### Differential ...

**Some differential equations have solutions that can be written in an exact and closed form. Several important classes are given here. In the table below,  $P(x)$ ,  $Q(x)$ ,  $P(y)$ ,  $Q(y)$ , and  $M(x,y)$ ,  $N(x,y)$  are any integrable functions of  $x$ ,  $y$ , and  $b$  and  $c$  are real given constants, and  $C_1, C_2, \dots$  are arbitrary constants (complex in general). The differential equations are in their equivalent and alternative forms that lead to the solution through integration.**
