Step Up is a transformative journey that provides women with the necessary tools to become powerful leaders. It is an 'inner journey' to reveal commonly held beliefs that women have of themselves and others, as well as patterns of behaviour and choices that form the lens through which they see the world. Being aware of this allows them to look at the world differently and make impactful changes in their professional lives.Borrowing from the well-known frameworks of Generative Leadership (GL) and Transactional Analysis (TA), the book provides an inside-out approach advocating potent practices that can create effective leadership.

Competition, technology, the economy, and the increasing pace of business are creating unprecedented pressure on business leaders to quickly implement new business plans, with little room for contingencies or failure. In Accelerating Business, a seasoned executive provides tips and recommendations to help companies successfully step up business plan implementation and business change, all while avoiding common pitfalls. Michael Taylor is a member of the Marketing Management Faculty at the Richard Ivey School of Business at the University of Western Ontario, in London, Ontario, Canada, and his past experience includes advising senior executives and extensively studying change management. He combines this core knowledge with his own research, observations, and practical experience in order to share a structured approach the Accelerated Implementation Model (AIM) that will help companies stay ahead of the competition without sacrificing success. Business leaders will learn how to set realistic and achievable objectives, manage risks, empower a culture of change, recognize acceptance and rejection behavior, and attentively manage the implementation. Managing change can be a complicated endeavor. The expert guidance offered in Accelerating Business provides a strong foundation that will give every organization the advantage it needs in today's competitive business world.

This paper, STEP 3, is the third of three background papers produced to inform the 'Everyone Around the Table: FAO/GAIN Roundtable with Private Sector on Healthy Diets' series of virtual roundtables which took place in July 2020. As in STEP 1 and STEP 2, the topics covered are relevant to all regions, but where possible a greater focus has been given to low- and middle-income countries. Small and medium enterprises (SMEs) are again a focus, given their role in the food systems of these regions (see STEP 1 for more detail), including their common presence in the food environments of many people living in poverty. STEP 3 (this paper) looks more closely at what it means to go to scale with healthy diets and better nutrition, providing examples and reflections for all stakeholders to consider.

This paper discusses Pakistan's First review Under the Extended Arrangement Under the Extended Fund Facility and Request for Waiver of Nonobservance of a Performance Criterion (PCs) and Modification of Performance Criteria. All quantitative PCs for end-September 2013 were observed except for the one on net international reserves. The indicative target on social transfer payments was also missed, but the technical problems that caused the shortfall have since been rectified. The IMF Staff supports authorities' request for completion of the first review under the arrangement and for a waiver for the nonobservance of the performance criterion on net international reserves accumulation.
