A histogram is a graphical representation of the pixels exposed in your image. The left side of the graph represents the blacks or shadows, the right side represents the highlights or bright areas and the middle section is mid-tones (middle or 18% grey). How high the peaks reach represent the

number of pixels in that particular tone.

How to Read and Use Histograms - Digital Photography School

Use a tripod to ensure stability while you photograph. Taking free-hand photos can result in blurry images because of shaky hands. Mount your camera upside down between the tripod legs. Use a level on top of the camera to make sure the lens is parallel to the photo.
