New York Times bestselling author Maria Dahvana Headley presents a modern retelling of the literary classic Beowulf, set in American suburbia as two mothers—a housewife and a battle-hardened veteran—fight to protect those they love in The Mere Wife. From the perspective of those who live in Herot Hall, the suburb is a paradise. Picket fences divide buildings—high and gabled—and the community is entirely self-sustaining. Each house has its own fireplace, each fireplace is fitted with a container of lighter fluid, and outside—in lawns and on playgrounds—wildflowers seed themselves in neat rows. But for those who live surreptitiously along Herot Hall’s periphery, the subdivision is a fortress guarded by an intense network of gates, surveillance cameras, and motion-activated lights. For Willa, the wife of Roger Herot (heir of Herot Hall), life moves at a charmingly slow pace. She flits between mommy groups, playdates, cocktail hour, and dinner parties, always with her son, Dylan, in tow. Meanwhile, in a cave in the mountains just beyond the limits of Herot Hall lives Gren, short for Grendel, as well as his mother, Dana, a former soldier who gave birth as if by chance. Dana didn’t want Gren, didn’t plan Gren, and doesn’t know how she got Gren, but when she returned from war, there he was. When Gren, unaware of the borders erected to keep him at bay, ventures into Herot Hall and runs off with Dylan, Dana’s and Willa’s worlds collide. In this book Jos Bazelmann offers a new perspective on the relationship between lord and retainer in early medieval society. This perspective goes beyond established politico-economic interpretations and aims for an interpretation of this relationship in ritual-cosmological terms. Drawing on recent developments within French structuralist anthropology and the anthropology of gift exchange, Bazelmann develops a new model of early medieval socio-political structure (as represented in Old English Beowulf) which explicitly deals with exchange relations between the living and the supernatural, the commensurability of subject and object in gift exchange, and the whole set of interdependent life-cycle rituals of lords and their warrior-followers. The value of gifts is considered to be determined not only by their function within a competitive game about prestige, status and power, but also by its equivalence with a constituent. The value of the gift is fundamental to the noble person and develops through a man's life-time. It is, ultimately, of a supernatural origin. The model enables us to understand certain acts at Beowulf's funeral pyre which at first sight appear to be no more than an ethnographic curiosity (Beowulf 3111b-3114a). The warrior's contributions to his pyre form the concluding part of a grand ritual undertaking in which society as a whole is involved and in which the constitution of the noble person, and the disarticulation of that person at his death, is realized. This ritual undertaking goes beyond the politico-economic concerns of the participants which are central to established power-based models of early medieval societal structure. The volume includes an extensive overview of the anthropology of gift exchange.

This innovative book explores links between literature and videogames, and how designing and playing games can transform our understanding of literature. It shows how studying literature through the lens of videogames can provide new insights into narrative and creative engagement with the text. The book sets out theories of narrative aesthetics and multimodality in literature and videogames, alongside models of literacy needed for such cultural and creative engagement. It goes on to examine game adaptations of children's literature; and a series of videogames made by students based on Beowulf and Macbeth. In each case, the book considers ways in which the original text has been transformed by the process of game design, and what fresh light this casts on the literary narrative. It also considers what kind of learning, creative production, and cultural engagement is apparent in the game designs and emphasises the importance of treating games as a narrative medium in their own right. With a unique approach to the aesthetics of narrative in literature and videogames, the book will be of great interest to researchers, academics, and post-graduate students in the fields of literature, pedagogy, and game studies.

Featuring essays from some of the most prominent voices in early medieval studies, Dating Beowulf playfully redeploys the word 'dating', which usually heralds some of the most divisive critical impasses in the field, to provocatively phrase a set of new relationships with an Old English poem. The volume argues for the relevance of the early Middle Ages to affect studies and vice-versa, offering a riposte to antifeminist discourse and opening avenues for future work by specialists in the history of emotions, literary theorists, students of Old English literature and medieval scholars alike. To this end, the essays embody a range of critical approaches from queer theory to animal studies and ecocriticism to actor-network theory.

Most people live with the assumption that man is the high point of life on Earth. Our technologies and ingenious inventions give further credibility to what seems so self evident. Yet there is a dark side to our progress. We are exploiting the planet and it is inevitable that many resources will run out. Could man evolve differently? Is there a higher being in each of us that needs to be honored? Can we only do this by cultivating a different part of our mind? Journey along with Professor Eric Parker as he encounters a revolutionary discovery, the missing link, and weaves a new meaning to the age old question of what it means to be fully human. Will Parker be able to escape the death threats of fundamentalist zealots? Will he be able to save this recently discovered species from extinction fabricated by those who reject the idea of evolution in favor of special creation ? Will Parker find a way to make his life a more sacred experience? See how one person's search for meaning can survive in a world of conventional answers.

Composed towards the end of the first millennium, the Anglo-Saxon poem Beowulf is one of the great Northern epics and a classic of European literature. In his new translation, Seamus Heaney has produced a work which is both true, line by line, to the original poem, and an expression, in its language and music, of something fundamental to his own creative gift. The poem is about encountering the monstrous, defeating it, and then having to live on, physically and psychically exposed, in that exhausted aftermath. It is not hard to draw parallels between this story and the history of the twentieth century, nor can Heaney's Beowulf fail to be read partly in the light of his Northern Irish upbringing. But it also transcends such considerations, telling us psychological and spiritual truths that are permanent and liberating.

This book is a tribute to Malcolm Coulthard, who has been remarkably active and influential across a wide range of English Language Studies. He is particularly well-known for his pioneering work in spoken and written discourse analysis and most recently, for his work in forensic linguistics. This collection of specially commissioned, state-of-the-art pieces by leading international linguists is dedicated to the man and his achievements and provides a showcase for the most exciting developments in applied discourse studies. All the papers share common assumptions about language study: that descriptions should be data-based, data-tested and replicable. The collection as a whole contains original and important new research on descriptions, with intriguing applications to forensic, gender and literary studies.

This book visits the 'Thing' in its various manifestations as an unnameable monster in literature and film, reinforcing the idea that the very essence of the monster is its excess and its indeterminacy. Tied primarily to the artistic modes of the gothic, science fiction, and horror, the unnameable monster retains a persistent presence in literary forms as a reminder of the sublime object that exceeds our worst fears. Beville examines various representations of this elusive monster and argues that we must look at the monster, rather than through it, at ourselves. As such, this book responds to the obsessive manner in which the monsters of literature and culture are 'managed' in processes of classification and in claims that they serve a social function by embodying all that is horrible in the human imagination. The book primarily considers literature from the Romantic period to the present, and film that leans toward postmodernism. Incorporating disciplines such as cultural theory, film theory, literary criticism, and continental philosophy, it focuses on that most difficult but interesting quality of the monster, its unnameability, in order to transform and accelerate current readings of not only the monsters of literature and film, but also those that are the focus of contemporary theoretical discussion.

The social and most terrifying monster in English literature, from the great early epic Beowulf, tells his own side of the story in this frequently banned book. This classic and much lauded retelling of Beowulf follows the monster Grendel as he learns about humans and fights the war at the center of the Anglo Saxon classic epic. This is the book William Gass called "one of the finest of our contemporary fictions."

The first and emotional welfare of students in both K-12 and higher education settings has become increasingly important during the third decade of the 21st century, as students face a variety of social-emotional learning (SEL) challenges related to a multitude of internal and external factors. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant, the connections between SEL and academic literacy opportunities warrant considerable exploration. The Handbook of Research on Supporting Social and Emotional Development Through Literacy Education develops a conceptual framework around pedagogical connections to social and emotional teaching and learning within K-12 literacy practices. This text provides a variety of research and practice protocols supporting student success through the integration of SEL and literacy across grade levels. Covering topics such as culturally relevant literacy, digital literacy, and content-area literacy, this handbook is essential for curriculum directors, education faculty, instructional facilitators, literacy professionals, practicing teachers, pre-service teachers, professional development coordinators, school counselors, teacher preparation programs, academicians, researchers, and students.

The aim of "Gold-Hall and Earth-Dragon" is to re-create as fully as possible for modern readers the original force of the poetic language of Beowulf. Lee makes use of a wide, archetypal literary context for Beowulf to provide illuminating parallels and contrasts with poems and fictions from other times and places. He demonstrates how the poem's symbolic system reveals itself through the metaphorical workings of the Old English words, patterns of imagery, and more general narrative structures, and how the poem might have been experienced and interpreted by the Anglo-Saxons in the light of other Old English poems. The critical tools that Lee uses - combining certain techniques of New Criticism and close reading with postmodern theories of the self-referentiality of language and with Northrop Frye's conceptions of structure and polysemy in literature - make possible a fresh new account of Beowulf as a work that is very much alive in its poetic language, a finely wrought symbolic work of imagining, still resonant with meanings old and new.
