Getting started in Amateur Radio Amateur radio is a popular technical hobby and volunteer public service that is all about the skill and fascination of communicating using radio. Radio amateurs have their own communications satellites, can talk to astronauts aboard the International Space Station, and are often involved with cutting-edge experimental wireless technology.

**Getting started in Amateur Radio | AMSAT-UK**

After World War 1, amateurs in the radio landscape started to experiment with the unique technology that Marconi had discovered. Amateur radio practices emerged as a way to find out what different high and low-frequency broadcasts were capable of in different environments. Over the years, the passion for exploring amateur radio bands started to grow.

Amateur Radio Getting Started Guides At Essex Ham, we know that once you've got your licence, taking the next steps can be tricky – we've all been there. To help out, we've put together some handy Amateur Radio Getting Started Guides , available as web pages or PDF files.

**Amateur Radio Getting Started Guides - Essex Ham**

Figure out where you are going to be using your license the most and go from there. If you are going to be using it mostly in your car, get a good mobile radio. If you are going to be operating mostly on foot or horseback then a HT is probably the best option. Up until a few years ago for a decent HT, you were looking at \$250+, and if you wanted a mobile radio it was \$300+. So if you only had \$400 to spend, it was pretty much one or the other.
