H2S Analyser | IP 570 | ASTM D7621 | ISO 8217

Scope. This document specifies procedures for the determination of the hydrogen sulfide (H₂S) content of fuel oils including marine residual fuels, distillates and petroleum blend stocks with viscosities up to 3 000 mm² s⁻¹ at 50 °C as measured in the liquid phase. The method covers two procedures (A and B) and the relevant apparatus.

(FOBAS) along with support of other major international oil companies to offer rapid measurement of H₂S in liquid petroleum products.

H₂S Analyser - Mindex Ltd.

IP 570 - Determination of Hydrogen Sulfide in Fuel Oil - Rapid Liquid Phase Extraction Method. The H₂S Analyser was originally developed in cooperation with Lloyd's Register's 'Fuel Oil and Bunker Analysis Service' (FOBAS) along with support of other major international oil companies to offer rapid measurement of H₂S in liquid petroleum products. The H₂S Analyser is an excellent tool for supporting Quality Control and safety ensuring product is within approved specification.
