Discover the funny yet poignant classic by the bestselling author of The World According to Garp. 'So extraordinary, so original, and so enriching' Stephen King, The Washington Post 'May justly join the classic American list' Anthony Burgess, Observer In September 1980, eight Catholic activists made their way into a Pennsylvania General Electric plant housing parts for nuclear missiles. Evading security guards, these activists pounded on missile nose cones with hammers and then covered the cones in their own blood. This act of nonviolent resistance was their answer to calls for prophetic witness in the Old Testament: “They shall beat their swords into plowshares, and their spears into pruning hooks. Nation shall not take up sword against nation; they shall never again know war.” Plowshares explores the closely interwoven religious and social significance of the group’s use of performance to achieve its goals. It looks at the group’s acts of civil disobedience, such as that undertaken at the GE plant in 1980, and the Plowshares’ behavior at the legal trials that result from these protests. Interpreting the Bible as a mandate to enact God’s kingdom through political resistance, the Plowshares work toward “symbolic disarmament,” with the aim of eradicating nuclear weapons. Plowshares activists continue to carry out such “divine obediences” against facilities where equipment used in the production or deployment of nuclear weapons is manufactured or stored. Whether one agrees or disagrees with their actions, this volume helps us better understand their motivations, logic, identity, and ultimate goal.

And there's never a pride of evangelical-hungry lions when you need one! But what to do? Speak out against religion and the same people who bring a message of 'love' from their gay-hating, atheist-burning God will look you straight in the eye and shout, 'Intolerance!' With religion, free speech won't get you far, so there's only one thing for it... Sing! Anthems for Atheists - Set to the soundtrack of 100 Broadway show tunes. Blasphemy has never been so musical!

Two years ago, Billie Tarrow's husband left her for another woman. Shamed and divorced, Billie retreated to her family home in Port Townsend, far from her old life in New York. After a near-death encounter, Billie decides to return to the city that took everything from her. But sometimes in the midst of heartache, hope suffocates the pain. Satcher Gable has carried a torch for Billie for ten years. When she suddenly returns to New York a single woman, he can't believe his good fortune. But convincing her to walk away from her heartache is proving more difficult than Satcher anticipated. A changed woman, Billie's only goal is revenge.

When Fig Coxbury buys a house on West Barrett Street, it's not because she likes the neighborhood, or even because she likes the house. It's because everything she desires is next door: The husband, the child, and the life that belongs to someone else.

This is a compelling and inspiring look at spiritual beliefs that influenced some of the world's greatest composers, now revised and expanded with eight additional composers.

Winner of the Frank S. and Elizabeth D. Brewer Best First Book Prize of the American Society of Church History Named a Society for U. S. Intellectual History Notable Title in American Intellectual History The story of liberal religion in the twentieth century, Matthew S. Hedstrom contends, is a story of cultural ascendancy. This may come as a surprise-most scholarship in American religious history, after all, equates the numerical decline of the Protestant mainline with the failure of religious liberalism. Yet a look beyond the pews, into the wider culture, reveals a more complex and fascinating story, one Hedstrom tells in The Rise of Liberal Religion. Hedstrom attends especially to the critically important yet little-studied arena of religious book culture-particularly the religious middlebrow of mid-century-as the site where religious liberalism was most effectively popularized. By looking at book weeks, book clubs, public libraries, new publishing enterprises, key authors and bestsellers, wartime reading programs, and fan mail, among other sources, Hedstrom is able to provide a rich, on-the-ground account of the men, women, and organizations that drove religious liberalism's cultural rise in the 1920s, 1930s, and 1940s. Critically, by the post-WWII period the religious middlebrow had expanded beyond its Protestant roots, using mystical and psychological spirituality as a platform for interreligious exchange. This compelling history of religion and book culture not only shows how reading and book buying were critical twentieth-century religious practices, but also provides a model for thinking about the relationship of religion to consumer culture more broadly. In this way, The Rise of Liberal Religion offers both innovative cultural history and new ways of seeing the imprint of liberal religion in our own times.

From the New York Times bestselling author of American Fascists and the NBCC finalist for War Is a Force That Gives Us Meaning comes this timely and compelling work about new atheists: those who attack religion to advance the worst of global capitalism, intolerance and imperial projects. Chris Hedges, who graduated from seminary at Harvard Divinity School, has long been a courageous voice in a world where there are too few. He observes that there are two radical, polarized and dangerous sides to the debate on faith and religion in America: the fundamentalists who see religious faith as their prerogative, and the new atheists who brand all religious belief as irrational and dangerous. Both sides use faith to promote a radical agenda, while the religious majority, those with a commitment to tolerance and compassion as well as to their faith, are caught in the middle. The new atheists, led by Richard Dawkins, Christopher Hitchens and Sam Harris, do not make moral arguments about religion. Rather, they have created a new form of fundamentalism that attempts to permeate society with ideas about our own moral superiority and the omnipotence of human reason. I Don't Believe in Atheists critiques the radical mindset that rages against religion and faith. Hedges identifies the pillars of the new atheist belief system, revealing that the stringent rules and rigid traditions in place are as strict as those of any religious practice. Hedges claims that those who have placed blind faith in the morally neutral disciplines of reason and science create idols in their own image -- a sin for either side of the spectrum. He makes an impassioned, intelligent case against religious and secular fundamentalism, which seeks to divide the world into those worthy of moral and intellectual consideration and those who should be condemned, silenced and eradicated. Hedges shatters the new atheists' assault against religion in America, and in doing so, makes way for new, moderate voices to join the debate. This is a book that must be read to understand the state of the battle about faith.

Over the last decade, "New Atheists" such as Sam Harris, Richard Dawkins, and Christopher Hitchens have pushed the issue of atheism to the forefront of public discussion. Yet very few of the ensuing debates and discussions have managed to provide a full and objective treatment of the subject. *Atheism: What Everyone Needs to Know* provides a balanced look at the topic, considering atheism historically, philosophically, theologically, sociologically and psychologically. Written in an easily accessible style, the book uses a question and answer format to examine the history of atheism, arguments for and against atheism, the relationship between religion and science, and the issue of the meaning of life—and whether or not one can be a happy and satisfied atheist. Above all, the author stresses that the atheism controversy is not just a matter of the facts, but a matter of burning moral concern, both about the stand one should take on the issues and the consequences of one's commitment.

Does our available evidence show that some particular religion is correct? It seems unlikely, given the great diversity of religious - and non-religious - views of the world. But if no religious beliefs can be shown true on the evidence, can it be right to make a religious commitment? Should people make 'leaps of faith'? Or would we all be better off avoiding commitments that outrun our evidence? And, if leaps of faith can be acceptable, how do we tell the difference between good and bad ones - between sound religion and dogmatic ideology or fundamentalist fanaticism? Believing by Faith offers answers to these questions, inspired by a famous attempt to justify faith made by William James in 1896. In doing so, it engages critically with much recent discussion in the philosophy of religion, and, especially, the epistemology of religious belief.
