Grade 7 Science and Technology! - Google Sites

Grade 7. Science. unit 1: Interactions within ecosystems. In this cluster, students investigate the complex interactions between organisms and their environment. Students identify biotic and abiotic components of ecosystems, and analyze the cycling of matter that takes place within them. This includes an investigation of the transfer of energy that occurs at various consumer levels, the implications of the loss of producers and consumers to the transfer of energy, and the potential for ...

Mr. Smith - Grade 7 Science

Science and Technology intends to develop initiative, creative, innovative, and inquisitive learners. The learning area fosters an appreciation of the design and the use of tools to solve real life problems. The syllabus will follow a spiral approach that will lead learners to demonstrate a positive relationship with science and technology.

juniOr SCienCe anD TeCHnOLOgy

The points given below, explain the basic differences between science and technology: Science can be defined as an organised way of gathering knowledge on a subject, through various observations and experiments. Technology is the practical usage of the laws of science for different purposes. Science is nothing but a process of exploring new knowledge, whereas technology is putting scientific knowledge into practice.

Difference Between Science and Technology (With Comparison ...
