Romania: Transylvania

Belarus

Proceedings of the 1st International Symposium on Intelligent and Distributed Computing IDC 2007, Craiova, Romania, October 2007

This new, third edition of Bradt's Romania: Transylvania remains the only standane English language guide to this legendary and enchanting region. Comprehensive chapter-per-county coverage is offered, including details to cater for the diverse range of travellers to the region, from city breaks to rural escapes, ski enthusiasts to charity volunteers. Thoroughly updated, this new edition reflects all the changes of the past few years, from improved transport infrastructure (in particular the regional airports at Cluj, Sibiu and Târgu Mures) to the completion of new motorway routes, such as that between Sibiu and Deva. Also covered are a number of striking new accommodation options: for example the sustainable guesthouse in Valea Zalanului owned by HRH The Prince of Wales, and the mountaintop retreat of Raven's Nest in the Apuseni Mountains. More attractions have opened up, such as Baroque palaces formerly owned by Hungarian aristocrats, seized under the Communist regime and now being restored by the descendants of their original owners. And the region is developing its offer for new types of tourism, such as summer rock festivals, notably the Untold Festival at Cluj and Electric Castle Festival at Bontida. Transylvania, literally the 'land beyond the forest', is a wild, wooded, intensely romantic region, filled with mountains, gorges and valleys, myths and legends, dragons, bears, wolves - and vampires. Bram Stoker called it 'one of the wildest and least-known parts of Europe' a description which remains true today. One of the most beautiful regions in central Europe and home to three UNESCO World Heritage Sites, Transylvania preserves its cultural and artistic treasures in a unique landscape, bordered on three sides by the Carpathian Mountains. The hay meadows of the lower Carpathians form a man-made, high nature-value grassland ecosystem of extraordinary diversity, offering a beautiful display of wild flowers. The Carpathians are home too to lynx, wild boar, and one of Europe's largest populations of brown bear. Other natural phenomena include the Scarisora ice cave in the Apuseni Mountains and the Stanta Ana volcanic crater lake in Harghita. Whatever your interests, with Bradt's Romania: Transylvania, you can discover all of the region's many and varied attractions.

Provides managers with actionable insight into a select set of innovation constraints and how to best deal with them This PDMA Essentials Book, the third in this series, provides a framework of individual, organizational, and market and societal constraints that guides managers in identifying specific constraints related to their innovation activities and provides them with corresponding tools and practices to overcome and leverage those constraints. Written by a team of international innovation experts, Leveraging Constraints for Innovation: New Product Development Essentials from the PDMA is presented in three parts. The first part, Individual Constraints, provides insights into how to: simultaneously solve social and commercial needs for greater creativity; apply a multi-stage approach to overcome knowledge sharing in teams; and anticipate and account for psychographic differences among customers during product launch. In the second part, Organizational Constraints, insights emerge that provide guidance on how to: identify and solve for sources of innovation constraints within the company; implement and manage virtual NPD teams; and effectively organize new service development in professional services. The last part, Market Constraints, examines how to: adapt firm capabilities to overcome constraints preventing consumers in low-end and under-resourced markets from purchasing new products; implement inclusive innovation strategies to address markets constrained by underdeveloped infrastructures; develop solutions for women and other disadvantaged market traders in emerging markets. This book: Is a single comprehensive volume that covers the full spectrum of constraint-related strategies and techniques in a coherent, integrated fashion Provides a set of frameworks, techniques, and tools that can be immediately implemented by individuals across firms Offers how-to knowledge on specific tools and methods as applied to innovating products and services when facing constraints as well as for the development of new business models Integrates problem- and solution-based knowledge to enable companies to develop sustainable growth strategies by leveraging constraints and restrictions toward innovation strategies, processes and offerings Leveraging Constraints for Innovation: New Product Development Essentials from the PDMA is an ideal book for all product development professionals, including marketers, engineers, project managers, and business managers in both startups and well-established firms, and from a broad range of industries from heavy manufacturing to the service sector.

Managing Global Innovation

This paper reports the growing number of low-income countries that are making efforts to resolve their debt problems, often aided by the resources of the debt reduction facility for countries of the International Development Association (IDA). Progress for most, however, remains slow. With the backing of IDA resources and assistance from official bilateral sources, debt buy-backs have been concluded by Bolivia, Guyana, Mozambique, Niger, Sao Tome and Principe, Uganda, and Zambia. Preliminary discussions on similar operations are under way with several other countries. Although most of the major baric debt cases have been resolved, attention still needs to be focused on the problems of low-income countries. In many of these countries, the process of debt restructuring has been delayed owing to economic and political difficulties. To maintain market access on reasonable terms, countries need consistently to implement strong macroeconomic and structural policy programs. Maintenance of such programs is likely to be particularly important in the period ahead, given the high degree of uncertainty with regard to interest rate movements in the industrial countries.

Help your students achieve marketing success by delivering the best up-to-the-minute coverage of key marketing topics available in this complete, yet brief, latest edition of ESSENTIALS OF MARKETING by award-winning instructors and leading authors Lamb/Hair/McDaniel. ESSENTIALS OF MARKETING, 7E uses a fresh, streamlined design to focus on captivating examples and innovative applications that ensure students not only understand marketing concepts, but also know how to effectively apply them to real-world practice. This edition now visually illustrates key marketing concepts and showcases the customer experience with an engaging writing style punctuated by the most recent marketing statistics and figures. A new appendix and exercises emphasize building a professional marketing plan with an integrated internet focus to further prepare students for success. This book's concise 15-chapter format offers unequalled flexibility to make this course your own with outside projects and readings, while still providing the comprehensive coverage students need. Powerful teaching and learning tools form part of the book's hallmark Integrated Learning System organized around the book's learning objectives. All-new videos produced specifically for this edition feature fascinating stories of marketing success, while a myriad of exceptional online and in-book tools answer the needs of a variety of learning and teaching styles. ESSENTIALS OF MARKETING, 7E's lively coverage and broad-based appeal is designed to create a learning experience that leaves your students saying, Now that's marketing! The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

Experiences of British and Japanese Enterprises

The authors point out the entire business orientated automotive value chain. With regard to the finance perspective these elements of the value chain are scrutinized chapter by chapter. Current trends in new mobility concepts, cross-industry strategic alliances as well as requirements for product launch, especially in the BRIC countries, are highlighted. The book provides the link between science and business practice in the automotive industry. It can be used as a textbook. Many practitioners might also use it as a guideline in the field of automotive management.

Transylvania, literally the 'land beyond the forest', is a wooded, intensely romantic region steeped in myths and legends. A rural paradise, Bram Stoker called it 'one of the wildest and least known parts of Europe' and created the immortal Dracula from its reputation. The Bradt guide details the many attractions of this warm and hospitable region ? considered by many as the most beautiful in Eastern Europe. It covers popular tourist options such as staying in a Transylvanian castle, hiking trails, bear tracking, horse-cart driving plus Dracula, wildlife, cultural and historical tours.

A guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development.

Leveraging Constraints for Innovation

In this book, the world's foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field. This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice. Going beyond the traditional constraints of " price theory " and " price policy, " the authors coined the term " price management " to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, pretium, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their extensive research, consulting, and teaching around the world, Simon and Fasnacht cover all aspects of pricing following the price management process with its four phases: strategy, analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors, including consumer goods, industrial products, services, and trade/distribution. In particular, they address the implications of technological advancements, such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations, such as flat rates, freemium, pay-per-use, or pay-what-you-want. They also address the emergence of new price metrics, Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a " bible " for leaders who recognize that price is not only a means to drive profit in the short term, but a tool to generate sustained growth in shareholder value over the longer term, and a primer for researchers, instructors, and students alike. Praise for Price Management " This book is truly state of the art and the most comprehensive work in price management. " - Prof. Philip Kotler, Kellogg School of Management, Northwestern University " This very important book builds an outstanding bridge between science and practice. " - Kasper Rorsted, CEO, Adidas " This book provides practical guidelines on value creation, communication and management, which is an imperative for businesses to survive in the coming era of uncertainty. " - Dr. Chang-Gyu Hwang, Chairman and CEO, KT Corporation (Korea Telecom)

This volume includes selected and reviewed papers from the 4th International Congress of Automotive and Transport Engineering, held in Cluj, Romania, in September 2018. Authors are experts from research, industry and universities coming from 14 countries worldwide. The papers are covering the latest developments in automotive vehicles and environment, advanced transport systems and road traffic, heavy and special vehicles, new materials, manufacturing technologies and logistics, accident research and analysis and innovative solutions for automotive vehicles. The conference is organized by SIAR (Society of Automotive Engineers from Romania) in cooperation with FISITA.

This book presents the proceedings of the 1st International Symposium on Intelligent and Distributed Computing, IDC 2007, held in Craiova, Romania, October 2007. Coverage includes: autonomous and adaptive computing; data mining and knowledge discovery; distributed problem solving and decision making; e-business, e-health and e-learning; genetic algorithms; image processing; information retrieval; intelligence in mobile and ubiquitous computing.

Frameworks for Integrating Capabilities around the World

Plunkett's Engineering & Research Industry Almanac 2008

New Product Development Essentials from the PDMA

Explores how British and Japanese firms have responded to globalization from a long-term perspective. Incorporates studies from the 18th century and sheds light on the impact of the institutional setting, the influence of government and entrepreneurs, and the weight of historical contingency in conditioning firm responses to globalization.

This book charts the growth and achievements of one of the world's most important industries. The authors, two leading figures in the German automotive industry, describe the strategies that have led to the German industry's great success. They also discuss how German auto manufacturers are meeting challenges from emerging worldwide competitors. This book demonstrates what can be achieved with first-class management, marketing, branding, innovation and clear strategic aims, and as such it holds valuable lessons for managers in all industries.

The immense, global transportation and logistics sector is vital to businesses of all types. This carefully-researched book covers exciting trends in supply chain and logistics management, transportation, just in time delivery, warehousing, distribution, intermodal shipment systems, logistics services, purchasing and advanced technologies such as RFID. This reference tool includes thorough market analysis as well as our highly respected trends analysis. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 500 leading companies in all facets of the transportation and logistics industry. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company

profiled.

Towards a new order in the global automotive industry: How Asian companies catch up to their western peers

Proceedings of the European Automotive Congress EAEC-ESFA 2015

I was still living as an Arab Muslim in America. I struggled with coming out to friends and family, and so I decided to come back to Syria. It hasn't been easy. But we are here, just as we are everywhere. DAMASCUS 18:00 – Amina was walking near Fares Al-Khourri Street when three armed men seized her. According to an eyewitness, Amina was hustled into ared Dacia Logan with a bumper sticker of Basel Assad. The men are assumed to be members of the Ba'ath Party militia or one of the security services. Amina's present location is still unknown. Following the story of Amina Arraf, the blogger known as 'A Gay Girl In Damscus', and the events fomented by the media's coverage of her kidnapping, Sour Lips fuses fantasy and non-fiction to create its own speculative narrative.

The search for identity is a continuous challenge in the global world: from personal identity to social, national, European or professional identities, each person experiences nowadays a multi-dimensional self-representation. Placing the topic against an intercultural background, with a focus on communication, this book addresses the complicated relationship between self, identity, and society, from an academic perspective. The authors of the chapters in this book offer a complex landscape of professional and scholar approaches and research, in various parts of the world, including Canada, China, Estonia, France, Greece, Israel, Romania, and the United States of America.

Innovation contributes to corporate competitiveness, economic performance and environmental sustainability. In the Internet era, innovation intelligence is transferred across borders and languages at an unprecedented rate, yet the ability to benefit from it seems to become more divergent among different corporations and countries. How much an organization can benefit from innovation largely depends on how well innovation is managed in it. Thus, there is a discernible increase in interest in the study of innovation management. This handbook provides a comprehensive guide to this subject. The handbook introduces the basic framework of innovation and innovation management. It also presents innovation management from the perspectives of strategy, organization and resource, as well as institution and culture. The book's comprehensive coverage on all areas of innovation management makes this a very useful reference for anyone interested in the subject.

This volume includes selected and reviewed papers from the European Automotive Congress held in Bucharest, Romania, in November 2015. Authors are experts from research, industry and universities coming from 14 countries worldwide. The papers are covering the latest developments in fuel economy and environment, automotive safety and comfort, automotive reliability and maintenance, new materials and technologies, traffic and road transport systems, advanced engineering methods and tools, as well as advanced powertrains and hybrid and electric drives.

Motor Industry Magazine

Singapore's best homegrown car magazine, with an editorial dream team driving it. We fuel the need for speed!

Covers various trends in supply chain and logistics management, transportation, just in time delivery, warehousing, distribution, inter modal shipment systems, logistics services, purchasing and advanced technologies such as RFID. This book includes one page profiles of transportation, supply chain and logistics industry firms.

Adopted internationally by business schools, MBA programmes and marketing practitioners alike, The New Strategic Brand Management is simply the reference source for senior strategists, positioning professionals and postgraduate students. Over the years it has not only established a reputation as one of the leading works on brand strategy but also has become synonymous with the topic itself. The new edition builds on this impressive reputation and keeps the book at the forefront of strategic brand thinking.

Revealing and explaining the latest techniques used by companies worldwide, author Jean-Noël Kapferer covers all the leading issues faced by the brand strategist today, supported by an array of international case studies. With both gravitas and intelligent insight, the book reveals new thinking on a wealth of topics including: brand architecture and diversity strategies; market adaptation approaches; positioning in the private label and store brand environment, and much, much more. Whether you work for an international company seeking to leverage maximum financial value for your brand, or whether you are looking for practical guidance on brand management itself, Kapferer's market-leading book is the one you should be reading to develop the most robust and watertight approach for your company.

Navigating the next decade of auto industry transformation

The key to bridging your global innovation gap In today's global economy, it would be short-sighted to rely solely on local resources for new-product innovations. Instead, knowledge and activity critical to innovation most likely lie outside your company's home territories—sometimes far outside. And this distance makes it harder than ever to obtain and integrate these resources, eating away at your competitive edge. How to tackle this challenge? In Managing Global Innovation, INSEAD's Yves L. Doz and Keeley Wilson show you how to build and leverage a global innovation network. Drawing on extensive research and real-life company examples, they walk you through a set of practical frameworks for acquiring and integrating innovation-critical knowledge from multiple sources. You'll learn to optimize your innovation footprint, improve communication and receptivity, and enhance collaboration in order to succeed on a global scale. Based on in-depth research within more than three dozen corporations—including Citibank, Essilor, GE, GlaxoSmithKline, HP Labs, HP Singapore, Nokia, Novartis, Shiseido, Siemens, Snecma, Synopsys, and Xerox—this book bridges theory and practice. Managing Global Innovation gives you the tools to harness critical expertise from around the globe—and channel it into your innovation programs.

This textbook presents an introduction to marketing. It explains all the fundamental concepts and theories of marketing and demonstrates their application through a wealth of examples, case studies and vignettes.
