**Loss Models From Data To Decisions Wiley Series In ...**

Decision tree is used as prediction models for classification and data fitting. The decision tree structure can be used to generate rules able to classify or predict target/class/label variable based on the observation attributes. Support Vector Machine (SVM) Clustering is a technique used to group data together.

**Data science - Wikipedia**

Industry data models from IBM can help accelerate your analytics journey by applying best practices, using predesigned industry-specific content. It can help you manage your enterprise data, whether in your data warehouse or in the data lake, so you can derive insights and make informed decisions.

**Industry Data Models | IBM**

As a process model is to workflow or a data model is to information, a decision model is to decision-making: A clear and unambiguous way to describe decision-making by breaking down that decision-making into a set of simple concepts. The example shows a decision requirements model that uses the DMN notation.

**The Role of Decision Modeling in Business Decision ...**

The Decision Model is unique in enforcing a rigorous process that ensures model integrity (i.e., making sure it is complete, unambiguous and conflict-free) as part of Business Logic discovery and formulation. It delivers an executable set of logic that can be consistently implemented across multiple business applications.
