Install the application on your test environment, and copy the File Type Verifier to that environment. The File Type Verifier is available in the Windows 7 SDK. Step 2: Use your application to create a file to be tested. Step 3: Start the File Type Verifier. Step 4: Select the category for your file type, as shown in the following screen shot.

~~How to Use the File Type Verifier - Win32 apps | Microsoft ...~~

Then set the following environment variables in a small set-up file that you source prior to running the application (e.g. create ansoft_setup, then at a shell prompt run "source ansoft_setup" to set the environment). Alternatively you could place these lines in your .cshrc, meaning that any new shell will take on these environment variables.

~~ECAD: Ansoft Support~~

3D Electromagnetic Field Simulator for RF and Wireless Design. ANSYS HFSS is a 3D electromagnetic (EM) simulation software for designing and simulating high-frequency electronic products such as antennas, antenna arrays, RF or microwave components, high-speed interconnects, filters, connectors, IC packages and printed circuit boards.
