The Best Music Resources Online: The Musician's Directory to the Web (Updated!) MUSIC RESOURCES ONLINE is a collection of the best websites online for entrepreneurial musicians. If you're trying to leverage Web 3.0 to promote and sell your music, connect with fans, teach online, write books, sell merchandise, and just make a living as a musician, then this is for you. Collected here is THE list of the most amazing sites, tools, and -- in some cases -- largely untapped resources that can change your career as a musician forever. I put this together because musicians need a simple way to leverage the web effectively. This book is the resource guide every 21st-century musician, singer, songwriter, composer, recording engineer, and lyricist needs. It contains links, descriptions, ideas, case studies, and strategies to hundreds of amazing and useful websites all across the web that will help you do more with your music. These are the TOP music-related sites that everyone should know about -- and this list has been compiled through countless hours of research and from first-hand use of many of these resources. --Do you know where to sell your digital recordings online, including cover songs? -Do you know where to start a blog to promote your music? -Do you know how to monetize your blog or musician website? -Do you know where to register your music for worldwide broadcast royalties? -Do you know where to crowd-fund your next music project or recording? -Do you know where to teach online where millions of students can find your course materials? -Do you know where to publish a music ebook, paperback, or audiobook online? How to Use This Book This book is designed to be very useful from the first time you use it. You can browse through the listings in alphabetical order, or feel free to skip around, but the real power comes from visiting some of the sites listed here. For cross-referencing purposes, I also listed some music topics with specific suggestions on which entries to read. (You can also use your e-reader's search function to find others.) I tried to give you an extensive list of resources, but it can never be complete in this format. I have added many sites that I use often, but inclusion in this book should not be considered an endorsement. Please make sure to do your research and due diligence before signing up with any of the sites listed in this book. For those who don't know the names of many of these music-related websites and resources, alphabetical listings don't help. So feel free to start with the 'Category List' chapter if you have a specific interest. That's where some similar, related sites are listed together so that you can find targeted sources to begin your online explorations. And for those musicians looking for an actual ACTION PLAN, I decided to include a few hypothetical "Case Studies" at the end of the A-Z Resource List. I wanted to give you an idea how various readers and musicians might approach these various sites and tools and put some of this new information and knowledge into immediate use. Directory of web resources for music sales, distribution, music business, performing rights, writer royalties, music production, teaching music online, PR, crowdfunding, music marketing, independent publishing, professional development, e-commerce, networking, social media, and more for all musicians, vocalists, composers, lyricists, and songwriters.

This hands-on volume gives young adults practical guidance to turn their dream of being in a band into a reality. Specific steps from what songs to play to touring are clearly described. Aspiring musicians learn every aspect of the process: where to look for band members, advertising, working as a unit, keeping costs down, playing gigs, recording demos, making a press kit, building an online presence, creating a Web site, getting on the radio, obtaining a manager, selling CDs, getting signed by a record company, and publishing music.

How do you avoid being ripped off by unscrupulous promoters, or what to do if you really, really want to punch your bass player? That's where this Cut the Crap Guide comes in. Based on real musicians' experiences, it is designed to cover the things you really need to know: how to get gigs, how to get on the radio, how to make money from music, and how to avoid playing in front of three drunks and a murderer on a damp Tuesday in Dunfermline.

My Music Served is a musician's guide to using the Internet for fame and fortune. This is a how to guide with practical, proven steps to gaining fans and increasing incoming revenue written with the musician in mind.

Multi-platinum music producer and author of Gotta Get Signed How To Become A Hip Hop Producer, Sahpreem A. King is back with his long awaited follow up, Surviving The Game How To Succeed In The Music Business. In this book, Sahpreem takes music business newcomers by the hand and teaches them how to succeed in the music business the do-it-yourself way. In addition, Sahpreem talks about music publishing, marketing and promotion, starting an online record label, the power of social media, and making money from your music without being signed to a record deal. Music is a business. That's what this book is all about. For a whole host of justifiable reasons, there have been numerous other books that have been published about the "talent side" of the music industry. What distinguishes this book is the author's firsthand experience in the industry from both the talent side and the business side. Artists from all genres of music, managers, producers, A&R directors, entertainment lawyers, PR consultants, label executives, and the public at large will benefit immeasurably from reading and studying King's advice and good counsel. Sahpreem King's practical approach on how to get into the music business, and how to do well as a result of your passion for the art form and your willingness to grind and work hard every day, is informed by his years of experience, first as a DJ and recording artist, and then as a successful producer. The book is more than an industry insider's view. Sahpreem tells you what to do and what not to do, from imparting to you his basic knowledge about music to the deeper wisdom that he has acquired over the last twenty years. I originally wrote The Music Industry Self Help Guide because it seems that regardless of genre or region, every musician goes through identical stages of development and needs access to the same tools and information to get ahead in this industry. Over the last three decades I have continued to see a reoccurring disparity with different musicians that don't know where to look—and don't know what to look for—which keeps them isolated with no real hope of success. I've encountered this not only in local developing music scenes but also while formally mentoring aspiring artists at music conferences across the country. In writing the original manuscript, my experience and accumulated knowledge base placed me in a unique position to provide you with information from the point of view of an artist, a manager, and also from that of a record label. It was important in the creation of this book that all of these perspectives were taken into consideration, as they vary so greatly in how they interpret what is actually required to succeed in today's market. I also would like to stress the fact that the views in this book are not merely comprised of one person's observations of the music industry, but includes tried and true methods of success that have been implemented by bands that have maintained relevance for more than three decades. This resulted in a well-rounded, all-encompassing guide to creating momentum and visibility for emerging artists that covered all of the developmental elements that they would need to lay a solid foundation for themselves in the independent market. Although multiple books and publications have been written on some of the various subjects contained herein that have a cold encyclopedic reference style of providing information, what I did in writing The Music Industry Self Help Guide was approach as many of these topics as possible, link them all together, and present them on more of a personal and direct level. What resulted was a brutally honest and thought-provoking guidebook written in a conversational manner that can give your career a serious head start and help you move forward if you choose to implement its information. The first edition provided a very solid framework for this expanded edition which has additional chapters, resources, lists, and a step by step guide on how to fill out an online copyright form. This entire book was also re-tooled from the 1st Edition to provide quick and easy reference points for easy navigation. What you now have in your hands is a book that was designed with your success in mind and has been refined into a better product for your added benefit. Although this book encompasses the entire spectrum of the music industry from the earliest stages of a developing artist's career to the corporate wranglings of the music industry giants, I chose to focus primarily on the independent market, because this is the place that you must pass through while earning your stripes and paying your dues in this industry. As the title implies, this is a self help guide, so what this book also does to prepare you for success is look at one of the largest hurdles that aspiring musicians face as they try to move forward in their career: themselves. No other key component in this book will surpass the importance of one's ability to master oneself, and this book will callously press you to take an unflinching look inside yourself to understand who you really are and attempt to identify what is holding you back. How far you get beyond the independent market will not only rely on the quality of the music you release, but will also hinge largely on how you utilize the things that you read in this book. Approx 400 pages - 34 chapters - 50+ color photos and several resources.
