Differentiated Instructional Strategies for Science ...

Differentiated instruction is not a single strategy, but rather an approach to instruction that incorporates a variety of strategies. Teachers can differentiate content, process, and/or product for students (Tomlinson, 1999). Differentiation of content refers to a change in the material being learned by a student.

Differentiation for Science

Research by educator Leslie Owen Wilson supports differentiating instruction within the classroom, finding that lecture is the least effective instructional strategy, with only 5 to 10 percent retention after 24 hours. Engaging in a discussion, practicing after exposure to content, and teaching others are much more effective ways to ensure learning retention.
