A powerful expose of the family court system's prejudice against mothers trying to protect their sexually abused children. Based on extensive studies into child welfare services, this important book brings together research into what works in service provision for minority ethnic families. Reviewing studies of the nature and adequacy of the services provided, and the outcomes for the children and their families, this book provides much-needed guidance for policy and practice around issues of cultural and ethnic background and identity, and puts forward suggestions for future research. The authors consider in particular: * the complex needs and identities of minority ethnic families who might use child welfare services * how families using social services view current practice * the impact of the formal child protection and court systems on ethnic minority families * placement patterns and outcomes for children from the different minority ethnic groups who are in residential care, foster care or adopted * cultural issues and 'matching' the social worker to the family. Drawing on current government statistical returns and the 2001 national census, this wide-ranging analysis challenges dated research and practice and proposes a revisionary agenda for future research and culturally sensitive child welfare practice, making it essential reading for all child welfare professionals.

Child Welfare Removals by the State addresses a most important (but little-researched) legal proceeding: when the State intervenes in the private family sphere to remove children at risk to a place of safety, adoption, or in other forms of out-of-home care. It is an intervention into the private family sphere that is intrusive, contested, and a last resort. States' interventions in the family are decided within legal and political orders and traditions that constitute a country's policies, welfare state model, child protection system, and children's position in a society. However, we lack a cross-country analysis of the different models of decision-making in a European context. This text aims to present new research at the intersection of social work, law, and social policy concerning child protection proceedings for children in need of alternative care. It explores the role of court-based and voluntary decision-making systems in child protection proceedings, its effects, dynamics, and meanings in seven European countries and the United States, and analyses the tensions and dilemmas between children, parents, and socio-legal professionals. The book consists of eight country chapters, plus an introduction and conclusion chapters. The range of countries of countries represented in the book covers the social democratic Nordic countries (Finland, Norway, and Sweden), the conservative corporatist regimes (Germany and Switzerland), the neo-liberal (England, Ireland, and the United States), and related child welfare systems. A Liberation Health Framework for Social Work

During the last decade there have been major advances in research in child welfare, the largest specialty within social work. The focus of this research has been on improving current child welfare practices and programs that protect children from abuse and neglect. The major policy and program changes in the child welfare system have been guided by these research studies, spurred by federal and state emphasis on monitoring child welfare outcomes and identifying best practices. This landmark collection gathers those research developments- and how they have been translated into policies, programs, and practice- in a single volume for the first time. Duncan Lindsey, one of the nation's foremost child welfare scholars, and Aron Shlonsky have assembled a case of the giants in the field who analyze developments in adoption, foster care, risk assessment, CPS work, welfare reform, poverty, decision making, and epidemiological studies. The final section of the book details new approaches to programs designed to combat child maltreatment and child poverty. This volume, with its unparalleled breadth, depth, and up-to-date content, will define the state of the field and serve as an invaluable reference for child welfare scholars and practitioners alike.

*Daisy Bogg is a qualified and HCPC-registered social worker who has worked within mental health and addiction services for over 20 years, for the NHS, local authorities and voluntary sector organisations. *** Report writing is a key skill for social work and one in which many practitioners receive little formal training or preparation. Fully revised and updated, the new edition of this handy pocketbook for social workers provides key advice for busy practitioners to help them to write clear, professional and well-structured reports. This includes practical advice, hints and tips to improve your report writing and ensure you adhere to best practice in your written communications. Social workers will find this guide invaluable for creating high-quality reports for a range of common situations. This useful book includes: • A range of report templates for a variety of situations, practice contexts and service user groups • Examples of good practice in report writing and common pitfalls to avoid • Examples of legal policy and assessment situations • Checklists of content and style requirements for various report types • Examples of best practice and common pitfalls, including links to the law to make your decisions evidence-based and authoritative • Checklists and decision-making flow charts to simplify what can prove a complex area Written by an experienced practitioner, this practical guide is not only suitable for newly-qualified social workers but also their more experienced colleagues that would like to develop and hone their writing skills. Students of social work will also find this an essential resource for their practice education and beyond. *** *This book forms part of a series of pocketbooks for social workers. These compact guides are written in an accessible and to-the-point style to help the busy practitioner locate the information they need as and when they need it—all bound up in A5 and under! The pocketbooks explore key practical skills involved in such areas as mental capacity, report writing and assessment.* 'This book, in my opinion, is a must for experienced and newly qualified social workers alike. The author offers a solid platform for social workers to work from by offering initial theory before identifying professional responsibility, distinguishing fact from opinion, aiding the reader to construct the purpose and goal of the report before confidently leading to an evidenced based conclusion. The book is filled with practical hints, tips and best practice points. It advises on potential pitfalls, offers a wide range of templates to ensure key areas are covered and goes as far as directing the reader on grammar and even spell-checking! The book is a practical and valuable resource.' Martin Gilbert, Learning & Development Lead in Mental Health, Birmingham City Council, UK*

Social work theory and ethics places social justice at its core and recognises that many clients from oppressed and marginalized communities frequently suffer greater forms and degrees of physical and mental illness. However, social justice work has all too often been conceptualized as a macro intervention, separate and distinct from clinical practice. This practical text is designed to help social workers intervene around the impact of socio-political factors with their clients and integrate social justice into their clinical work. Based on past radical traditions, it introduces and applies a liberation health framework which merges clinical and macro work into a singular, unified way of working with individuals, families, and communities. Opening with a chapter on the theory and historical roots of

liberation social work practice, each subsequent chapter goes on to look at a particular population group or individual case study, including: LGBT communities Mental health illness Violence Addiction Working with ethnic minorities Health Written by a team of experienced lecturers and practitioners, *Social Justice in Clinical Practice* provides a clear, focussed, practice-oriented model of clinical social work for both social work practitioners and students.

In Part One of the Munro Review (published 3rd February 2011, ISBN 9780108510137), Professor Munro set out the approach and features of the child protection system that needed exploring in detail. This second part and final report sets out recommendations to reform the child protection system, specifically from being over-bureaucratized and concerned with compliance to one that keeps a focus on children. Some of the recommendations include: that the Government should remove the specific statutory requirement on local authorities for completing assessments within often artificial set timescales; that local services which work with children and families should be freed from unhelpful government targets; that there should be an introduction of a duty on all local services to coordinate an early offer of help to families who do not meet the criteria for social care services, to address problems before they escalate to child protection issues; that Ofsted inspections of children's services should add more weight to feedback from children and families; that experienced social workers should be kept on the frontline even when they become managers so that their experience and skills are not lost and that each local authority should designate a Principal Child and Family Social Worker to report the views and experiences of the front line to all levels of management. Professor Munro also states that individual recommendations should not be taken forward in isolation but that change needs to happen across the system.

Exploring the current and historical tensions between liberal capitalism and indigenous models of family life, Ian Kelvin Hyslop argues for a new model of child protection in Aotearoa New Zealand and other parts of the Anglophone world. He puts forward the case that child safety can only be sustainably advanced by policy initiatives which promote social and economic equality and from practice which takes meaningful account of the complex relationship between economic circumstances and the lived realities of service users.

First published in 1994. Routledge is an imprint of Taylor & Francis, an informa company.

This volume examines existing research documenting racial disproportionality and disparities in child welfare systems, the underlying factors that contribute to these phenomena and the harms that result at both the individual and community levels. It reviews multiple forms of interventions designed to prevent and reduce disproportionality, particularly in states and jurisdictions that have seen meaningful change. With contributions from authorities and leaders in the field, this volume serves as the authoritative volume on the complex issue of child maltreatment and child welfare. It offers a central source of information for students and practitioners who are seeking understanding on how structural and institutional racism can be addressed in public systems.

Perry Pezzot-Pearce and John Pearce guide practitioners through the steps of assessment, from negotiating the initial referral, through data collection and report writing to court testimony.

This up-to-date and comprehensive resource by leaders in child welfare is the first book to reflect the impact of the Adoption and Safe Families Act (ASFA) of 1997. The text serves as a single-source reference for a wide array of professionals who work in children, youth, and family services in the United States—policymakers, social workers, psychologists, educators, attorneys, guardians ad litem, and family court judges—and as a text for students of child welfare practice and policy. Features include: * Organized around ASFA's guiding principles of well-being, safety, and permanency * Focus on evidence-based "best practices" * Case examples integrated throughout * First book to include data from the first round of National Child and Family Service Reviews Topics discussed include the latest on prevention of child abuse and neglect and child protective services; risk and resilience in child development; engaging families; connecting families with public and community resources; health and mental health care needs of children and adolescents; domestic violence; substance abuse in the family; family preservation services; family support services and the integration of family-centered practices in child welfare; gay and lesbian adolescents and their families; children with disabilities; and runaway and homeless youth. The contributors also explore issues pertaining to foster care and adoption, including a focus on permanency planning for children and youth and the need to provide services that are individualized and culturally and spiritually responsive to clients. A review of salient systemic issues in the field of children, youth, and family services completes this collection.

Supervisors have a pivotal position in the child welfare workforce: they recruit and retain the best employees, move agencies to best practice frameworks, and create a sustaining positive organizational climate. Child welfare supervisors must lead a stressed workforce operating in a bureaucratic environment, and always with the knowledge that children's lives are at stake. They need and deserve a book oriented to the reality of their work. *Child Welfare Supervision* connects theory and practice to provide an overview of the most relevant and sound approaches to supervision. In thirteen illuminating chapters, *Child Welfare Supervision* translates generic principles of supervision and management and organizational theory to the specifics and reality of the child welfare practice environment. The result is a comprehensive, integrated resource for child welfare supervisors that gives them the tools and information to succeed in the fast-paced and intense world of child welfare. - Covers a wide range of must-have skills for supervisors including leadership, developing worker performance, managing the Child Welfare unit, working beyond the agency, managing performance, providing clinical supervision, and respecting diversity - Features case studies and scenarios that illustrate key points and competencies - Brings together the latest research and literature review with a pragmatic approach to child welfare supervision and case studies illustrate key concepts. - Each chapter concludes with reflection questions that can be assigned for a class or used in an agency to generate thoughtful

discussion.

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Considered the profession's ideal learning resource--based on the authors' extensive experience in the field and the text's balanced focus on theory and application--*DIRECT SOCIAL WORK PRACTICE: THEORY AND SKILLS*, Eleventh Edition, prepares social work students for effective ethical and anti-oppressive practice. Authoritative, well-organized and written with an appropriate level of rigor, this thorough introduction to practice grounds students in theory while connecting them to real-world applications with clients through vivid examples and vignettes. Many case examples are drawn from active social work practitioners, as well as the authors' own practice situations. As part of the Brooks/Cole Empowerment Series, the Eleventh Edition is completely up to date, discussing topics such as COVID-19, tele-social work, Black Lives Matter and other issues related to racial inequity. In addition, the authors have carefully revised the text to incorporate gender-neutral language and explore key structural implications affecting clients and practice. The text thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2015 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). This volume presents major contributions of Applied Linguistics to the understanding of communications in the professions. The first two parts of this book deal with the theoretical and methodological orientations of professional communication studies, the history and development of professional communication studies, highlighting the discursive turn of Applied Linguistic research that goes far beyond the established paradigm of Language for Specific Purposes. The third part - the core of this book - presents research into professional practices from various domains (e.g. law, healthcare, business and management, organizations), sites of engagement (as e.g. lawyer-client-conference, doctor-patient interaction) and with respect to different themes that are generalizable across domains and sites (as e.g. communicative aspects of action and practice, of assessment and appraisal). In the final part, professionals from various domains evaluate the contribution to their work so far made by Applied Linguistics.

Travels in the Trench Between Child Welfare Theory and Practice examines how the child welfare field's rush to establish credibility and permanence through program growth during the post World War II era gave rise to a massive but fragile conglomerate unprepared to prove its merits when challenged by an increasingly dubious public. Author George Thomas proposes a broad-based shift from program growth to knowledge-based growth in policy, management, education, research, and information technology initiatives to revitalize performance and restore public confidence in the system. Thomas's book proposes to shift the leadership emphasis away from the "big business" flavor of child welfare and re-define it into a mediator role of trusting worker and client competencies. *Travels in the Trench Between Child Welfare Theory and Practice* shows how the two sides merge and concentrate on five key issues: Policy--Contrasts the impact of the two orientations on shaping the field's sense of mission, defining its role, establishing its priorities for growth relative to size, specialization, and knowledge base, and stimulating or reducing client adversarialism and public perceptions of chronic mission failure. Management--Examines how the priorities of the two orientations differ relative to preserving hierarchical authority, rewarding work that exceeds mandates, promoting innovation and experimentation, and relying on process as distinct from client outcome accountability. Education--Examines how the priorities of the two orientations differ relative to relying on manpower and brain power, on "one right way" of doing things versus doing what is legal and ethical. Research--Examines how the priorities of the two orientations differ relative to confirming the "rightness" of the field's existing knowledge base and testing it to expand its scientifically validated portion through discovery. Information Technology--Explores how the priorities of the two orientations differ relative to disclosing and preserving privileged communications, developing common and specialized language, and breaking down or protecting authority and status differentials. This historical and cross-sectional analysis forms a framework proposing that the field's future value in meeting the nation's child welfare needs must have a willingness to shift its commitments from problem to competency-oriented theory and practice, to accept a de-emphasis on growth and a reduction in specialization, and to redirect investments in education, research, and information technology. According to Thomas, this enables readers to revitalize practice wisdom, grow the scientifically validated portion of the field's knowledge base, and begin to restore public confidence in the system. The book's contents are presented in interview style to enliven the material and make it more accessible to a wide audience. The reader determines the sense and direction of the analysis and the appropriateness of the questions from which it flows. *Travels in the Trenches* is intended to promote critical analysis of the link between long range vision and its impact on daily practice.

EBOOK:The Pocketbook Guide to Report Writing

A Handbook of Practices, Policies, and Programs

This unique, multidisciplinary resource incorporates cutting-edge research and best practices in child welfare into a text that aims to teach and refine advanced child welfare skills for aspiring child welfare professionals. Featuring real-life examples and stories from the field, the handbook discusses existing methods and challenges in the field of child welfare practice. Chapters also include materials for instructors to use in classrooms or training settings. Among the topics covered: Overview of child welfare policies and how the child welfare system works Assessment tools and strategies used to identify various types of child abuse and neglect Individual, family, and community-level approaches to preventing child maltreatment and preserving families Promoting stability after foster care placement Effective collaboration while working with special populations Clinical supervision in child welfare practice Strategies for healthy professional development of child welfare practitioners The Handbook on Child Welfare Practice is a valuable resource as both a textbook in child welfare practice courses and a practical reference for child welfare professionals. This book will help develop a more knowledgeable and skilled child welfare workforce prepared to address the significant public health concern of child maltreatment.

It's not easy getting published, but everyone has to do it. Writing for Peer Reviewed Journals presents an insider's perspective on the secret business of academic publishing, making explicit many of the dilemmas and struggles faced by all writers, but rarely discussed. Its unique approach is theorised and practical. It offers a set of moves for writing a journal article that is structured and doable but also attends to the identity issues that manifest on the page and in the politics of academic life. The book comprehensively assists anyone concerned about getting published; whether they are early in their career or moving from a practice base into higher education, or more experienced but still feeling in need of further information. Avoiding a 'tips and tricks' approach, which tends to oversimplify what is at stake in getting published, the authors emphasise the production, nurture and sustainability of scholarship through writing – a focus on both the scholar and the text or what they call text work/identity work. The chapters are ordered to develop a systematic approach to the process, including such topics as: The writer The reader What's the contribution? Beginning work Refining the argument Engaging with reviewers and editors Writing for Peer Reviewed Journals uses a wide range of multi-disciplinary examples from the writing workshops the authors have run in universities around the world: including the UK, Canada, Australia, New Zealand, Ireland, South Africa, Norway, Sweden, Denmark and the United States. This international approach coupled with theoretically grounded strategies to guide the authoring process ensure that people at all stages of their career are addressed. This lively book uses a combination of personal stories, student texts, published journal abstracts and excerpts from interviews with journal editors and publishers. Written in an accessible style, one which does not use the patronising 'you' of advice books, it offers a collegial approach to a task which is difficult for most scholars, regardless of their years of experience.

Social work practitioners write for a variety of publications, and they are expected to show fluency in a number of related fields. Whether the target is a course instructor, scholarly journal, fellowship organization, or general news outlet, social workers must be clear, persuasive, and comprehensive in their writing, especially on provocative subjects. This first-of-its-kind guide features top scholars and educators providing a much-needed introduction to social work writing and scholarship. Foregrounding the process of social work writing, the coeditors particularly emphasize how to think about and approach one's subject in a productive manner. The guide begins with an overview of social work writing from the 1880s to the present, and then follows with ideal strategies for academic paper writing, social work journal writing, and social work research writing. A section on applied professional writing addresses student composition in field education, writing for and about clinical practice, the effective communication of policy information to diverse audiences, program and proposal development, advocacy, and administrative writing. The concluding section focuses on specific fields of practice, including writing on child and family welfare, contemporary social issues, aging, and intervention in global contexts. Grounding their essays in systematic observations, induction and deduction, and a wealth of real-world examples, the contributors describe the conceptualization, development, and presentation of social work writing in ways that better secure its power and relevance.

This book offers a bio-psycho-social approach to evidence-based practice in health and social care. The book presents current evidence on the influence of genetic, epigenetic and environmental factors on behaviour, a survey of developmental factors from childhood to old age, and implications for practice at each stage.

Evaluates efforts by the Department of Health and Human Services (HHS) to develop and implement a nationwide adoption and foster care data collection system. Also, since HHS funds part of the cost of developing and operating state child welfare information systems, this report also assesses the effectiveness of its guidance to the states for those purposes. Also determines whether there were innovative approaches that states were taking in developing their child welfare information systems that could be useful in developing systems in other states.

This book offers an analysis and summary of the use and limitations of child attachment theory as the basis for decision-making and planning in contemporary child welfare practice. This book explores controversies related to increasing diagnoses of 'attachment disorder' in child welfare assessments and arguments both for and against the use of attachment specific therapies for children in care. The author calls for a new pedagogy of relational child welfare and considers the relevance of attachment theory to transnational and migrant families, refugees fleeing conflict, adoptive and surrogate children in diverse families and the increased number of families that are in poverty after the global financial crisis.

Reach children and families and help them navigate the childwelfare system Case planning is one of the fundamental steps in working with dependent children, yet it is also one of the most challenging. *Essentials of Child Welfare* presents the key information clinical social workers, child advocates, family law attorneys, and other human services personnel need to work successfully with children and families in the child welfare system. *Essentials of Child Welfare* is packed with step-by-step guidelines for intervening proactively with foster care children and their caretakers. Techniques are presented for handling a number of related topics, including attachment issues, substance abuse, sexual abuse (victim and perpetrator), suicidal ideation, eating disorders, learning disabilities, juvenile delinquency, domestic abuse, and many more. As part of the *Essentials of Social Work Practice* series, this book offers a concise yet thorough overview of child welfare, numerous tips for best practices, and a prioritized assembly of all the information and techniques that must be at one's fingertips to practice knowledgeably, effectively, and ethically. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as "Test Yourself" questions that help you gauge and reinforce your grasp of the information covered.

The contributors to this book provide a comprehensive review of child care policy and practice. They present evaluations and critiques of new or impending legislation and policies, and describe innovative services for children and young people who are deemed to be in need of protection, care or control as a result of abandonment, neglect, ill-treatment, offending or other difficulties. They also examine changes in adoption law, where such issues as placement policies in relation to children from ethnic minorities, intercountry adoption and the trend towards greater openness have become prominent and controversial in recent years.

This book constitutes the thoroughly refereed proceedings of the 9th International Conference on Design Science Research in Information Systems and Technology, DESRIST 2014, held in Miami, FL, USA in May 2014. The 19 full papers, 7 research-in-progress papers and 18 short papers describing prototype demonstrations were carefully reviewed and selected from 71 submissions. The papers are organized in topical sections on design science; emerging themes; meta issues; methods; supporting business processes; team support; work-in-progress papers and prototypes.

It costs more to place a child in the care of a local authority than it does to send a child to a top boarding school, and there are substantial variations in costs both between and within authorities. This book gets to the bottom of the costs of care and provides an insight into how these variations in cost relate to differences in children's needs, and most importantly, whether higher costs reflect better services and better outcomes for children. *Costs and Consequences for Children Placed Away from Home* draws from new original research, and considers the implications for best practice and future policy. It also features information about a newly pioneered resource: a fully workable decision analysis model designed for use in local authorities which uses historical data for each child to calculate the probable cost consequences of different placement choices. This book sheds light on how to calculate the financial and social costs of care, and will be invaluable to both social work managers and policy makers working in children's services.
