Data Communications and Networking, 5th Edition... - Scoop.it

This core module provides a working knowledge of data communications covering TCP/IP networks and digital communications. Topics covered include transport layer services, multiplexing, TCP congestion control, network layer - network service models, IP addressing and IP network design, routing principles, dynamic routing, digital transmission, modulation, multiplexing and channel coding.

Networking & Data Communications MSc Data Communications and Networking is designed to help students understand the basics of data communications and networking, and the protocols used in the Internet in particular by using the protocol layering of the Internet and TCP/IP protocol suite. Technologies related to data communication and networking may be the fastest growing in today's culture.
