 Synopsis. Design today is a global instrument. Bernhard Burdek traces the progress of design from its beginnings in the late 19th century, through the most significant movements of the 20th century up to those recent developments in biological engineering which will shape the 21st century. Design is now a discipline in its own right and its expertise can be incorporated within interdisciplinary processes.

 Matt Malpass's book is the first to introduce critical design as a field, providing a history of the discipline, outlining its key influences, theories and approaches, and explaining how critical design can work in practice through a range of contemporary examples. Critical Design moves away from traditional approaches that limit design's role to the production of profitable objects, focusing instead on a practice that is interrogative, discursive and experimental.

 Design history is the study of objects of design in their historical and stylistic contexts. With a broad definition, the contexts of design history include the social, the cultural, the economic, the political, the technical and the aesthetic. Design history has as its objects of study all designed objects including those of architecture, fashion, crafts, interiors, textiles, graphic design, industrial design and product design. Design history has had to incorporate criticism of the 'heroic' st

 Design theory is the asking and answering of the question "Why am I designing it this way?" If you can't answer that question at every stage of the design process, you probably need to do a bit more thinking. "As designers, we shouldn't be making decisions based on personal preference. We're not artists." So, What Exactly Is Design Theory? Here we will break down the fundamentals of what we consider to be design theory. Design Principles

 History. Design theory has been approached and interpreted in many ways, from personal statements of design principles, through constructs of the philosophy of design to a search for a design science . The essay "Ornament and Crime" by Adolf Loos from 1908 is one of the early 'principles' design-theoretical texts.
