Events Marketing Management

A consumer perspective

The magazine that helps career moms balance their personal and professional lives.

The conventional view of globalization sees it as a process driven by giant firms from the Triad regions of North America, Europe, and Japan, shaping the world in their own image. This book contests such a view, describing the extraordinary success of a handful of multinationals from the "Periphery" in globalizing their operations extremely rapidly. Focusing on Acer, the Taiwanese IT company; the Hong Leong hotel group of Singapore; Ispat International in steel; Cemex of Mexico in cement; and Li and Fung from Hong Kong in contract manufacturing, Mathews demonstrates that these firms have been able to utilize strategies of international linkage and leverage to accelerate their global coverage. He contends that they are pioneers of a new kind of global firm, indicators that the global business civilization being created in the 21st century is like to be pluralistic and diverse, offering unprecedented opportunities for firms that know how to enmesh themselves in global networks.

This textbook provides students with an essential introduction to the theoretical underpinnings and practicalities of managing the marketing of events. In order to market events effectively, it is vital to consider marketing of events from the organiser's perspective and to link it to that of the consumers attending events. As such, this is the first book on the topic which reflects the unique characteristics of marketing in the Events industry by exploring both sides of the marketing coin - the supply and the demand - in the specific context of events. The book takes the reader from core marketing mix principles to exploring the event marketing landscape to consumer experience and involvement with event marketing and finally strategies and tactics employed to manage the marketing activities related to events. The use of technology, importance of sponsorship and PR are also considered. International case studies are integrated throughout to show practical realities of marketing and managing events and a range of useful learning aids are incorporated to aid navigation throughout the book, spur critical thinking and further students' knowledge. This accessible and comprehensive account of Events Marketing and Management is essential reading for all students and future managers.
