The accessories can interfere with connecting the radiator for certain engines and setups for folks who want to run a stock first-

Coolant Hoses Connections Engine Ls3

There are a couple of solutions for bleeding air out of a cooling system. The first is to disconnect the upper radiator hose to fill the engine. This allows the coolant to fill the engine from the top down, helping to force the air out. Once the upper hose overflows, connect it back to the radiator and fill the remainder of the radiator.

Coolant hoses connect parts of the vehicle's cooling system together, such as the
water outlet, radiator, water pump, and heater core. Coolant travels through the
and is needed to keep many of your vehicle's systems operating smoothly. The
hose connector provides a leak-proof seal between the coolant hoses and the
parts.

Coolant Hose Connector | O'Reilly Auto Parts

They also transport hot coolant from a vehicle's engine to its radiator, where the coolant is cooled for recirculation. Also known as antifreeze hoses, coolant lines, and cooling system tubing, these hoses are made from materials that can withstand exposure to the high temperatures and additives used in vehicle cooling systems.
