Menu planning is the first control point in the food service system. The menu is a listing of the items the foodservice operation has for sale. Without a menu the customer will not know what their options are for goods to purchase. While, a properly designed menu serves as both a sales and marketing tool for the foodservice operation.

Menu Planning - Northern Arizona University

By planning in advance, you can aim to have nutritionally well-balanced meals throughout the week. For example, you can make sure each of your dinners have the requisite veggies, protein, and grains. Planning your meals ultimately allows you to take control of your own personal nutrition needs.

6 Reasons Why You Should Plan Your Meals - Azumio

Consuming a nutrient-dense real food diet is vital for so many aspects of health, but it also takes some advance planning. Meal planning lets you decide before you ever go to the grocery store what healthy meals your family is going to eat during a given week so that you can only purchase healthy foods and know that you will use them.

How to Meal Plan - The Ultimate Guide to Meal Planning ...

argue that planning coordination from a single point provides a much better visibility of demand. This is particularly important in chains where a company has multiple distribution channels because total product availability can be more effectively managed.
