The Oldest Living Things in the World is an epic journey through time and space. Over the past decade, artist Rachel Sussman has researched, worked with biologists, and traveled the world to photograph continuously living organisms that are 2,000 years old and older. Spanning from Antarctica to Greenland, the Mojave Desert to the Australian Outback, the result is a stunning and unique

Her work is both timeless and timely, and spans disciplines, continents, and millennia. It is underscored by an innate environmentalism and driven by Sussman's relentless curiosity. She begins at "year zero," and looks back

Addressing the pervasive longing for meaning and fulfillment in this time of crisis, Nature and the Human Soul introduces a visionary ecopsychology of human development that reveals how fully and creatively we can mature when soul and wild nature guide us. Depth psychologist and wilderness guide Bill Plotkin presents a model for a human life span rooted in the cycles and qualities of the natural world, a blueprint for individual development that ultimately yields

If it is true, as Plotkin and others observe, that we live in a culture dominated by adolescent habits and desires, then the enduring societal changes we so desperately need won ' t happen until we individually and collectively evolve into an engaged, authentic adulthood. With evocative language and personal stories, including those of elders Thomas Berry and Joanna Macy, this book defines eight stages of human life — Innocent, Explorer, Thespian, Wanderer, Soul Apprentice, Artisan, Master, and Sage — and describes the challenges and benefits of each. Plotkin offers a

Most people assume racism grows from a perception of human difference: the fact of race gives rise to the practice of racism. Sociologist Karen E. Fields and historian Barbara J. Fields argue otherwise: the practice of racism produces the illusion of race, through what they call "racecraft." And this phenomenon is intimately entwined with other forms of inequality in American life. So pervasive are the devices of racecraft in American history, economic doctrine, politics, and everyday thinking that the presence of racecraft itself goes unnoticed. That the promised post-racial age has not dawned, the authors argue, reflects the failure of Americans to develop a legitimate language for thinking about and discussing inequality. That failure should worry everyone who cares about democratic

"Cain ' s small but mighty novel reads like a ghost story and packs the punch of a feminist classic." —The New York Times Book Review A haunted feminist fable, *Amina Cain ' s Indelicacy* is the story of a woman navigating between gender and class roles to empower herself and fulfill her dreams. In "a strangely ageless world somewhere between Emily Dickinson and David Lynch" (Blake Butler), a cleaning woman at a museum of art nurtures aspirations to do more than simply dust the paintings around her. She dreams of having the liberty to explore them in writing, and so must find a way to win herself the time and security to use her mind. Reminiscent of a lost Victorian classic in miniature, yet taking equal inspiration from such modern authors as Jean Rhys, Octavia Butler, Clarice Lispector, and Jean Genet, Amina Cain's *Indelicacy* is at once a ghost story without a ghost, a fable without a moral, and a down-to-earth investigation of the barriers faced by women in both life and literature. It is a novel about seeing, class, desire, anxiety, pleasure, friendship, and the battle to find one's true calling.

living. He said that our beliefs, the truths that guide our lives, matter—their value and veracity turn on the way they play out practically for ourselves and our communities. For James, philosophy was about making life meaningful, and for some of us, liveable. This is the core of his "pragmatic maxim," that truth should be judged on the bases of its practical consequences. Kaag shows how James put this maxim into use in his philosophy and his life and how we can do so in our own. In his perhaps most

famous and enduring work, The Varieties of Religious Experience, James devoted two chapters to exploring what he saw as two distinct types of personality, "the sick-souled" and "the healthy-minded." James himself, as Kaag shows, tended more toward the sick-souled side of the spectrum. But both types fascinated James and he thought both provided important sources for understanding not just religious experience, but for how we can think about our own orientation to the world and perhaps reorient

some of the most astonishing phenomena of our time—children who speak of past life memory and reincarnation. All across the globe, small children spontaneously speak of previous lives, beg to be taken “home,” pine for mothers and husbands and mistresses from another life, and know things that there seems to be no normal way for them to know. From the moment these children can talk, they speak of people and events from the past—not vague stories of centuries ago, but details of specific, identifiable individuals who may have died

For thirty-seven years, Dr. Ian Stevenson has traveled the world from Lebanon to suburban Virginia investigating and documenting more than two thousand of these past life memory cases. Now, his essentially unknown work is being brought to the mainstream by Tom Shroder, the first journalist to have the privilege of accompanying Dr. Stevenson in his fieldwork. Shroder follows Stevenson into the lives of children and families touched by this phenomenon, changing from skeptic to believer as he comes

There is a truth within the universe, one that's long been disguised as forbidden knowledge. It's up to Eve to crack the code, and enlighten humanity to the greatest lie ever told. But the loss of her beloved grandfather and flood of all her past lives besieging her at once took her to a dark place for six long weeks. She emerges to find herself in Aurora, the vast new society that's risen from the ashes of North America, where old souls

now live separate from new--and her love of lifetimes, Roman, has never left her side. But she quickly realizes there are two opposing forces behind this impressive new world, and one of them wants to keep it teetering on the verge of war. When she begins to decipher clues embedded all around her, it becomes clear that uncovering the truth will be next to impossible, and exposing it may very well cost her life.
