The ASME Boiler & Pressure Vessel Code is an American Society of Mechanical Engineers standard that regulates the design and construction of boilers and pressure vessels. The document is written and maintained by volunteers chosen for their technical expertise. The ASME works as an accreditation body and entitles independent third parties to inspect and ensure compliance to the BPVC.

About the ASME Boiler and Pressure Vessel Certification Program. The ASME BPVC Certification Program conforms to the rules governing the design, fabrication, assembly, and inspection of boiler and pressure vessel components during construction. In 1916, shortly after the first publication of the "Rules for the Construction of Stationary Boilers and for Allowable Working Pressures" (known today as the ASME BPVC), ASME began offering certification to companies in the pressure equipment ...
