Originally planned as a fact-based book on the pre-colonial history of the Eastern Cape in the true tradition of history, this ground-breaking book focuses on epistemological and foundational questions about the writing of history and whose history counts. Whose History Counts challenges the very concept of ?pre-colonial? and explores methodologies on researching and writing history. The reason for this dramatic change of focus is attributed in the introduction of the book to the student-led rebellion that erupted following the

#RhodesMustFall campaign which started at the University of Cape Town on 9 March 2015. Key to the rebellion was the students' opposition to what they dubbed 'colonial' education and a clamour for, among others, a 'decolonised curriculum'. This book is a direct response to this clarion call.

This book has been designed by combining the goodness of the original Wren & Martin text, High School Grammar & Composition, and specialized content developed by a panel of competitive examination experts in the area of the English language. The USP is therefore adapting a classical text to the needs of the various admission and recruitment competitive examination aspirants. Its exhaustive coverage ensures that virtually no competitive examination remains untouched.

Students preparing for descriptive tests such as UPSC (Compulsory English and General English Papers of Main Exams) and state PCS examinations, Judicial Services examination, Indian Forest Service examination, Statistical Services and many other examinations in which subjective papers/tests are mandatory will find this book immensely useful. The book is also a boon for those students who are preparing for objective tests such as Banking and Insurance, SSC, UPSC preliminary, Defence Services, Law entrance, Business School entrance examinations, and many other admission and recruitment examinations. A unique feature of this book is demonstration of the connectedness of the concepts and their applications visually, with the

*Urban Resistance and Public Space in the Age
of Shrinking Democracy*

Physical Science

What do the recent urban resistance tactics around the world have in common? What are the roles of public space in these movements? What are the implications of urban resistance for the remaking of public space in the "age of shrinking democracy"? To what extent do these resistances move from anti- to alter-politics? *City Unsilenced* brings together a cross-disciplinary group of scholars and scholar-activists to examine the spaces, conditions, and processes in which neoliberal practices have profoundly impacted the everyday social, economic, and political life of citizens and communities around the globe. They explore the commonalities and specificities of urban resistance movements that respond to those impacts. They focus on how such movements make use of and transform the meanings and capacity of public space. They investigate their ramifications in the continued practices of renewing democracies. A broad collection of cases is presented and analyzed, including *Movimento Passe Livre* (Brazil), *Google Bus Blockades* San Francisco (USA), the *Platform for Mortgage Affected People*

(PAH) (Spain), the Piqueteros Movement (Argentina), Umbrella Movement (Hong Kong), post-Occupy Gezi Park (Turkey), Sunflower Movement (Taiwan), Occupy Oakland (USA), Syntagma Square (Greece), Researchers for Fair Policing (New York), Urban Movement Congress (Poland), urban activism (Berlin), 1DMX (Mexico), Miyashita Park Tokyo (Japan), 15M Movement (Spain), and Train of Hope and protests against Academic Ball in Vienna (Austria). By better understanding the processes and implications of the recent urban resistances, City Unsilenced contributes to the ongoing debates concerning the role and significance of public space in the practice of lived democracy.

In the highly competitive world of biomedical science, often the rush to publish and to be recognized as "first" with a new discovery, concept or method, is lost in the hurly-burly of the moment, as "the maddening crowd" moves on to the next "new thing". One of the great things about immunology today is that it has only become mature as a science within the last half-century, and especially within the past 35 years as a consequence of the revolution of molecular immunology, which has taken place only since 1980. Consequently, most of those who have

contributed to our new understanding of how the immune system functions are still alive and well, and still contributing. Thus, "A Living History of Immunology" collates many stories from the investigators who actually performed the experiments that have established the frontiers of immunology. Accordingly, this volume combats "revisionist science", by those who want to alter history by telling the stories a different way than actually happened. In this regard, one of the good things about science vs. other disciplines is that we have the written record of what was done, when it was done and by whom. Even so, we do not have the complete story or narrative of how and why experiments were done, and what made the differences that led to success. This volume captures and chronicles some of these stories from the past fifty years in immunology.
