With no fewer than 40 sets of almost identical pictures, this 'Spot The Difference' book provides hours of fun for kids of all ages. It is however best suited to kids over the age of 6. Each set of pictures contains 10 differences, and finding them helps your child to develop a range of skills including observation, attention and concentration, as well as providing an excellent way to improve the memory. On the first page for each set of puzzles the two pictures will be shown, one on top of the other. Look carefully at both pictures and mark the differences by adding a light pencil ring to the lower picture to show where each of the 10 differences appears. Once you have found all 10 differences, turn over the page and check your answers. By carefully marking the differences lightly and in pencil, you can erase your rings when you are finished, so that someone else can try the puzzle. You can also of course come back and complete the book yourself again at a later date. The pictures in this book are in black and white, and the differences between the pictures in each set are not dependent on color. However, if you would like to try these puzzles in full color, then why not pick up the Kindle edition of the book. As long as you have purchased this print version of the book through Amazon.com, you can buy the Kindle version for FREE
