An easily accessible and comprehensive study of the International Court of Justice, this book succinctly explains all aspects of the world's most important court, including an overview of its composition and operation, jurisdiction, procedure, and the nature and impact of its judgments.

Centuries after a worldwide nuclear war has decimated Earth's population and devastated the land, four opposing pockets of civilisation vie for control of the planet - and of the precious resources that survived the destruction. Nothing less than the future of Mankind is at stake . . . A novel of politics and people, adventure and passion, of worlds real and imagined, ORION SHALL RISE is a powerful and utterly enthralling speculation on our global destiny - and a gripping story as only Poul Anderson could write it.

This second edition of Sarah Worthington's Equity maintains the clear ambitions of the first. It sets out the basic principles of equity, and illustrates them by reference to commercial and domestic examples of their operation. The book comprehensively and succinctly describes the role of equity in creating and developing rights and obligations, remedies and procedures that differ in important ways from those provided by the common law itself. Worthington delivers a complete reworking of the material traditionally described as equity. In doing this, she provides a thorough examination of the fundamental principles underpinning equity's most significant incursions into the modern law of property, contract, tort, and unjust enrichment. In addition, she exposes the possibilities, and the need, for coherent substantive integration of common law and equity. Such integration she perceives as crucial to the continuing success of the modern common law legal system. This book provides an accessible and elementary exploration of equity's place in our modern legal system, whilst also tackling the most taxing and controversial questions which our dual system of law and equity raises.

My attic is the same as ever: quiet, lonely, sad. I'm going to write The Novel of the Short-Sighted Adolescent. But I'll write it as if I'm writing the author's Diary. My book won't be a novel, but a collection of comments, notes, sketches for a novel. It's the only way of capturing reality, both natural and dramatic at once - See more at:

The pupil protagonist is a poor student, who likes science and reads a lot of books, sometimes staying up all night to do so. At the age of 15, he decides to write a novel to demonstrate to his teachers that he is not as mediocre as all the other students, and is

prepared to give up everything he holds dear for his art. The novel is written in a number of notebooks--the "diary" of the title--but our myopic hero ultimately fails in three subjects and is too lazy to learn and has to repeat the school year. *Diary of a Short-Sighted Adolescent* was written by the young Mircea Eliade, one of Romania's greatest writers and intellectuals. The book can be viewed as an early 20th century *Catcher in the Rye*, and allows us an intimate view of the developing genius--his teachers, his classmates' academic and amorous rivalries, his first sexual experiences--and an introduction to the themes of religion, self-knowledge, erotic sensibility, artistic creation, and otherness; ideas which would preoccupy him until the end of his life.

Unul dintre cele mai cunoscute romane ale lui Mishima, *Templul de aur* a fost ecranizat de trei ori: în 1958 sub titlul *Enjo* (Conflagrația), în regia lui Kon Ichikawa, în 1976, cu titlul original *Kinkaku-ji*, în regia lui Yoichi Takabayashi, și în 1985 ca parte a filmului *Mishima: A Life in Four Chapters*, regizat de Paul Schrader și produs de Francis Ford Coppola și George Lucas. În luna iulie a anului 1950, un tânăr preot budist dă foc templului Kinkakuji. În fața instanței, acuzatul declară că urăte frumusețea. Fascinat de fapta și de justificarea nemiăuzită, Mishima încearcă să înțeleagă ce se ascunde în spatele acestui răspuns: frumusețea imuabilă a templului vechi de secole aruncă în derizoriu fericirea efemeră și imperfectă a muritorilor, amintindu-le că lumea trecătoare nu le poate oferi nimic pe măsura năzuințelor lor. „Mishima este unul dintre acele genii care se nasc o dată la trei sute de ani. În ceea ce privește talentul, îmi este cu mult superior.” (Yasunari Kawabata)

This volume, the fourteenth in the Space Sciences Series of ISS/, is dedicated to the matter in the universe, which was the topic of a workshop organized by ISSI from 19 to 22 March 2001 in Bern. The aim of the meeting was to gather active researchers from various fields (cosmology, astrophysics, nuclear and particle physics as well as space science) to assess the exciting new developments in the search for abundant and yet unknown forms of matter in the universe. Due to the importance of the field and the rapid developments which are taking place ISSI decided to organize a workshop on matter in the universe and invited nine convenors, John Ellis, Johannes Geiss, Philippe Jetzer, Heinrich Leutwyler, Klaus Pretzl, Rafael Rebolo, Norbert Straumann, Gustav Andreas Tammann and Rudolf von Steiger, who formulated the aims and goals of the meeting. The workshop was organized such as to have only plenary sessions with typically half hour presentations and ample time for discussions. The last day was devoted to conclusions and future objectives. The knowledge of the amount and nature of matter present in the universe is undoubtedly one of the most relevant topics of today's astrophysics and cosmology.

Although *The Mysterious Island* is technically a sequel to Verne's enormously popular *Twenty Thousand Leagues Under the Sea*, this novel offers a vastly different take on similar thematic motifs. As with all of Verne's best-known works, *The Mysterious Island* is a masterpiece of the action-adventure genre, with a heaping dash of science fiction influence thrown in for good measure.
