Managers are faced with complex tasks all the time. Completing these tasks may require setting up and running a project or on other occasions it may need a short, structured action plan. A huge amount of approaches exist, in thousands of books, to help managers complete tasks. Occasionally, a manager has the time to go off and read a text on a topic like how to manage a project, but often they have an immediate requirement

Usually, all that is needed is a simple list of steps, a checklist that the manager can read to kick start them into action. The core contents of this book; will follow a standard project management process - starting in initial concept identification, and going through to complete implementation. At each stage there are tasks and problems that face project managers, and for each identified task or problem there will be a checklist. Unlike normal project management texts, which are written to be read end-to-end, this book

It is specifically aimed at readers who are studying for the Foundation qualification and want to get the most out of their study time. Although anything in this book can appear on the examination, certain parts of the method show up repeatedly, so at the end of the chapter you will find a list of the concepts you should review more intensively, along with study tips and tricks.
