Returning home for her father's wedding was never going to be easy for Adele. If being sent away at eighteen hadn't been bad enough, the mess she left behind when she made a pass at her dad's business partner sure was. Fifteen years older than her, Pete had been her crush for as long as she could remember. But she'd misread the situation—confusing friendliness for undying love. Awkward. Add her father to the misunderstanding, and Pete was left with a broken nose and a business on the edge of ruin. The man had to be just as glad as everyone else when she left town. Seven years later, things are different. Adele is no longer a kid, but a fully grown adult more than capable of getting through the wedding and being polite. But all it takes is seeing him again to bring back those old feelings. Sometimes first loves are the truest. to claim my birth right is prove that I'm the most powerful supernatural in the whole of Solaria. And sure, technically that's true as I'm the daughter of the Savage King. But the bit they didn't put in the brochure was that every single Fae in this Kingdom would claim my throne if they could. The school they've sent me to is both dangerous as sh*t and one helluva party. Vampires bite weaker students in the corridors, the Werewolf pack has orgies in the Wailing Wood at every full moon and don't even get me started on the dark and twisted ways the Sirens use their powers on people's emotions, or how my sinfully tempting Cardinal Magic teacher hosts detentions that leave people needing therapy. Classes are totally interesting if you manage to live through them. And that Gemini star sign I mentioned? It now determines my elemental magic and affects my destiny, so learning astrology is essential if I'm going to beat down my classmates - which is actively encouraged by the way. My biggest problem is the drool worthy Dragon shifter who has his eyes on my throne. He and his three psycho friends are determined to make my time here hell. All I've got to do is survive. But fate might have other ideas. Dammit, why couldn't I have gotten a letter to Hogwarts?

A Zentangle Collection of Reticula and Fragments

An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In Economic Science Fictions, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses, merging social science with fiction, design with politics, scholarship with experimental forms. With an opening chapter from Ha-Joon Chang as well as theory, short stories, and reflections on design, this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart. The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists. secrets are meant to be found. If Indiana Jones lived in the X-Files era, he might bear at least a passing resemblance to Nolan Moore -- a rogue archaeologist hosting a documentary series derisively dismissed by the "real" experts, but beloved of conspiracy theorists. Nolan sets out to retrace the steps of an explorer from 1909 who claimed to have discovered a mysterious cavern high up in the ancient rock of the Grand Canyon. And, for once, he may have actually found what he seeks. Then the trip takes a nasty turn, and the cave begins turning against them in mysterious ways. Nolan's story becomes one of survival against seemingly impossible odds. The only way out is to answer a series of intriguing questions: What is this strange cave? How has it remained hidden for so long? And what secret does it conceal that made its last visitors attempt to seal it forever? From the New York Times bestselling author of *How to Read Literature Like a Professor* comes an indispensable analysis of our most celebrated medium, film. No art form is as instantly and continuously gratifying as film. When the house lights go down and the lion roars, we settle in to be shocked, frightened, elated, moved, and thrilled. We expect magic. While we ' re being exhilarated and terrified, our minds are also processing data of all sorts—visual, linguistic, auditory, spatial—to collaborate in the construction of meaning. Thomas C. Foster ' s *Reading the Silver Screen* will show movie buffs, students of film, and even aspiring screenwriters and directors how to transition from merely being viewers to becoming accomplished readers of this

great medium. Beginning with the grammar of film, Foster demonstrates how every art form has a grammar, a set of practices and if-then propositions that amount to rules. He goes on to explain how the language of film enables movies to communicate the purpose behind their stories and the messages they are striving to convey to audiences by following and occasionally breaking these rules. Using the investigative approach readers love in *How to Read Literature Like a Professor*, Foster examines this grammar of film through various classic and current movies both foreign and domestic, with special recourse to the “AFI 100 Years-100 Movies” lists. The categories are idiosyncratic yet revealing. In *Reading the Silver Screen*, readers will gain the expertise and confidence to glean all they can from the movies they love.

But what will he do when he realises that these differences are actually part of the pull to one another? Will falling in love be enough to make him stop moving at last and realise that he's finally home? From bestselling author, Lily Morton, comes a romantic comedy about two very different men and one very dilapidated house. This is the first book in the Finding Home series but it can be read as a standalone.

Sanora Babb 's long-hidden novel *Whose Names Are Unknown* tells of the High Plains farmers who fled drought and dust storms during the Great Depression. Editor Bennett Cerf planned to publish this " exceptionally fine " novel but when John Steinbeck ' s *The Grapes of Wrath* swept the nation, Cerf explained that the market could not support two books on the subject.

Befriended by a band of young witches, Archibald Finch must quickly adapt to survive in Lemurea, where a battle born in the Middle Ages is still unfolding . . . Archibald is a risk-averse boy with quirks that earn him plenty of eye-rolls, especially from his older sister, Hailee. Things get worse when his parents move the family from London to his grandmother's creepy manor in the English countryside. Now he has to deal with hairless dolls in the library, weird stone creatures on the roof, and a spooky forest at the edge of the backyard. But these turn out to be the least of Archibald's problems . . . One day, as he's exploring the cavernous house, he finds a curious globe that whisks him away to a secret world, hidden for 500 years. Archibald finds himself on a thrilling adventure full of medieval magic, mysterious symbols, and the strangest beasts, while Hailee—who witnessed her brother's disappearance—embarks on a daring quest to find him.

Infamy is no accident. It is a poison in our blood. It is the price of being a Borgia. Glamorous and predatory, the Borgias became Italy's most ruthless and powerful family, electrifying and terrorizing their 15th-century Renaissance world. To this day, Lucrezia Borgia, the Pope's beautiful daughter, is known as one of history's most notorious villainesses, accused of incest and luring men to doom with her arsenal of poison. Was she the heartless seductress of legend? Or was she an unsuspecting pawn in a familial web, forced to choose between loyalty and her own survival? From her pampered childhood in the palaces of Rome to her ill-fated, scandalous marriages and complex relationship with her adored father and her brothers, this is the dramatic, untold story of a papal princess whose courage led her to overcome the fate imposed on her by her Borgia blood.

A Collection of True Tales of Animal Empathy and Altruism that will Inspire Us to Reflect on Our Own Human Nature What do stories about humpback whales protecting a biologist from a shark, a pride of lions rescuing a girl from kidnappers, gorillas working together to dismantle poacher snares, a parrot warding off an attacker in a park, a chimpanzee consoling a human, and an elephant trying to rescue a baby rhino tell us about animal nature? And what might they suggest about our very own human nature? Until just a few decades ago, there were only a few animals reported to behave empathetically and altruistically. More recently, the list of species who have been observed behaving in compassionate, helpful, and caring ways has grown exponentially, ranging from rats to elephants. Rescued by

a Whale presents dozens of astonishing and heart-warming stories about animals, such as chickens, horses, dolphins, and wolves, who engage in acts of helpful kindness. During a time in history when studies show that human empathy is decreasing, our knowledge about animal empathy is increasing. These true tales of heroism, kindness, and compassion suggest that we have far more in common with other animals than we once believed and provocatively suggest that what's best about our human natures just might be our animal natures.
