Post-TVA, Josh was a principal solutions architect for a young Hadoop startup named Cloudera (CLDR), as employee 34. After leaving Cloudera, Josh co-founded the Deeplearning4j project and co-wrote Deep Learning: A Practitioner's Approach (O'Reilly Media). Josh was also the VP of Field Engineering for SkyminD.

**Deep Learning: A Practitioner's Approach eBook: Patterson**

Introduction. Like most deep learning practitioners, I'm always eager to get down to importing TensorFlow, then implementing and training models. And this is typically the approach I take for most of my hobby projects. When it comes to conducting a deep learning-based solution within a project that involves actual problems, real users, paying clients, time and monetary investments; then it is imperative that the conventional stages of a deep learning project are considered and undertaken.

**How To Approach Problem Definition In Your Next Deep Learning Project**

Authors Adam Gibson and Josh Patterson provide theory on deep learning before introducing their open-source Deeplearning4j (DL4J) library for developing production-class workflows. Through real-world examples, you'll learn methods and strategies for training deep network architectures and running deep learning workflows on Spark and Hadoop ...
