The complete guide to Canon's lens terms | Digital Camera ...
Lenses with this abbreviation have an optical element in the lens that help to control chromatic aberration. IS - Stands for image stabilization. Having an IS lens means you can handhold the camera at slower shutter speeds than you typically would be able to. L - Canon's L lenses are their higher end offerings. The L stands for Luxury and typically have more features, better optical performance, better build quality and, obviously, a higher price tag.
