Les jeux reprennent le theme de la confrontation du Bien contre le Mal grace au mythe du vampire: la famille Belmont affronte tous les cent ans le seigneur du mal Dracula, grace a un fouet magique et un armement rudimentaire compose principalement d'un crucifix-boomerang, d'une hache, d'une dague de jet, d'une montre et d'une fiole d'eau benite. Cette suite de jeux est sans doute l'une des plus respectee, aux cotes de Mario, Zelda, Megaman et Metroid, ceci grace a une esthetique tres gothique et une bande son de tres bonne qualite qui atteignirent son apogee avec Akumaj Dracula X: Chi no Rondo (premier episode sur support CD-ROM) puis Castlevania - Symphony Of The Night. It is an action-adventure game in a fantasy setting in Southern Europe during the Middle Ages. The game was developed by MercurySteam and Kojima Productions and published by Konami. Hideo Kojima, producer of the Metal Gear franchise, was involved with the title. The game was originally announced as Lords of Shadow with no connection to the Castlevania series mentioned. This true account of the aliens who invaded the town of Point Pleasant, West Virginia - first published in 1975 - has been made into a major motion picture starring Richard Gere, Laura Linney and Alan Bates. For thirteen months Point Pleasant was plagued by a dark terror that culminated in a major disaster. Unearthly noises and ghostly lights in the sky gave way to mutilated animals, winged monsters, weird flying machines and worst of all, the fearsomely demonic 'Bird' - the Mothman. The story reads like a novel - but every single word of it is true and fully documented by John A. Keel, who spent a year in Point Pleasant where he saw and experienced many of the stranger manifestations personally.

In fewer than fifty years videogames have become one of the most popular forms of entertainment, but which are the best games, the ones you must play? This action packed book presents the best videogames from around the world - from 80's classic Donkey Kong to Doom, Frogger and Final Fantasy. Covering everything from old favourites to those breaking new ground, these are the games that should not be missed. Video game expert Tony Mott presents 1001 of the best video games from around the world and on all formats, from primitive pioneering consoles like Atari's VCS to modern-day home entertainment platforms such as Sony's PlayStation 3. 1001 VIDEO GAMES defines arcade experiences that first turned video gaming into a worldwide phenomenon such as Space Invaders, Asteroids, and Pac-Man - games that made the likes of Atari, Sinclair and Commodore household names. It also includes the games that have taken the console era by storm from Nintendo Wii to Sony Playstation and beyond - games of the modern era that have become cultural reference points in their own right including multi-million selling series such as Halo, Grand Theft Auto and Resident Evil. For aficionados this is a keepsake - charting the highlights of the past fifty years giving them key information for games they must play. For those just discovering the appeal of gaming this extensive volume will provide everything they need to ensure they don't miss out on the games that revolutionized this overwhelmingly popular medium.

The third in a series about home video games, this detailed reference work features descriptions and reviews of every official U.S. – released game for the Neo Geo, Sega Genesis and TurboGrafx-16, which, in 1989, ushered in the 16-bit era of gaming. Organized alphabetically by console brand, each chapter includes a description of the game system followed by substantive entries for every game released for that console. Video game entries include historical information, gameplay details, the author ' s critique, and, when appropriate, comparisons to similar games. Appendices list and offer brief descriptions of all the games for the Atari Lynx and Nintendo Game Boy, and catalogue and describe the add-ons to the consoles covered herein—Neo Geo CD, Sega CD, Sega 32X and TurboGrafx-CD.

The country's computer market was largely dominated by the NEC PC-8801 & PC-9801, though with some competition from the Sharp X1 & X68000, FM-7 & FM Towns, and MSX & MSX2. A key difference between Western and Japanese systems at the time was the latter's higher display resolutions (640x400) in order to accommodate Japanese text which in turn had an impact on game design.
