"Stafford Beer is undoubtedly among the world's most provocative, creative, and profound thinkers on the subject of management, and he records his thinking with a flair that is unmatched. His writing is as much art as it is science. He is the most viable system I know." Dr Russell L Ackoff, The Institute for Interactive Management, Pennsylvania, USA. "If anyone can make it [Operations Research] understandably readable and positively interesting it is Stafford Beer everyone management should be grateful to him for using clear and at times elegant English and ... even elegant diagrams." The Economist This is the companion volume to Brain of the Firm and addresses the nature of viable systems, those capable of surviving. It does not use the neurophysiological basis elucidated in brain, but develops the same theory from first principles. This book declares that every enterprise is a system, and in particular must be a viable system. Viability is not just a matter of economic solvency; we need laws that govern the capacity of any enterprise to maintain independent existence. The Heart of Enterprise is full of examples (actual, author-generated examples) taken from management practice." I consistently find that Stafford Beer provides the most useful analytical framework for understanding and managing an enterprise- public or private. Heart of The Enterprise offers a demanding but rewarding exposition of his approach and applications." Sir Douglas Hague CBE.

"Here, Roshi Kapleau focuses on koans that illuminate fundamental issues of the spiritual life. While koans may be said to be uniquely Zen, in Kapleau's explorations they start to become as familiar, everyday, and relevant as the questions we ponder in one form or another all our lives: Why was I born? Why must I die? How can I find an end to suffering?"--BOOK JACKET.

'Wind-whipped and salt-stung, Malcolm's account of island life is both grounding and immensely heart-warming. He is to GPs what James Herriot is to vets.' MATT GAW 'A fascinating, funny and utterly heart-warming family adventure. Beautifully written and completely unforgettable.' RUTH HOGAN 'A mesmerising read about a personal journey, this book is all versions of love (with the island of Eday in starring role).' HANNAH PERSAUD 'I love the descriptions of the landscape and everyday life.' DOLLY ALDERTON

Set in the wild and remote landscape of Eday, part of the Orkney archipelago, Close to Where the Heart Gives Out is the unflinchingly honest and moving tale of rural life, from the only doctor on the island ... In his forties, Malcolm gave up his job in suburban Glasgow when a persistent seed that had been growing inside him started to bloom, disrupting the foundations of his life. When he saw the job advert, 'urgent: island doctor needed', he applied immediately. What he didn't anticipate was how much Orkney would affect his family, for better or worse. In stories that range from the humorous to the deeply moving, Malcolm describes what it's like adjusting to life without modern conveniences and to the extreme - and constantly changing - weather; and what it means to be providing the best medical care to the local population with limited resources. Which often includes the wildlife as well ... Malcolm's journey evokes the awe that the Orkney landscape can inspire, as well as the challenges of island life and the demons that the dark, cold winter months can give birth to. Gripping and beautifully written, Close to Where the Heart Gives Out reminds us of the importance of listening to our heart, as well as to the rhythms of the landscape.

An Arrow To The Heart is decidedly not a standard conventional love story la Cupid's arrow! It's more like discovering too late that one's potential soul mate is equally attracted to a cat-a wildcat, to be precise- in the form of an 18 year-old daughter who is twice as precocious and desirable as her mother. It's a challenge for none other than a master of the universe, and that master is Jack Diamond himself-the Master of the Welded Bead and the lead character in the story which goes by that same name. It is actually a continuation of that story, written originally as a follow-on screenplay, but of such a different character as to demand its own title. The story is unique in that it demonstrates that no matter how "advanced," "developed," or "experienced" the soul, the vastness of the "Event-Former's" intelligence is always tossing a new combination of ingredients into life's cake to make the temptations of Satan seem like child's play next to the cake baked to tempt mastery's extended

capabilities. What would you have done wearing the shoes of any of the story's principle characters?

A revised, updated edition of this classic work on the Sacred Heart of Jesus. Dr. Tim O'Donnell examines the doctrinal roots of the devotion to the Sacred Heart in Scripture and in the Apostolic and Patristic ages; charts its growth and development through the Middle Ages; explains the enormous contribution of Saint Margaret Mary Alacoque; and unfolds the teachings of the Papal Magisterium on the Sacred Heart, including Vatican II and John Paul II. The book also includes photographs illustrating the development of the devotion. The Sacred Heart is intimately linked to our response in love to the Eucharistic Christ. It lies at the core of Catholic spirituality. A key to effective renewal of individuals, the Church and the world. For those who haven't yet lived this devotion--or who want to live it more fully--they will discover its richness and beauty in Heart of the Redeemer. Years of careful research have produced a volume synthesis of how the devotion to the Heart of Jesus has developed over the centuries. The result is a moving overview of how devotion for Jesus Christ has grown in the hearts of the faithful from Calvary to the present day.

The Nellie, a cruising yawl, swung to her anchor without a flutter of the sails, and was at rest. The flood had made, the wind was calm, and being bound down the river, the only thing for it was to come to and wait for the turn of the tide. The sea-reach of the river stretched before us like the beginning of an interminable waterway. In the offing the sea and the sky were welded together without a break, and in the luminous space the tanned sails of the barges drifting up with the tide seemed to stand still in red clusters of canvas peaked, with gleams of varnished sprits. A haze rested on the low shores that ran out to sea in vanishing flatness. The air was warm and Gravesend, and farther back still seemed condensed into a mournful gloom, brooding motionless over the biggest, and the grandest, earth.

Comprised of only 632 Chinese characters, the Heart Sutra is Buddhism in a nutshell. Despite its brevity, this powerful work contains more of the Buddha's teachings than any other scripture, and its influence is more profound and wide-reaching than any other text in the Buddhist canon. Thich Nhat Hanh's translation and commentary is regarded as the most simple, clear, concise, and understandable available. He presents the sutra as "a precious gift to us, the gift of fearlessness," offering subtle and profound teachings on non-duality and the letting go of preconceived notions, opinions, and attachments, thereby becoming open to all the wonders of our life. This completely revised edition celebrates the 20th anniversary of the first publication of a modern classic.

'We've left a lot of men in Borneo – know what I mean?' With their SAS trainer's warnings ringing in their ears, the naturalist, Redmond O'Hanlon, and the poet, James Fenton, set out to rediscover the lost rhinoceros of Borneo. They were loaded with enough back-breaking kit to survive two months in a steaming 95° (in the shade) jungle of creeping, crawling, biting things. O'Hanlon could also rely on his encyclopaedic knowledge of the region's flora and fauna, and had read-up on how to avoid being eaten by anything (stick your thumbs in a crocodile's eyes, if you have time). And yet they proceeded to have an adventure that neither O'Hanlon, nor his friend, nor even his guides were remotely prepared for... In 1859, at age fourteen, Florence Szász stood before a room full of men and waited to be auctioned to the highest bidder. But slavery and submission were not to be her destiny: Sam Baker, a wealthy English gentleman and eminent adventurer, was moved by compassion and an immediate, overpowering empathy for the young woman, and braved extraordinary perils to help her escape. In today's increasingly electronic world, we say our personality traits are "hard-wired" and we "replay" our memories. But we use a different metaphor when we speak of someone "reading" another's mind or a desire to "turn over a new leaf"—these phrases refer to the "book of the self," an idea that dates from the beginnings of Western culture. Eric Jager traces the history and psychology of the self-as-text concept from antiquity to the modern day. He focuses especially on the Middle Ages, when the metaphor of a "book of the heart" modeled on the manuscript codex attained its most vivid expressions in literature and art. For instance, medieval saints' legends tell of martyrs whose hearts recorded divine inscriptions; lyrics and romances feature lovers whose hearts are inscribed with their passion; paintings depict hearts as books; and medieval scribes even produced manuscript codices shaped like hearts. "The Book of the Heart provides a fresh perspective on the influence of the book as artifact on our language and culture. Reading this book broadens our appreciation of the relationship between things and ideas."—Henry Petroski, author of *The Book on the Bookshelf*

One of the most time-consuming tasks in clinical medicine is seeking the opinions of specialist colleagues. There is a pressure not only to make referrals appropriate but also to summarize the case in the language of the specialist. This book explains basic physiologic and pathophysiologic mechanisms of cardiovascular disease in a straightforward manner, gives guidelines as to when referral is appropriate, and, uniquely, explains what the specialist is likely to do. It is ideal for any hospital doctor, generalist, or even senior medical student who may need a cardiology opinion, or for that ma.

This book will give you the tools you will need to pray effectively, be healed and at the same time restore your joy in the ministry of Prayer and Intercession. This book will show you that all you've done has been as unto the Lord and your struggle, your private pain is not in vain. It was only shaping your heart to the will of the Father. Intercessors feel not only the heart of the Father, but the burden of the people and often times deal with attacks because God has chosen you to be his burden bearer. As you read this book, it will show you how to maneuver through the attacks of the enemy and truly come to a place where the secret place of the Most High is your daily habitation.

The practice of Yoga is now being widely embraced by the West in an endless range of evolving formats, particularly with added movement components. It is therefore very timely that Osho with his razor-sharp insight, respect, and compassion for the individual, brings a wider understanding of the potential benefits of Yoga for contemporary people in these talks on the Yoga Sutras of Patanjali. Patanjali lived around 400BC and although Yoga was already in existence, he was able through his unique combination of logician, poet, and mystic, to present Yoga in a way that could be of help to all. And that continues to be true today. Osho describes Patanjali as a mathematician of the ultimate poetry; a mystic with a scientific mind, who analyzes and dissects as if in a lab, but his lab is one of the inner being. Patanjali has searched deeply into human energy and devised many techniques; he has found that in order to meditate, the body, mind, and being need to be healthy. His discovery that the body energy becomes whole with the chanting of om, the basic sound of existence, and his findings of the deep connection between breathing and thinking have been of great importance to generations of meditators. ?The body is your anchor, your ship which will lead you to the other shore. The body keeps the treasure, the seeds of the divine within you protected.? Osho

In her latest book, five-time #1 New York Times bestselling author Dr Brené Brown, writes, "If we want to find the way back to ourselves and each other, we need language and the grounded confidence to both tell our stories, and to be stewards of the stories that we hear. This is the framework for meaningful connection." In Atlas of the Heart, Brown takes us on a journey through 87 of the emotions and experiences that define what it means to be human. As she maps the necessary skills and lays out an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances - a universe where we can share and steward the stories of our bravest and most heart-breaking moments with one another in a way that builds connection. Over the past two decades, Brown's extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. Atlas of the Heart draws on this research, as well as Brown's singular skills as a researcher/storyteller, to lay out an invaluable, research-based framework that shows us that naming an experience doesn't give the experience more power, it gives us the power of understanding, meaning and choice. Brown shares, "I want this to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves. Even when we have no idea where we are."

An Arrested Heart is an ordinary man ' s story of life in Rhodesia, wartime flying, marriage and journey in following an extraordinary God. The book details some history of how the country was formed, his life as a school boy and outstanding sporting achievements. It highlights his exploits as a bush fighter pilot during the intense and bloody war that transformed the country to one man-one-vote, black ruled Zimbabwe. The book also describes his marriage, move to South Africa and subsequent meltdown as a person, resulting in divorce and extreme loneliness and depression. However a radical encounter with God led to remarriage to his wife, repatriation with his children and a life-time calling to missions. The story outlines the tremendous personal struggles within, dealing with the impact of the war and his privileged upbringing and subsequently following God ' s purpose for his life. His personal journey of faith resulted in him and his family serving God in missions with Youth With a Mission (YWAM) in Southern Africa and many opportunities to visit various countries sharing God ' s love. The story encompasses the transformation of his personal belief system and is a testimony of a family completely renewed for His service. It culminates in an amazing story of commitment to care for abandoned, HIV/AIDS affected and other vulnerable children in Lesotho. Ray ' s vision to establish a centre of excellent service to these children and widows in the community has resulted in the establishment of a R8 million care centre designed to serve in various ways. This service to give children a second chance in life has resulted in opportunities to motivate many people from all over the world to get involved in the tiny country of Lesotho. Hundreds of people worldwide have since partnered by giving, going or representing this centre. An Arrested Heart is filled with anecdotes of extreme personal emotions, varying from pain and abject suffering to exuberant celebration and joy. It will be an inspiration to anyone who may doubt their self worth and ability to ever achieve anything significant with their life. It is also a deliberate and unashamed testimony of God ' s love and commitment to every person and His desire to see us all live abundant and fulfilled lives. The book is raw, honest and intimate in its content and should cause those who read it to search within themselves and find faith and belief to move from where they are, to greater things, no matter what their past or present situation. The author ' s following favourite quote by President Theodore Roosevelt captures the essence of how he tries to live his life: " It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at

least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat. ”

Scientists today working on controversial issues from climate change to drought to COVID-19 are finding themselves more often in the middle of deeply traumatizing or polarized conflicts they feel unprepared to referee. It is no longer enough for scientists to communicate a scientific topic clearly. They must now be experts not only in their fields of study, but also in navigating the thoughts, feelings, and opinions of members of the public they engage with, and with each other. And the conversations are growing more fraught. In *Getting to the Heart of Science Communication*, Faith Kearns has penned a succinct guide for navigating the human relationships critical to the success of practice-based science. This meticulously researched volume takes science communication to the next level, helping scientists to see the value of listening as well as talking, understanding power dynamics in relationships, and addressing the roles of trauma, loss, grief, and healing.

Richard Holloway is one of our most beloved public thinkers. As Bishop of Edinburgh and Primus of the Scottish Episcopal Church he put principle over Church policy to advocate for gay rights and women in the priesthood. He never shied away from confronting his own doubts and fears, whether questioning his own faith, or facing the inevitability of death. Across numerous bestselling books he has been a radical voice of compassion and realism, helping us navigate the hectic modern world.

Throughout his life Richard has turned to poets and writers to help answer the big questions, and for solace and guidance in the face of life ’ s challenges. Now in *The Heart of Things* he shares those poems and words which have been his own guide, offered in the hope they will help us too. Here then are some lights along life ’ s path, with thoughts and reflections on living well, death, sadness, regret, sin, conflict and forgiveness. All interwoven with Richard ’ s philosophical consideration of what they have meant to him. This is a book to turn to for inspiration, guidance and comfort. It offers lessons from those who, in Richard ’ s words, ‘ know best how to listen and teach us to listen ’ , all united by ‘ the sensual appeal of words, the pain and pleasure they impart ’ . It is a book to treasure.
