Basic shapes. One of the simplest and most commonly used commands in TikZ is the \draw command. To draw a straight line we use this command, then we enter a starting co-ordinate, followed by two dashes before the ending co-ordinate. We then finish the statement by closing it with a semicolon. \draw (0,0) -- (4,0);

The probably easiest way in TikZ is: draw a "double" line (TikZ manual, 15.3.4 Graphic Parameters: Double Lines and Bordered Lines). Originally, it gives two parallel lines with space in-between filled by a color. But we want to get a single line. Solution: a double line in white, the gap between them filled in black.
