*This paper presents a whole-life approach to the management,  
design and operation of culverts, with a focus on asset  
management. It addresses the management of culverts in the  
context of both the drainage basin in which they sit, and  
the infrastructure that they form part of. This is a  
comprehensive guide covering a wide range of subject matter  
relevant to the design and operation of culverts, but not  
the structural design of culverts.*
