Robertson's Latest Mix of Rich History and Deadly Murder For young Leonhard Euler, the Bernoulli family have been more than just friends. Master Johann has been a demanding mentor, and his sons have been Leonhard's allies and companions. But it is also a family torn by jealousy and distrust. Father and sons are engaged in a ruthless competition for prestige among the mathematical elites of Europe, especially the greatest prize: the Chair of Mathematics at the University of Basel, which Johann holds and his sons want. And now, their aspirations may have turned deadly. Lured into an investigation of the suspicious death of Uncle Jacob twenty years ago, Leonhard soon realizes there's more at stake than even a prominent appointment. Surrounded by the most brilliant--and cunning--minds of his generation, Leonhard is forced to see how dangerous his world is. His studies in mathematics have always been entwined with his thoughts on theology, and now, caught in a deadly battle of wills, he'll need both his genius and his faith to survive. Inside the pages of "Emotional Elegance," you will clear directions and pathways to the making of meaning-to help you get back on track and stay on track. It is a creative playground that will help you fill in the gap between where your life is now and where you dearly want it to be. The author has divided the book into meaningful "sections" that you will recognize as important parts of your own life. Self-Respect, Relationships, Sex and Money are all critical to our emotional well-being and feeling of success. He presents you with new ways of looking at yourself and the people in your life. You will never be able to go back your normal, hardened viewpoints again. Other sections, such as Enemies, Guts, Clutter, Reverence and Ferocity will surprise and move you and get you thinking new thoughts and constructing new goals. The glamorous star of Bravo's hit show The Real Housewives of New York City makes it easy to be elegant, with contemporary etiquette tips and a complete course in the art of sophisticated living Countess LuAnn de Lesseps knows firsthand that class is a state of mind, not a birthright. Raised in small-town Connecticut-half French Canadian, half

Native American-she worked as a registered nurse before she started modeling. On her first trip to Europe, she was awed by the lifestyle of the Italians and stayed, eventually becoming a TV personality. Before long, she began a fairy-tale romance with Alexandre Count de Lesseps, of the Suez Canal dynasty, and married into a world of aristocrats. She learned during her time in Europe that panache comes from within- not from an antiquated manual. Now she shares her savvy advice and her inspiring story in Class with the Countess, including: ?Elegance can most certainly be acquired. ?All of life is a seduction. ?You don't have to be rich and famous to have an unforgettable presence. ?Being interested is what makes you interesting. ?An alluring woman makes everyone want to be near her. The twenty-first century's answer to Emily Post, the Countess gives a new generation of women an exuberant and incomparable guide to modern social graces.

"But Very Vegetarian has recipes made with common foodstuffs that are uncommonly delicious." Very Vegetarian is presented by and introduced by 9-time Olympic gold medal winner Carl Lewis, who says that a vegan diet of fresh fruits and vegetables, whole complex carbohydrates, high quality proteins, and natural fats is the best way to ensure a person's health and longevity. In addition to a wide range of more than 250 mouth-watering recipes, Very Vegetarian includes a helpful introduction about eating vegan and 16 pages of beautiful four-color photographs. - First complete overview of Eleanor Moty's oeuvre - Masterful compositions with gems and metalwork - Six decades of jewelry from America Eleanor Moty (b. 1945) from the US is a seminal figure in the field of contemporary international studio jewelry. In a career that has spanned more than 50 years, she has been both a dedicated practitioner and a devoted teacher who has inspired succeeding generations of artists, collectors, and fellow professionals. She began to attract national attention in the late 1960s and early 1970s for her experiments with photoetching and electroforming metal. Later, mid-career, Moty made what seems like an abrupt shift in style and focus, with more abstract works whose designs were inspired by the natural inclusions within the non-precious gems used in their fabrication. The idea of elegance in science is not necessarily a familiar one, but it is an important one. The use of the term is perhaps most clear-cut in mathematics - the elegant proof - and this is where Ian Glynn begins his exploration. Scientists often share a sense of admiration and excitement on hearing of an elegant solution to a problem, an elegant theory, or an elegant experiment. The idea of elegance may seem strange in a field of endeavour that prides itself in its objectivity, but only if science is regarded as a dull, dry activity of counting and measuring. It is, of course, far more than that, and elegance is a fundamental aspect of the beauty and imagination involved in scientific activity. Ian Glynn, a distinguished scientist, selects historical examples from a range of sciences to draw out the principles of science, including Kepler's Laws, the experiments that demonstrated the nature of heat, and the action of nerves, and of course the several extraordinary episodes that led to Watson and Crick's discovery of the structure of DNA. With a highly readable selection of inspiring episodes highlighting the role of beauty and simplicity in the sciences, the book also relates to important philosophical issues of inference, and Glynn ends by warning us not to rely on beauty and simplicity alone - even the most elegant explanation can be wrong.

What made the Sopranos finale one of the most-talked-about events in television history? Why is sudoku so addictive and the iPhone so darn irresistible? What do Jackson Pollock and Lance Armstrong have in common with theoretical physicists and Buddhist monks?

Elegance. In this thought-provoking exploration of why certain events, products, and people capture our attention and imaginations, Matthew E. May examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements—seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what 's "not there" often trumps what is. In the bestselling tradition of The Tipping Point, Made to Stick, and The Black Swan, In Pursuit of Elegance will change the way you think about the world.

This sweeping study examines the law of intellectual property in Chinese civilization from imperial days to the present. A shape-shifter arrives at Tokyo harbour in human form, set to embark on an unstoppable rampage through the city's train network... A young woman is accompanied home one night by a reclusive student, and finds herself lured into a flat full of eerie Egyptian artefacts... A man suspects his young wife's obsession with picnicking every weekend in the city's parks hides a darker motive... At first, Tokyo appears in these stories as it does to many outsiders: a city of bewildering scale, awe-inspiring modernity, peculiar rules, unknowable secrets and, to some extent, danger. Characters observe their fellow citizens from afar, hesitant to stray from their daily routines to engage with them. But Tokyo being the city it is, random encounters inevitably take place - a naïve book collector, mistaken for a French speaker, is drawn into a world he never knew existed; a woman seeking psychiatric help finds herself in a taxi with an older man wanting to share his own peculiar revelations; a depressed divorcee accepts an unexpected lunch invitation to try Thai food for the very first time... The result in each story is a small but crucial change in perspective, a sampling of the unexpected yet simple pleasure of other people's company. As one character puts it, 'The world is full of delicious things, you know.'

Elegance represents an important watershed in architectural design. Since the onset of computer-driven technologies, innovative designers have, almost exclusively, been preoccupied with the pursuit of digital techniques. This issue of AD extrapolates current design tendencies and brings them together to present a new type of architecture, one that is seamlessly trying processes, space, structure and material together with beauty. 'Elegance' here is cast with a new contemporary meaning as it is applied to work that is effortlessly complex. It is analogous to an elegant algorithm that uses a small amount of initiative code to great effect. In a structure elegance may be expressed by a complex surface that retains its continuity and integrity even when punctured. In many ways, Elegance marks a coming of age for, 'digital architecture', as architects become more adept at producing complexity and integrating digital design technologies, production and assembly systems producing elegant solutions. It is the potent finesse that is often associated with the work of Zaha Hadid Architects and other featured architects, such as Mark Goulthorpe of Decoi and Hani Rashid of Asymptote.

Renée is the concierge of a grand Parisian apartment building, home to members of the great and the good. Over the years she has maintained her carefully constructed persona as someone reliable but totally uncultivated, in keeping, she feels, with society's expectations of what a concierge should be. But beneath this façade lies the real Renée: passionate about culture and the arts, and more knowledgeable in many ways than her employers with their outwardly successful but emotionally void lives. Down in her lodge, apart from weekly visits by her one friend Manuela, Renée lives resigned to her lonely lot with only her cat for company.

Meanwhile, several floors up, twelve-year-old Paloma Josse is determined to avoid the pampered and vacuous future laid out for her, and decides to end her life on her thirteenth birthday. But unknown to them both, the sudden death of one of their privileged neighbours will dramatically alter their lives forever.
