Fiona, a baby hippo born prematurely at the Cincinnati Zoo, the team of scientists and caregivers who nursed her to health, and the vast community in Cincinnati and beyond who rallied around her. Includes full-color behind-the-scenes photographs throughout. On a cold January day in 2017, nearly two months before due date, Nile hippopotamus Bibi gave her keepers at the Cincinnati Zoo & Botanical Garden a big (little) surprise—a tiny newborn hippo, no bigger than a football. The first premature hippo born and raised in captivity, baby Fiona was an underdog from the start: she couldn't nurse, she couldn't stay hydrated, and she wasn't thriving. But the staff at the zoo knew they could save her. It would take creative thinking and teamwork. They would have to study the makeup of hippo milk for the first time ever and reach out to medical colleagues, including a team at the local Children's Hospital with superior vein-finding skills, to ensure that Fiona would begin to gain weight and become healthy. When Fiona began to thrive, her star began to rise, and soon she became an internet sensation, her picture and videos garnering thousands and thousands of likes and fans on Instagram and Facebook. Now a Fiona appearance at the Zoo mimics a Beatles concert. What made this little, now big, hippo such a big hit with people all over the world? And what's in store for her and her family in the future?

A “delightful” (Vanity Fair) collection from the longest-running, most influential book review in America, featuring its best, funniest, strangest, and most memorable coverage over the past 125 years. Since its first issue on October 10, 1896, The New York Times Book Review has brought the world of ideas to the reading public. It is the publication where authors have been made, and where readers first encountered the classics that have enriched their lives. Now the editors have curated the Book Review's dynamic 125-year history, which is essentially the story of modern American letters. Brimming with remarkable reportage and

photography, this beautiful book collects interesting reviews, never-before-heard anecdotes about famous writers, and spicy letter exchanges. Here are the first takes on novels we now consider masterpieces, including a long-forgotten pan of Anne of Green Gables and a rave of Mrs. Dalloway, along with reviews and essays by Langston Hughes, Eudora Welty, James Baldwin, Nora Ephron, and more. With scores of stunning vintage photographs, many of them sourced from the Times ' s own archive, readers will discover how literary tastes have shifted through the years—and how the Book Review ' s coverage has shaped so much of what we read today.

The vision behind the creation of the new horror classic *A Quiet Place* and its sequel, *A Quiet Place Part II*, as told by the film's co-writer, director, and star John Krasinski. John Krasinski reveals the making of the shocking, near-silent film *A Quiet Place*, with dramatic behind-the-scenes photographs and running commentary about the journey to the silver screen. *A Quiet Place* portrays the struggle of the Abbott family to survive as the parents (Krasinski and Emily Blunt) raise their children in utter silence so as to not attract the alien evil that lurks in the surrounding forest. Released by Paramount Pictures, the film became a major box-office success and received critical acclaim for its atmosphere, direction, acting, and sound design. Also included are never-before-seen photographs and Krasinski's director's take on the much-anticipated sequel, *A Quiet Place Part II*, to be released May 2021. With a foreword by co-

star Emily Blunt and contributions from co-stars and production teams, this volume will be a valuable, insightful companion to both films for fans and film buffs.

'The most magical book about the African bush since Born Free' – Daily Mail 'A beautiful love story between humans and the majestic elephants' – Jo Malone, Daily Express Françoise Malby-Anthony never expected to find herself responsible for a herd of elephants with a troubled past. A chic Parisienne, her life changed forever when she fell in love with South African conservationist Lawrence Anthony. Together they founded a game reserve but after Lawrence's death, Françoise faced the daunting responsibility of running Thula Thula without him. Poachers attacked their rhinos, their security team wouldn't take orders from a woman and the authorities were threatening to cull their beloved elephant family. On top of that, the herd's feisty new matriarch Frankie didn't like her. In this heart-warming and moving book, Françoise describes how she fought to protect the herd and to make her dream of building a wildlife rescue centre a reality. She found herself caring for a lost baby elephant who turned up at her house, and offering refuge to traumatized orphaned rhinos, and a hippo called Charlie who was scared of water. As she learned to trust herself, she discovered she'd had Frankie wrong all along . . . Filled with extraordinary animals and the humans who dedicate their lives to saving them, An Elephant in My Kitchen by Françoise Malby-Anthony is a captivating and gripping read.

A Scientific American Best Science Book of 2012 An Atlantic Wire Best Book of 2012 A New York Times Book Review "Editor's Choice" The "fascinating" (The New Yorker) story of Athanasius Kircher, the eccentric scholar-inventor who was either a great genius or a crackpot . . . or a bit of both. The interests of Athanasius Kircher, the legendary seventeenth-century priest-scientist, knew no bounds. From optics to music to magnetism to medicine, he offered up inventions and theories for everything, and they made him famous across Europe. His celebrated museum in Rome featured magic lanterns, speaking statues, the tail of a mermaid, and a brick from the Tower of Babel. Holy Roman Emperors were his patrons, popes were his friends, and in his spare time he collaborated with the Baroque master Bernini. But Kircher lived during an era of radical transformation, in which the old approach to knowledge—what he called the "art of knowing"—was giving way to the scientific method and modern thought.
