Experiment 1 Laboratory Techniques and Measurements Purpose: To determine measurements of different items that vary from solids to liquids and be able convert those values to other SI units of measurement. Procedure: I used a variety of scientific tools such as; a ruler, beaker, graduated cylinder, volumetric flask, thermometer, burner, and digital scale to find unknown values of measurements for each of the indicated items and solutions.

1502 Words7 Pages. Laboratory #1 Introduction to Laboratory Techniques Sean Pence Jackie Butler September 6, 2012 September 13, 2012 Abstract: This lab contains four different experiments. All four experiments focus on proper laboratory techniques. The reasoning behind this lab was to become familiar with lab equipment, the proper usage of lab equipment, and how to correctly take data and notes.

[Experiment 1- Introduction to Laboratory Techniques | Bartleby](#)

Lab 1 Practice using the analytical balance and clean your glassware. A brief soaking in warm detergent solution should be enough to remove grease and dirt. If not, consult your TA. Become familiar with your glassware and begin calibrating it. Lab 2 Calibrate your glassware. During this lab period you will need to check out one or more

Experiment #1 Christopher Sanchez 09/22/20 1. Pre-Laboratory Assignment For the Pre-Lab assignment, we were tasked to read and look over the first experiment to become familiar with the steps, and to also become familiarized with the Vivado software. 2. Design Completion As each design was completed, a simulation was done in order to verify that they were coded correctly and can be made into ...

The course covers the key concepts of three of the principal topics in first-year undergraduate physical chemistry: thermodynamics, kinetics and quantum mechanics. These three topics cover whether or not reactions occur, how fast they go and what is actually going on at the sub-atomic scale.

This experiment was designed to introduce you to two of the most common modes of data collection that will be used in this class. Part I will guide you through collecting and analyzing data over time. A Temperature Probe will be used to record the temperature of water for 60 seconds at a rate of one sample per second.
