The controls are consistent across the entire Canon range so moving from a EOS 650 to a PowerShot A530 to a EOS 20D was not difficult. Fortunately the EF 35-105 mm lens was still compatible even though it was bought back in 1988. Image quality is excellent and it is so much fun to be able to press the shoot button and have the camera take the image without any delay.

Having used another brand DSLR (Amateur Level) for one and half years, I acquired the Canon EOS 500D (US Model EOS Rebel T1i) based on a friend's recommendation and reading a lot of reviews. The whole camera including a medium zoom lens weighs 2/3 of the competitor and very easy to maneuver. It does feel less sturdy dur to being less hefty.
