~~A Guide To Speech Production And Perception~~

Speech production is the process by which thoughts are translated into speech. This includes the selection of words, the organization of relevant grammatical forms, and then the articulation of the resulting sounds by the motor system using the vocal apparatus. Speech production can be spontaneous such as when a person creates the words of a conversation, reactive such as when they name a picture or read aloud a written word, or imitative, such as in speech repetition. Speech production is not t

~~Speech production - Wikipedia~~

Mary McMahon. Speech production is the process of turning the intent to say a word into articulated speech, using the brain and vocal apparatus. Speech sounds are an important mode of communication for human beings around the world, and substantial research surrounds the various processes involved in speaking.
