Anthropology - Robert L. Welsch; Luis A. Vivanco; Agustin ...

Scientists often design their research to address how and why natural forces influence our physical and natural world. In biological anthropology, we focus our questions on humans as well as primate species, both living and extinct. We ask questions like: What influences a primate's diet? Why do humans walk bipedally?

Introduction to Biological Anthropology – Explorations

Anthropology is the application of society, biology, and culture of humans. It also entails the study of evolution and human nature. It addresses a wide array of evolutionary and behavioral...
