

## **Discorsi Sufi Laltro Cuore Dellislam**

The twentieth century saw a proliferation of media discourses on colonialism and, later, decolonisation. Newspapers, periodicals, films, radio and TV broadcasts contributed to the construction of the image of the African “Other” across the colonial world. In recent years, a growing body of literature has explored the role of these media in many colonial societies. As regards the Italian context, however, although several works have been published about the links between colonial culture and national identity, none have addressed the specific role of the media and their impact on collective memory (or lack thereof). This book fills that gap, providing a review of images and themes that have surfaced and resurfaced over time. The volume is divided into two sections, each organised around an underlying theme: while the first deals with visual memory and images from the cinema, radio, television and new media, the second addresses the role of the printed press, graphic novels and comics, photography and trading cards.

I read somewhere that the decision to emigrate comes from a need to breathe. The hope of a better life is stronger than any other feeling. My mother decided it was better to know I was in danger far from her; but on the way to a different future, than to know I was in danger near her; but stuck in the same old fear. At the age of ten, Enaiatollah Akbari was left alone to fend for himself. This is the heartbreaking, unforgettable story of his journey from Afghanistan to Italy in an attempt to find a safe place to live.

Toorawa re-evaluates the literary history and landscape of third to ninth century Baghdad by demonstrating and emphasizing the significance of the important transition from a predominantly oral-aural culture to an increasingly literate one. This transformation had a profound influence on the production of learned and literary culture; modes of transmission of learning; nature and types of literary production; nature of scholarly and professional occupations and alliances; and ranges of meanings of certain key concepts, such as plagiarism. In order to better understand these, attention is focused on a central but understudied figure, Ibn Abi Tahir Tayfur (d. 280 to 893), a writer, schoolmaster, scholar and copyist, member of important literary circles, and a significant anthologist and chronicler. This book will appeal to anyone interested in Arabic literary culture and history, and those with an interest in books, writing, authorship and patronage.

Drawing on the tools of philology, linguistics, and ethics, this book exposes a rich array of intersections among competing rhetorics of normativity in the earliest stratum (tannaitic) of rabbinic literature.

Di Dio si parla, da qualche millennio, in molti modi, e diverse sono le sue facce. Quantomeno due: il Dio personale e avvolgente delle religioni positive e dogmatiche – l'assolata e ospitale «parete sud»; e il Dio impersonale, inconoscibile, abissale di certi mistici e filosofi – la

vertiginosa «parete nord». Se un volto di Dio può mostrarsi, oggi, è plausibile che sia innanzitutto il secondo. Lo suggeriscono le pagine di questo libro luminoso, franco diario personale e al tempo stesso guida attraverso gli indizi offerti da miti, leggende e racconti. E se in *Le cose come sono* Hervé Clerc si è aperto una via attraverso i testi buddhisti, riuscendo a renderli accessibili, allo stesso modo qui, allargando lo sguardo a varie tradizioni religiose, con rara grazia offre un appiglio per ascendere verso la più ineffabile e nascosta delle realtà. «"A Dio per la parete nord" è un libro essenziale» ha scritto Emmanuel Carrère. «Uno di quei libri rari in cui ha preso forma, in una lingua limpida e amichevole, tutto quanto è e pensa un uomo». E conclude: «L'ho già letto tre volte, e lo rileggerò spesso. Perché si tratta di un libro-compagno, un libro-conversazione, un libro su cui – al pari del suo autore – si può contare per la vita».

*The vast Deccan plateau of south-central India stretches from the Arabian Sea to the Bay of Bengal. In the sixteenth and seventeenth centuries, the region was home to several major Muslim kingdoms and became a nexus of international trade — most notably in diamonds and textiles, through which the sultanates attained remarkable wealth. The opulent art of the Deccan courts, invigorated by cultural connections to the Middle East, Africa, and Europe, developed an otherworldly character distinct from*

*that of the contemporary Mughal north: in painting, a poetic lyricism and audacious use of color; in the decorative arts, lively creations of inlaid metalware and painted and dyed textiles; and in architecture, a somber grandeur still visible today in breathtaking monuments throughout the plateau. The first book to fully explore the history and legacy of these kingdoms, Sultans of Deccan India elucidates the predominant themes in Deccani art—the region's diverse spiritual traditions, its exchanges with the outside world, and the powerful styles of expression that evolved under court patronage—with fresh insights and new scholarship. Alongside the discussion of the art, lively, engaging essays by some of the field's leading scholars offer perspectives on the cycles of victory and conquest as dynasties competed with one another, vied with Vijayanagara, a great empire to the south, and finally succumbed to the Mughals from the north. Featuring some 200 of the finest works from the Deccan sultanates, as well as spectacular site photographs and informative maps, this magnificently illustrated catalogue provides the most comprehensive examination of this world to date and constitutes a pioneering resource for specialists and general readers alike.*

*This is the first English translation of Miftah al-falah, a thirteenth century Sufi text, written by Ibn Ata Allah, one of the great masters of the Shadhili Sufi order. It is considered to be one of his most important works because it sets out the principles of actual Sufi mystical practices, shedding light on the sacred invocations, and associated practices, such as the spiritual retreat. Written in a clear, lucid style, it offers a glimpse into the Sufi world of the 7th Islamic century and allows us to see almost at first hand how the novice was guided by the Sufi Shaykh and, above all, the purpose and preparation involved in engaging in the invocation, dhikru'llah. Ibn Ata' Allah sets out to define it, to explain its nature and power, to show its results and to prove that it is part of the Prophet's Sunna, or practice. **"First published in 2005, Understanding Jihad unraveled the tangled historical, intellectual, and political meanings of jihad within the context of Islamic life. In this revised and expanded second edition, author David Cook has included new material in light of pivotal events over of the past ten years, such as the revolutionizing events of the Arab Spring, the death of Osama bin Laden, and the rise of new Islamic factions such as ISIL. Jihad is one of the most loaded and misunderstood terms in the news today. Contrary to popular understanding, the term does not mean "holy war." This judiciously balanced, accessibly written, and highly relevant book looks closely at a range of sources from sacred Islamic texts to modern interpretations of the term, opening a critically important perspective on the role of Islam in the contemporary world. As David Cook traces**

**the practical and theoretical meanings of jihad, he cites from scriptural, legal, and newly translated texts to give readers a taste of the often ambiguous information that is used to construct Islamic doctrine. He looks closely at the life and teaching of the Prophet Muhammad and at the ramifications of the great Islamic conquests in 634 to 732 A.D. He sheds light on legal developments relevant to fighting and warfare, and places the internal, spiritual jihad within the larger context of Islamic religion. He describes some of the conflicts that occur in radical groups and shows how the more mainstream supporters of these groups have come to understand and justify violence. He has also included a special appendix of relevant documents including materials related to the September 11 attacks and published manifestos issued by Osama bin Laden and Palestinian suicide-martyrs"--Provided by publisher.**

Shaping Modernity in a Transcultural Space

A Glossary of Technical Terms and Bibliography

An Annotated Edition of His Italian Report

In the last two decades of the 20th century, theorising on modernity has entered a new stage. The former dichotomy between an active West exporting its successful model of modernity on a global scale and passive non-Westerners gratefully implementing this model in their own societies has been challenged by critical anthropology and postcolonial studies, and further elaborated upon within social theory. This volume focuses on Europe and the Islamic world as two historically constructed geo-civilisational domains, and shows that modernity was not achieved in splendid isolation in Europe, but in the tensions and conflicts within the « transcultural space » between Europe and Islam. The impact of Islam as a complex civilising tradition on the making of Europe, and vice versa, impinged on the building of political, religious and

scientific institutions and discourses. These sustained a continuous process of drawing, adjusting and transgressing symbolic and geo-political boundaries between the two civilisational realms, from medieval rivalries to present-day migration-related conflicts. This volume assembles seven contributions by historians and sociologists covering the whole of the modern era and focusing on the notion of a transcultural space and the discussion of revised concepts concerning the genesis and shape of modernity. In so doing, they try to escape both the apories of cultural relativism and the militancy of the « clash of civilizations » .

Shaykh Muhammad Hisham Kabbani, Sheikh Soufi la Confraternita islamica Naqchbandi, ha scritto un trattato sulla geografia dell'anima, che inizia con diciassette carattere distruttivo di cuore per terminare con sei meravigliosa latenti poteri del cuore. Questo libro si rivolge a un vasto pubblico, soprattutto quelli che non hanno familiarità con la terminologia Sufi, fornisce un prezioso apertura su entrambi i discorsi vecchi e la tempestività del mistico dell'Islam, in cui interpretazioni gnostico Versetti coranici, Hadiths e tradizionali come le scienze della numerologia sono tutti inclusi in un catalogo di potenziali membri, livelli e pericoli di anima durante il suo ritorno a Dio. Ha presentato la sua analisi come una scienza spirituale di realizzazione di se, ripristinando il significato originario della scienza come conoscenza - con la conoscenza di se

stesso come il piu potente e piu complesso campo della comprensione "i fondamenti della scienza moderna sono basato sulla comprensione del rapporto tra l'anima e il mondo ." Anche Newton-figura emblematica della scienza moderna - ha concentrato i suoi studi su alchimia, la scienza che collega la tradizionale microcosmo del macrocosmo l'anima del cosmo. A proposito, Kabbani ha affermato che la scienza contemporanea tecnologia dei telefoni cellulari, Internet, viaggi aerei e sulla memoria digitale sono imitazioni dei tradizionali poteri di maestri spirituali. Si tratta di un affascinante e persuasiva dichiarazione, quella che richiede piu attenzione, perche egli parla della finalita originaria della scienza: che e quello di rendere manifesto il latenti poteri di per se l'anima nella sua continua ricerca di una contatto con le conoscenze attraverso il tempo e lo spazio. L'altro aspetto dell 'importanza di questo libro e la sua raccomandazione di rivedere il personale (mouhasabah). Parlando alla coscienza dei lettori, Kabbani specifica come suicida abitudini come ad esempio la rabbia, depressione e avidita persistono se sono ignorati. Liberando tali caratteristiche distruttive richiede la nostra apprensione, in primo luogo, alternative. La pratica della devozione richiede disciplina e inizia con un abile auto-esame e una simultanea contemplazione. Kabbani descrive attentamente il comportamento e le qualita specifiche di essere conosciuti. Qui, egli offre una comprensione psicologica del percorso a partire tratti come dolo, allegato

*Love, compassion, and peace – these words are at the heart of all spiritual endeavors. Although we intuitively resonate with their meaning and value, for most of us, the challenge is how to embody what*

*we know; how to transform these words into a vibrant, living practice. In these times of conflict and uncertainty, this transformation is far more than an abstract ideal; it is an urgent necessity. Peace in the world begins with us. This wonderfully appealing offering from one the most trusted elders of Buddhism in the West is a warm and engaging exploration of the ways we can cultivate and manifest peace as wise and skillful action in the world. This charming book is illuminated throughout with lively, joyous, and sometimes even funny citations from a host of contemporary and ancient sources – from the poetry of W.S. Merwin and Galway Kinnell to the haiku of Issa and the great poet-monk Ryokan, from the luminous aspirations of Saint Francis of Assisi to the sage advice of Thich Nhat Hanh and the Dalai Lama.*

*The volume Cyclical Time and Ismaili Gnosis brings together in English translation three of Henry Corbin's richest and most complex studies, originally presented at the Eranos conferences of 1951 and 1954 and another conference in 1956.
